while another moves out of focus Though the focal distance changes the reality has not changed Both items and events coexist but given the nature of optics we can only see clearly one or the other This occurs not just with lenses but also with human perceptions be they emotional or intellectual The rack focus response requires that we try to shift focus from the depth of field that is absolutely clear and familiar to the other that is unclear and unfamiliar This exercise will lead us to reflect on terroristic events in a more nuanced nondogmatic and flexible manner The essays featured in this volume range from philosophical interpretations of terrorism to historical analysis of terror through the ages to cinematic artistic and narrative representations of terroristic events that are not limited to 9 11 **Resources in Education** ,1998
