

Jung and Whitehead: An Interplay of Psychological and Philosophical Perspectives on Rationality and Intuition

DRAFT - NO FIGURES

Farzad Mahootian and Tara-Marie Linné

"...the unconscious is the residue of unconquered nature in us, just as it is also the matrix of our unborn future."

(Jung, *Psychological Types* §907)

Introduction

Our approach to *Rational Intuition* reflects the shared purpose of other chapters in this volume: to explore and articulate the relationship between rationality and intuition. Both Carl Gustav Jung and Alfred North Whitehead were conversant with the history of these terms. In Jung's view, thinking and feeling are aspects of what he called the "rational functions," while intuition and sensation are aspects of the nonrational, or what he called the "irrational functions" of the psyche – where psyche refers to "the totality of all psychic processes, conscious as well as unconscious" (Jung, 1921, p. 463 §797).

Whitehead's philosophy emphasized feeling over the other functions. In their discussion of traditional mental functions, both followed the general direction laid out by Aristotle and the epistemological traditions that grew out of his writings on logic and rhetoric.¹ However, each introduced innovations in order to address specific philosophical issues of interest to them.

Terms such as intuition, sensation, feeling, and thinking have a very long history in both common language and the technical discourse of philosophy. A comparison of Jung and Whitehead on the issue of rational intuition in the span of a single chapter is challenging, given the divergence of their original and sometimes idiosyncratic use of

Rationality K. I. Manktelow, D. E. Over, 1993 **Rationality** K. I. Manktelow, D. E. Over, 1993 *An Introduction to the Philosophy of Mind* E. Jonathan Lowe, 2000-01-20 A lucid and wide ranging introduction to the philosophy of mind suitable for readers with a basic grounding in philosophy Aspects of Rationality Raymond S. Nickerson, 2007-11-19 What does it mean to be rational to reason well and effectively How does rationality broadly conceived relate to the knowledge one acquires the beliefs one forms the explanations one constructs or appropriates the judgments and decisions one makes the values one adopts What is the character of human reasoning and in particular does it The Rationality Quotient Keith E. Stanovich, Richard F. West, Maggie E. Toplak, 2018-02-09 How to assess critical aspects of cognitive functioning that are not measured by IQ tests rational thinking skills Why are we surprised when smart people act foolishly Smart people do foolish things all the time Misjudgments and bad decisions by highly educated bankers and money managers for example brought us the financial crisis of 2008 Smart people do foolish things because intelligence is not the same as the capacity for rational thinking The Rationality Quotient explains that these two traits often and incorrectly thought of as one refer to different cognitive functions The standard IQ test the authors argue doesn't measure any of the broad components of rationality adaptive responding good judgment and good decision making The authors show that rational thinking like intelligence is a measurable cognitive competence Drawing on theoretical work and empirical research from the last two decades they present the first prototype for an assessment of rational thinking analogous to the IQ test the CART Comprehensive Assessment of Rational Thinking The authors describe the theoretical underpinnings of the CART distinguishing the algorithmic mind from the reflective mind They discuss the logic of the tasks used to measure cognitive biases and they develop a unique typology of thinking errors The Rationality Quotient explains the components of rational thought assessed by the CART including probabilistic and scientific reasoning the avoidance of miserly information processing and the knowledge structures needed for rational thinking Finally the authors discuss studies of the CART and the social and practical implications of such a test An appendix offers sample items from the test **Bayesian Rationality** Mike Oaksford, Nick Chater, 2007-02-22 For almost 2 500 years the Western concept of what is to be human has been dominated by the idea that the mind is the seat of reason humans are almost by definition the rational animal In this text a more radical suggestion for explaining these puzzling aspects of human reasoning is put forward **Reasoning and Thinking** K.I. Manktelow, 1999-02-28 This undergraduate textbook reviews psychological research in the major areas of reasoning and thinking deduction induction hypothesis testing probability judgement and decision making It also covers the major theoretical debates in each area and devotes a chapter to one of the liveliest issues in the field the question of human rationality Central themes that recur throughout the book include not only rationality but also the relation between normative theories such as logic probability theory and decision theory and human performance both in experiments and in

the world outside the laboratory No prior acquaintance with formal systems is assumed and everyday examples are used throughout to illustrate technical and theoretical points The book differs from others in the market firstly in the range of material covered other tend to focus primarily on either reasoning or thinking It is also the first student level text to survey an important new theoretical perspective the information gain or rational analysis approach and to review the rationality debate from the standpoint of psychological research in a wide range of areas

Common Sense, Reasoning, and Rationality Renee Elio, 2002-02-07 As the eleventh volume in the New Directions in Cognitive Science series formerly the Vancouver Studies in Cognitive Science series this work promises superb scholarship and interdisciplinary appeal It addresses three areas of current and varied interest common sense reasoning and rationality While common sense and rationality often have been viewed as two distinct features in a unified cognitive map this volume offers novel even paradoxical views of the relationship Comprised of outstanding essays from distinguished philosophers it considers what constitutes human rationality behavior and intelligence covering diverse areas of philosophy psychology cognitive science and computer science Indeed it is at the forefront of cognitive research and promises to be of unprecedented influence across numerous disciplines

The Thinking Mind Niall Galbraith, Erica Lucas, David Over, 2016-10-14 The field of thinking has undergone a revolution in recent years opening itself up to new perspectives and applications The traditional focus on laboratory based thinking has transformed as theoretical work is now being applied to new contexts and real world issues This volume presents a state of the art survey of human thinking in everyday life based around and in tribute to one of the field's most eminent figures Ken Manktelow In this collection of cutting edge research Manktelow's collaborators and colleagues review a wide range of important and developing areas of inquiry This book explores modern perspectives on a variety of traditional and contemporary topics including Wason's reasoning tasks logic meta reasoning and the effect of environment and context on reasoning The Thinking Mind offers a unique combination of breadth depth theoretical exploration and real world applications making it an indispensable resource for researchers and students of human thinking

Cognition and Conditionals Mike Oaksford, Nick Chater, 2010 The conditional if then is probably the most important term in natural language and forms the core of systems of logic and mental representation Cognition and Conditionals is the first volume for over 20 years that brings together recent developments in the cognitive science and psychology of conditional reasoning
