Blackness and Social Mobility in Brazil Doreen Joy Gordon, 2022-03-07 This book examines the emergence of the black middle classes in urban Brazil after 30 years of black mobilization and against the backdrop of deep economic cultural and political transformations taking place in recent decades within the country One of the consequences of such transformations is said to be the restructuring of gender race and class relations Utilizing qualitative research techniques such as ethnography interviews life histories and focus groups among Afro descendant families in the Northeast region of the country the book explores contemporary race class and gender inequalities and their impact on daily lived experience It reveals the dynamics underlying upward mobility the diverse modes and experiences of social ascent into the middle classes and the everyday negotiations involved in establishing one's status in the socio racial hierarchy which are not captured by other more macro lenses While some of these patterns are not peculiar to black people this book argues that race shaped the contours and possibilities of social mobility in particular ways This book is critical reading for specialists in the fields of inequality and race class and gender relations

Sugarcane Labor Migration in Brazil Terry-Ann Jones, 2020-02-13 This book examines the experiences of seasonal migrant sugarcane workers in Brazil analyzing the deep seated inequalities pervasive in contemporary Brazil Education employment income health and relative political power are forefront in this study of the living and working conditions of the transient population Based on ten years of qualitative research dominated by in depth interviews with migrant sugarcane workers this project argues that the ills of the sugarcane industry are symptomatic of an overarching problem of unequal access to opportunities by all Brazilian citizens The project is unique in its use of a single industry as an expression of the multifarious problems of socioeconomic regional and racial inequality The author explores details of the labor migration experience with a central premise that the conditions are not a direct outcome of the industry but rather a manifestation of fundamental inequalities rooted in Brazil's colonial history

Health Equity in Brazil Kia Lilly Caldwell, 2017-06-30 Brazil's leadership role in the fight against HIV has brought its public health system widespread praise But the nation still faces serious health challenges and inequities Though home to the world's second largest African descendant population Brazil failed to address many of its public health issues that disproportionately impact Afro Brazilian women and men Kia Lilly Caldwell draws on twenty years of engagement with activists issues and policy initiatives to document how the country's feminist health movement and black women's movement have fought for much needed changes in women's health Merging ethnography with a historical analysis of policies and programs Caldwell offers a close examination of institutional and structural factors that have impacted the quest for gender and racial health equity in Brazil As she shows activists have played an essential role in policy development

in areas ranging from maternal mortality to female sterilization Caldwell's insightful portrait of the public health system also details how its weaknesses contribute to ongoing failures and challenges while also imperiling the advances that have been made

The Prism of Race David Lehmann, 2018-07-12 Brazil has developed a distinctive response to the injustices inflicted by the country's race relations regime Despite the mixed racial background of most Brazilians the state recognizes people's racial classification according to a simple official scheme in which those self-assigned as black together with brown and indigenous *preto pardo indigena* can qualify for specially allocated resources most controversially quota places at public universities Although this quota system has been somewhat successful many other issues that disproportionately affect the country's black population remain unresolved and systemic policies to reduce structural inequality remain off the agenda In *The Prism of Race* David Lehmann explores theoretically and practically issues of race the state social movements and civil society and then goes beyond these themes to ask whether Brazilian politics will forever circumvent the severe problems facing the society by co-optation and by tinkering with unjust structures Lehmann disrupts the paradigm of current scholarly thought on Brazil placing affirmative action disputes in their political and class context bringing back the concept of state corporatism and questioning the strength and independence of Brazilian civil society

Reimagining Black Difference and Politics in Brazil Alexandre Emboaba Da Costa, 2014-04-09 *Reimagining Black Difference and Politics in Brazil* examines Black Brazilian political struggle and the predicaments it faces in a time characterized by the increasing institutionalization of ethno-racial policies and black participation in policy orchestration Greater public debate and policy attention to racial inequality suggests the attenuation of racial democracy and positive miscegenation as hegemonic ideologies of the Brazilian nation-state However the colorblind and post-racial logics of mixture and racial democracy especially the denial and/or minimization of racism as a problem maintain a strong grip on public thinking social action and institutional practices Through a focus on the epistemic dimensions of black struggles and the anti-racist pluri-cultural efforts that have been put into action by activists scholars and organizations over the past decade Alexandre Emboaba Da Costa analyzes the ways in which these politics negotiate as well as seek to go beyond the delimited understandings of racial difference belonging and citizenship that shape the contemporary politics of inclusion

Decolonizing Qualitative Approaches for and by the Caribbean Saran Stewart,2020-02-01 As academics in postcolonial Caribbean countries we have been trained to believe

that research should be objective a measurable benefit to the public good and quantifiable in nature so as to generalize findings to develop knowledge societies for economic growth What happens however when the very word research connotes a derogatory term or semblance of distrust Smith 1999 speaks towards the distrustful nature of the term as a legacy of European imperialism and colonialism Against this backdrop how do Caribbean researchers leverage recognized and valued indigenous methods of knowing and understanding for and by the Caribbean populace How do we learn from indigenous research methods such as Kaupapa Maori Smith 1999 and develop an understanding of research that is emancipatory in nature Decolonizing qualitative methods are rooted in critical theory and grounded in social justice resistance change and emancipatory research for and by the Other Said 1978 Rodney s 1969 legacy of groundings provides a Caribbean oriented ethnographic approach to collecting data about people and culture It is an anti imperialist method of data collection focused on the socioeconomic and political environment within the post colonial context Similar to Rodney other critical Caribbean scholars have moved the research discourse to center on the notions of resistance struggle Chevannes 1995 Feraria 2009 and decolonizing methodologies This proposed edited volume will provide a collective body of scholarship for innovative uses of decolonizing qualitative research In order to theorize and conduct decolonizing research one can argue that the researcher as self and as the Other needs to be interrogated Borrowing from an autoethnographic ontology the researcher or investigator recognizes the self as the unit of measure and there is a concerted effort to continuously see the self seeing the self through and as the other Alexander 2005 Ellis 2004 This level of interrogation may require frameworks such as Reasonable Humanism in which there is a clear understanding of the role of the researcher and researched from a physiological and psychosocial standpoint Thereafter the researcher is better prepared to enter into a discourse about decolonizing methodologies The origins of qualitative inquiry in the Caribbean can be traced to political and economic discourses Marxism postcolonialism neocolonialism capitalism liberalism postmodernism which have challenged ways of knowing and the construction of knowledge Evans 2009 traced the origins of qualitative inquiry to slave narratives proprietor s journals missionaries reports and travelogues Common to the Caribbean is an understanding of how colonial legacies of research have ridiculed oral traditions language and ways of knowing often rendering them valueless and inconsequential This proposed edited volume acknowledges the significance of decolonizing approaches to qualitative research in the Caribbean and the wider Caribbean diaspora It includes an audience of scholars teacher researchers and students primarily in and across the humanities social sciences and educational studies This proposed volume would provide much needed knowledge and best practice strategies to the community of researchers engaged in decolonizing methodologies Additionally this volume will allow readers to think of new imaginings of research design that deconstruct power and privilege to benefit knowledge communities and participants It will spark key objectives directions and frameworks for deeper discussions and interrogations of normative westernized and hegemonic approaches to qualitative research Lastly the volume will welcome

empirical studies of application of decolonizing methodologies and theoretical studies that frame critical discourse

Ethnicity, Social Mobility, and Public Policy Glenn C. Loury, Tariq Modood, Steven M. Teles, 2005-05-12 This major comparative study of the social mobility of ethnic minorities in the US and UK argues that social mobility must be understood as a complex and multi dimensional phenomenon incorporating the wealth and income of groups but also their political power and social recognition Written by leading sociologists economists political scientists geographers and philosophers in both countries the volume addresses issues as diverse as education work and employment residential concentration political mobilisation public policy and social networks while drawing larger lessons about the meaning of race and inequality in the two countries While finding that there are important similarities in the experience of ethnic and especially immigrant groups in the two countries the volume also concludes that the differences between the US and UK especially in the case of American blacks are equally important
