Small Group Research Herbert H. Blumberg, 2009 This book provides comprehensive coverage of recent research in psychology relating to small groups Major new work is described and thousands of studies are at least cited within a logical framework A thorough overview of the field is provided and specialists concerned with particular kinds of groups are likely to find references to all major research in their areas The findings of various studies contain many surprises especially with regard to the generality and specificity of previously known principles Particular emphasis is given to studies involving or having fairly immediate relevance to face to face social interaction

With and Without the White Coat Lata Murti, 2014-12-15 This study examines the role of occupational status in the racialization of Indian physicians in Southern California Since the liberalization of U S immigration policy in 1965 the number of first and second generation Indian doctors in the U S has grown to nearly seven percent of the nation s physician workforce however Indians constitute less than one percent of the total U S population Overrepresented in one of America s most prestigious professions Indians are more visible in U S medicine than in the U S at large Previous scholarship in immigration research Asian American Studies and the sociology of occupations has paid little attention to these professional non white immigrants and their racial experience in the U S Asian American Studies in particular has focused primarily on the racial ethnic identity formation of economically disadvantaged non white groups under the assumption that professional Asian Americans class status and occupations in the sciences effectively shield them from racist harm and preclude their engagement in racial politics This research shows that Indian doctors high occupational status and class privilege provide them only partial situational protection from racism They have what I call occupational citizenship access to most of the same rights and privileges as whites only when perceived as being both professionally successful and economically beneficial to the U S They

are clearly marked as occupational citizens during clinical interactions with patients when they are in the white coat But outside of this context they are subject to racist treatment from colleagues staff health care institutions and the general public The particular forms of racism these doctors face as well as how they interpret this racism have as much to do with their gender immigrant generation and perception of others race and class as with their own professional class status These findings are based on fifty two interviews with first and second generation Indian doctors in Southern California as well as participant observation at the monthly meetings of two regional Indian medical associations I also observed seven Indian doctors at work noting their interactions with patients staff and colleagues Southern California represents an ideal case for understanding the racial formation of Indian physicians in the U S because of its large but dispersed population of established Indian physicians and its overall diversity of race ethnicity and class

Postcolonial Representation of the African Woman in the Selected Works of Ngugi and Adichie Eren Bolat, 2022-03-07 Until the lives and issues of African women arrived on the agenda of postcolonial writers African women who continued their lives under double colonization by patriarchy and dominant powers did not have much standing in literary works and in the world of literature Postcolonial African women have often been represented as weak subaltern and speechless by western writers and have even been underrepresented by some postcolonial writers This book shows how the African woman who is usually represented in clichéd and stereotyped forms is depicted a versatile way in Ngugi and Adichie's novels
