* = $p < 0.05$, ** = $p < 0.01$, *** = $p < 0.001$; Overall Probability = the probability or risk of any driver being stopped regardless of race. Probability by Race indicates the probability or risk of being stopped among nonblack and black drivers, respectively. Risk Differences represent the difference in the probability or risk of black drivers versus nonblack drivers being stopped and is calculated by subtracting the probability for nonblacks from the probability for blacks. The risk ratio (or relative risk) is calculated by dividing the probability or risk of black drivers being stopped by the probability or risk of nonblack drivers being stopped. N represents the number of drivers observed at each location. All statistical tests are two-sided using 95% confidence intervals.

Cooper, Michael R King, 2022-02-15 Most of us only half listen to the public service announcements about safety in the home We lock our doors at night but do little else to change habits that may make us the next victims of the dangerous individuals who are always on the watch for their next opportunity This updated paperback edition takes readers through the mindset of predatory criminals their motives various plans of attack and way of thinking and then teaches simple lifestyle techniques that will help reduce the risk of becoming victimized Featuring a new chapter on how the Internet and social media has radically changed how some predators operate criminal behavior specialists Greg Cooper and Mike King provide expert analysis based on real life cases in addition to moving insights from victims and criminals themselves The authors make the point that the people who commit these crimes aren't much different from the predators of the wild preying on the weak and unsuspecting What makes these individuals more dangerous than their instinctive wildlife counterparts however is that they consciously choose to inflict their will on the more vulnerable members of their own species To protect our loved ones and ourselves requires that we truly educate ourselves about the predators who live in our society and then take appropriate action This excellent in depth study will help readers lead safer lives **Licensing Parents** Jack C. Systems Practices for the Care of Socially At-Risk Populations National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Board on Population Health and Public Health Practice, Committee on Accounting for Socioeconomic Status in Medicare Payment Programs, 2016-04-07 The Centers for Medicare Medicaid Services CMS have been moving from volume based fee for service payment to value based payment VBP which aims to improve health care quality health outcomes and patient care experiences while also controlling costs Since the passage of the Patient Protection and Affordable Care Act of 2010 CMS has implemented a variety of VBP strategies including incentive programs and risk based alternative payment models Early evidence from these programs raised concerns about potential unintended consequences for health equity Specifically emerging evidence suggests that providers disproportionately serving patients with social risk factors for poor health outcomes e g individuals with low socioeconomic position racial and ethnic minorities gender and sexual minorities socially isolated persons and individuals residing in disadvantaged neighborhoods may be more likely to fare poorly on quality rankings and to receive financial penalties and less likely to receive financial rewards The drivers of these disparities are poorly understood and differences in interpretation have led to divergent concerns about the potential effect of VBP on health equity Some suggest that underlying differences in patient characteristics that are out of the control of providers lead to differences in health outcomes At the same time others are concerned that differences in outcomes between providers serving socially at risk populations and providers serving the general population reflect disparities in the provision of health care

Systems Practices for the Care of Socially At Risk Populations seeks to better distinguish the drivers of variations in performance among providers disproportionately serving socially at risk populations and identifies methods to account for social risk factors in Medicare payment programs This report identifies best practices of high performing hospitals health plans and other providers that serve disproportionately higher shares of socioeconomically disadvantaged populations and compares those best practices of low performing providers serving similar patient populations It is the second in a series of five brief reports that aim to inform the Office of the Assistant Secretary of Planning and Evaluation ASPE analyses that account for social risk factors in Medicare payment programs mandated through the Improving Medicare Post Acute Care Transformation IMPACT Act

Battle for the Flag Amelia Johns,2015-07-01 Ten years after the Cronulla riots the violence racism and branding of young bodies with signs and symbols of Australian nationalism along with the reprisal attacks by Lebanese Australian youth continues to inflame discussions about race relations in Australia with many conversations shifting away from ideas of multiculturalism and cultural diversity and towards patriotism localism

security and fear of the predominantly Muslim Other Battle for the Flag contextualises and challenges the narrative by drawing upon participant observation and interviews conducted with local residents of diverse backgrounds By paying attention to the voices of bystanders and those involved the riot is identified as an unstable and fluid formation where the Australian flag the beach and whiteness itself was co opted into a much more contingent contested and subcultural formation than hitherto described Islamic Studies Series Volume 18 **Environmentally Devastated Neighborhoods** Michael R.
