It is designed to help students, teachers and librarians choose the most appropriate books for research and study.

Introducing Architectural Theory Korydon Smith, Miguel Guitart, 2013-05-20 This is the most accessible architectural theory book that exists. Korydon Smith presents each common architectural subject such as tectonics, use and site as though it were a conversation across history between theorists by providing you with the original text, a reflective text and a philosophical text. He also introduces each chapter by highlighting key ideas and asking you a set of reflective questions so that you can hone your own theory, which is essential to both your success in the studio and your adaptability in the profession. These primary source texts, which are central to your understanding of the discipline, were written by such architects as Le Corbusier, Robert Venturi and Adrian Forty. The appendices also have guides to aid your reading comprehension to help you write descriptively, analytically and disputationally and to show you citation styles and how to do library based research. More than any other architectural theory book about the great thinkers, *Introducing Architectural Theory* teaches you to think as well.

The Languages of World Literature Achim Höltér, 2024-03-04 This volume opens the series of papers presented at the Vienna Congress of AILC/ICLA 2016 beginning with eight keynotes. Thirty-four further papers are dedicated to the central theme of the conference: the linguistic side of world literature under different focal points. The volume further contains five roundtables, the papers of a workshop of the UNESCO Memory of the World Programme, a presentation of the AVDigital.de platform as well as several bibliographically enriched overviews of the special lexicography of comparative literature up to date, versions of the ICLA publications and an example of multiple translations of a famous modern classic.
