particularly in science technology engineering and mathematics STEM disciplines *The Color of Mind* Derrick Darby, John L. Rury, 2018-01-24 An indispensable text for understanding educational racial injustice and contributing to initiatives to mitigate it Educational Theory American students vary in educational achievement but white students in general typically have better test scores and grades than black students Why is this the case and what can school leaders do about it In *The Color of Mind* Derrick Darby and John L. Rury answer these pressing questions and show that we cannot make further progress in closing the achievement gap until we understand its racist origins Telling the story of what they call the Color of Mind the idea that there are racial differences in intelligence character and behavior they show how philosophers such as David Hume and Immanuel Kant and American statesman Thomas Jefferson contributed to the construction of this pernicious idea how it influenced the nature of schooling and student achievement and how voices of dissent such as Frederick Douglass Frances Ellen Watkins Harper and W E B Du Bois debunked the Color of Mind and worked to undo its adverse impacts Rejecting the view that racial differences in educational achievement are a product of innate or cultural differences Darby and Rury uncover the historical interplay between ideas about race and American schooling to show clearly that the racial achievement gap has been socially and institutionally constructed School leaders striving to bring justice and dignity to American schools today must work to root out the systemic manifestations of these ideas within schools while still doing what they can to mitigate the negative effects of poverty segregation inequality and other external factors that adversely affect student achievement While we can't expect schools alone to solve these vexing social problems we must demand that they address the injustices associated with how we track discipline and deal with special education that reinforce long standing racist ideas That is the only way to expel the Color of Mind from schools close the racial achievement gap and afford all children the dignity they deserve US Latinization Spencer Salas, Pedro R. Portes, 2017-02-01 Offering a much needed dialogue about Latino demographic change in the United States and its intersections with P 20 education US Latinization provides discussions that help move beyond the outdated idea that Mexican and Spanish language are synonyms This nativist logic has caused Mexican rooms to re emerge in the form of English to Speakers of Other Languages ESOL transitional programs tagging Latinos as Limited English Proficient in ways that contribute to persisting educational gaps Spencer Salas and Petro R Portes bring together voices that address the social and geographical nature of achievement and that serve as a theoretical or methodological resource for educational leaders and policy makers committed to access equity and educational excellence Disability & the Politics of Education Susan Lynn Gabel, Scot Danforth, 2008 Disability and the Politics of Education An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world's

disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches

topic that has received a great deal of attention within the last few years Pedagogy for addressing social justice has been developed in other disciplines The field of communication disorders has failed to move forward and do the same Discussion of social justice is important given the current sociopolitical climate and landscape that clients carry out in their day to day functioning Speech language pathologists SLPs have an opportunity to engage in practices that help address and alleviate some of the injustices that contribute to educational and health disparities experienced by communities of color They may do this through the development and application of a socially just orientation of culturally competent practice that fosters changes beyond the individual level Adapting such a framework makes it possible for SLPs to effectively advocate for and foster equity and inclusion for the individuals and broader communities impacted by SLP services Critical Perspectives on Social Justice in Speech Language Pathology addresses the socio political contexts of how the field of speech language pathology and service delivery can impact policy and debates related to social justice issues It explores social position factors and the experiences of marginalized communities to explore how speech language pathologists deliver services train and prepare students and carry out research in communities of color It covers topic areas including disproportionality in special education disability rights and ableism achievement and opportunity gaps health disparities and LGBTQ rights with a focus on voice communication and gender diverse populations This book is essential for speech language pathologists administrators practitioners researchers academicians and students interested in how the SLP profession and discipline can contribute to or develop efforts to help address injustices faced by Black Indigenous and people of color BIPOC communities
