Marketing Modernity Italian Advertising From Fascism To Postmodernity:

Marketing Modernity Adam Arvidsson, 2003-12-08 In *Marketing Modernity* Adam Arvidsson traces the development of Italy's postmodern consumer culture from the 1920s to the present day. In so doing, Arvidsson argues that the culture of consumption we see in Italy today has its direct roots in the social vision articulated by the advertising industry in the years following the First World War. He then goes on to discuss how that vision was further elaborated by advertising's interaction with subsequent big discourses in Twentieth Century Italy: fascism, post-war mass political parties, and the counter culture of the 1960s and 1970s. Based on a wide range of primary sources, this fascinating book takes an innovative historical approach to the study of consumption.

Material Nation Emanuela Scarpellini, 2011-03-31 In this fresh, unfamiliar, and sometimes surprising picture of modern Italy, history is refracted through the prism of the nation's consumer culture. What were Italians eating and drinking over this period? Where did they live? What did they do in their leisure time? What did they choose to spend their spare money on? And how did this differ between different economic classes and over time? From the battle against poverty conducted by the first liberal governments of a united Italy to fascist autarchy, up to the emergence of welfare policies and today's multifaceted society, Scarpellini looks at how the material culture associated with consumption has structured Italian life and defined the boundaries of class, gender, generations, and regional differences, inspiring government policies and influencing the worlds of art and literature. Keeping a constant eye on wider historical trends, both in Italy and internationally, the book looks at how the basic triad of consumer culture—food, housing, and clothing—slowly developed into a more complex pattern incorporating transport, domestic appliances, and then electronics, communications, and fashion. Combining economic and cultural history with a vivid narrative style, this book is essential reading for anyone interested in the history of modern Italy and of consumption more generally in the last century and a half.

Decoding Modern Consumer Societies H. Berghoff, U. Spiekermann, 2012-01-02 Drawing on a wide range of studies of Europe, the United States, Asia, and Africa, the contributions gathered here consider how political history, business history, the history of science, cultural history, gender history, intellectual history, anthropology, and even environmental history can help us decode modern consumer societies.

Drinks in Vogue David Inglis, Hang Kei Ho, 2023-09-28 How do fashions in drinks work, and how are drinks fashions related to changing trends in clothes and apparel?

These twin questions are posed and answered by the book *Drinks in Vogue* Taking a radically cross disciplinary set of perspectives and ranging far and wide across time and space the book considers beverages as varied as cocktails wine Champagne craft beer coffee and mineral water The contributors present rich case materials which illuminate key conceptual issues about how fashion dynamics work both within and across the worlds of beverages and clothes Covering both contemporary and historical cases and drawing upon perspectives in disciplines including sociology history and geography among others the book sets out a novel research programme that intersects fashion studies with food and drinks studies

Branded Entertainment and Cinema Gloria Dagnino, 2019-11-25 The history of Italian cinema is mostly regarded as a history of Italian auteurs This book takes a different standpoint looking at Italian cinema from the perspective of an unusual but influential actor advertisers From the iconic Vespa scooter and the many other Made in Italy products placed in domestic and international features to Carosello's early format of branded entertainment up through the more recent brand integration cases in award winning titles like *The Great Beauty* the Italian film and advertising industries have frequently and significantly intersected in ways that remain largely unexplored by academic research This book contributes to fill this gap by focusing on the economic and cultural influence that advertising and advertisers interests have been exerting on Italian film production between the post war period and the 2010s Increasingly market oriented film policies ongoing pressure from Hollywood competition and the abnormal economic as well as political power held by Italian ad funded broadcasters are among the key points addressed by the book In addition to a macro level political economic analysis the book draws on exclusive interviews with film producers and promotional intermediaries to provide a meso level analysis of the practices and professional cultures of those working at the intersection of Italian film and advertising industries Providing an in depth yet clear and accessible overview of the political and economic dynamics driving the Italian media landscape towards unprecedented forms of marketisation this is a valuable resource for academics and students in the fields of film and media studies marketing advertising and Italian studies

Schooling in Modernity Paola Bonifazio, 2014-05-27 Between 1948 and the end of the 1950s Italian and American government agencies and corporations commissioned hundreds of short films for domestic and foreign consumption on topics such as the fight against unemployment the transformation of rural and urban spaces and the re establishment of democratic regimes in Italy and throughout Europe In *Schooling in Modernity* Paola Bonifazio investigates the ways in which these sponsored films promoted a particular vision of modernization and industry and functioned as tools to govern the Italian people The author uses extensive archival research and various theoretical approaches to examine the politics of sponsored filmmaking in postwar Italy Among the many topics explored are target audiences and audience response sources of funding censorship debates on cinematic realism and the connections and differences between American and Italian strategies and styles of documentary filmmaking Insightful and richly detailed *Schooling in Modernity* shows the importance of these under appreciated films in the postwar modernization

Representing Italy Through Food Peter Naccarato, Zachary Nowak, Elgin K. Eckert, 2017-03-09 Italy has long been romanticized as an idyllic place. Italian food and foodways play an important part in this romanticization, from bountiful bowls of fresh pasta to bottles of Tuscan wine. While such images oversimplify the complex reality of modern Italy, they are central to how Italy is imagined by Italians and non-Italians alike. *Representing Italy through Food* is the first book to examine how these perceptions are constructed, sustained, promoted, and challenged. Recognizing the power of representations to construct reality, the book explores how Italian food and foodways are represented across the media, from literature to film and television, from cookbooks to social media, and from marketing campaigns to advertisements. Bringing together established scholars such as Massimo Montanari and Ken Albala with emerging scholars in the field, the thirteen chapters offer new perspectives on Italian food and culture. Featuring both local and global perspectives, which examine Italian food in the United States, Australia, and Israel, the book reveals the power of representations across historical, geographic, socio-economic, and cultural boundaries and asks if there is anything that makes Italy unique. An important contribution to our understanding of the enduring power of Italy, Italian culture, and Italian food, both in Italy and beyond. Essential reading for students and scholars in food studies, Italian studies, media studies, and cultural studies.

Decentering America Jessica C. E. Gienow-Hecht, 2007-12-01 Decentering has fast become a dynamic approach to the study of American cultural and diplomatic history. But what precisely does decentering mean, how does it work, and why has it risen to such prominence? This book addresses the attempt to decenter the United States in the history of culture and international relations, both in times when the United States has been assumed to take center place. Rather than presenting more theoretical perspectives, this collection offers a variety of examples of how one can look at the role of culture in international history without assigning the central role to the United States. Topics include cultural violence, inverted Americanization, the role of NGOs, modernity and internationalism, and the culture of diplomacy. Each subsection includes two case studies dedicated to one particular approach, which, while not dealing with the same geographical topic or time frame, illuminate a similar methodological interest. Collectively, these essays pragmatically demonstrate how the study of culture and international history can help us to rethink and reconceptualize US history today.

The Oxford Handbook of the History of Consumption Frank Trentmann, 2012-03-22 The term consumption covers the desire for goods and services, their acquisition, use, and disposal. The study of consumption has grown enormously in recent years and it has been the subject of major historiographical debates: did the eighteenth century bring a consumer revolution? Was there a great divergence between East and West? Did the twentieth century see the triumph of global consumerism? Questions of consumption have become defining topics in all branches of history, from gender and labour history to political history and cultural studies. *The Oxford Handbook of the History of Consumption* offers a timely overview of how our understanding of consumption in history has changed in the last generation, taking the reader from the ancient

period to the twenty first century It includes chapters on Asia Europe Africa and North America brings together new perspectives highlights cutting edge areas of research and offers a guide through the main historiographical developments Contributions from leading historians examine the spaces of consumption consumer politics luxury and waste nationalism and empire the body well being youth cultures and fashion The Handbook also showcases the different ways in which recent historians have approached the subject from cultural and economic history to political history and technology studies including areas where multidisciplinary approaches have been especially fruitful
