Radar Propagation At Low Altitudes:

Radar Propagation at Low Altitudes Marion Littleton Meeks,1981 This report reviews the subject of electromagnetic wave propagation near the earth s surface as it relates to the detection of low flying aircraft by ground based radars Separate sections describe how current knowledge of the three fundamental physical phenomena refraction reflection and diffraction is applied to the problems of low altitude propagation Simple models incorporating these phenomena are discussed 1 propagation over a plane with arbitrary reflection coefficient 2 propagation over a knife edge on a plane and 3 propagation over a smooth spherical earth Computer programs for models 2 and 3 are given in the Appendices We include a bibliography of the literature on which this report is based books journal articles and technical reports References are listed alphabetically by first author and subject indices are given for major subject headings 0
