Quit Smoking For Good Shane Cuthbert, 2020-04-21 Most people start smoking at a younger stage of life where maybe they re under a lot of stress There s a lot of uncertainty a lot of self doubt They don t feel self confident in themselves Then over the years they kind of grow up a bit They mature a bit and they get to the point where they re a little bit more motivated to care for themselves and look after themselves They get to that point where they feel a strong desire to want to stop smoking They use some patches change some routines They break the habit and everything is going fine They stay on the wagon so long as life doesn t get in the way The realistic probability of the treatment being successful long term becomes a lot more unpredictable if you re the kind of person who smokes not just because it s a bad habit but if you re the kind of smoker who uses cigarettes as a coping mechanism or essentially you re using smoking to sort of medicate your emotions If that describes you and you try patches and therapies focusing purely on breaking the habit I mean you ll be fine so long as life is fine But once when you hit one of the hurdles up ahead you will want to slip back into your old ways and habits by that point you want to make sure that you ve got a new and healthier coping mechanism installed to make sure that you don t regress into your old familiar patterns You will find out exactly how to create better coping mechanisms in this book The other thing that happens to a lot of people that use smoking as a coping mechanism is once the particular therapy gets rid of the desire to smoke then they end up transferring that desire onto something else some other addiction some other coping mechanism that they use to medicate their emotions with instead Now it could be other drugs but the most common thing is foods A lot of people end up addicted

to comfort eating instead Again if you want to learn how to better avoid this trap this book is for you What s the difference between the kind of person who quits temporarily and then falls back into their old ways compared to the person who quits permanently Well the major difference is the person who quits temporarily will say that they essentially feel like the same person only without the cigarettes whereas the person who quits permanently they ll say that they feel like something has kind of changed on the inside This book is about creating permanent change and there is a few things we need to do to create that change whether its a bad eating habit or an addiction the fundamental rules and guidelines for change stay the same change is something I am an expert at creating I create changes in people all over the world and changing your smoking habits and quitting smoking for good is no different to learning how to stress less and beat anxiety infact im sure you know exactly what im talking about because you also smoke more when anxious and I right If you not only want to quit smoking but quit smoking long term this book is for you because it focuses on the fundamentals the instincts and the problems driving you towards smoking changing a habit is much like putting a bandaid on a very serious wound reading this book is like going to hospital we are going to get in and find out whats really going on and create change at the core **Quit for Good** ,1991
