developmental Applying research and case studies from inside and outside the educational canon Libby and John challenge prevailing orthodoxies and invite readers to reflect on their personal understanding as the basis for translating theory into practice All leadership behaviour is based on a number of fundamental personal assumptions about the nature of human relationships and the basis on which human organisations function Understanding Leadership helps leaders make their implicit understanding explicit and so informs and aids development of professional practice Effective leaders develop and grow by understanding their personal mindspace the mental map with which they make sense of the world and developing it through reflecting exploring testing and questioning The usefulness of any map is determined partly by its scale and partly by the information it depicts As leaders develop so their personal mental maps become more sophisticated and more detailed The purpose of this book is to help leaders understand and refine their maps through reflective self awareness facilitating the journey to understanding leadership Leadership is fundamentally concerned with the complexity of human relationships performance engagement and motivation leadership has to be seen as relational Leadership involves emotional engagement and sophisticated interpersonal relationships The idea of a hero leader single handedly transforming a school is perhaps not a particularly useful or relevant vision of effective leadership for today Libby and John encourage leaders to arrive at their own working definition of effective leadership and analyse how the myriad of carefully examined models and case studies might apply in their own school context The eight chapters are underpinned by the following themes questions and points of reflection why leadership creating a preferred future leading change leadership as a moral activity learning as the core purpose of school leadership leading through collaboration and cooperation building capacity sharing leadership leading through relationships and leadership and personal resilience High performance effective leadership can be truly transformational Leadership cannot be taught it has to be learnt It could be argued that school leadership is primarily concerned with learning the leader s own and facilitating that of the children Questioning interrogating and analysing ideas and practice are fundamental to that learning process Libby Nicholas and John West Burnham prompt leaders to do just that Suitable for school leaders at all levels head teachers principals assistant and deputy heads middle leaders aspiring to senior roles and in all educational settings The book will also be of interest to education system leaders chief education officers and directors of education and indeed anyone concerned with developing effective school leadership for example governors and trustees CPD trainers coaches and mentors
