GAME

A hand-drawn board game titled "SPEED RACER" is mounted on a corkboard. The game features a winding track drawn on a grid background, with a pink race car at the starting line. A central game board contains a 2x4 grid of numbers, with four colored markers (1, 2, 3, 4) placed at the top of each column. A character with glasses and a white shirt is peeking from behind the "SPEED RACER" sign on the left. A small pink race car is positioned at the start of the track. The track winds around the central game board and ends at a finish line. There are also some green bushes drawn along the track.

began to get the responses that I had hoped for I soon began to call these responses the Wow factor A number of times the teachers that have worked on the problems would actually go back and do the problems a second time because there has to be a mistake or no way that this can be true There were no mistakes and the math did not lie The math allowed us to look at the animals in a totally different way I hope that you too will be amazed and wowed by some of these amazing animals that we share our world with
