Towards the Humanisation of Birth Elizabeth Newnham,Lois McKellar,Jan Pincombe,2018-02-13 This book examines the future of birthing practices particularly by focusing on epidural analgesia in childbirth It describes historical and cultural trajectories that have shaped the way in which birth is understood in Western developed nations In setting out the nature of epidural history knowledge and practice the book delves into related birth practices within the hospital setting By critically examining these practices which are embedded in a scientific discourse that rationalises and relies upon technology use the authors argue that epidural analgesia has been positioned as a safe technology in contemporary maternity culture despite it carrying particular risks In examining alternative research the book proposes that increasing epidural rates are not only due to greater pain relief requirements or access but are influenced by technocratic values and a fragmented maternity system The authors outline the way in which this epidural discourse influences how information is presented to women and how this affects their choices around the use of pain relief in labour Mother and child Lindsey Earner-Byrne,2017-10-03 This fascinating book provides a detailed account of the history of maternity and child welfare in Dublin between 1922 and 1960 In so doing it places maternity and child welfare in the context of twentieth century Irish history offering one of the only accounts of how women and children were viewed treated and used by key lobby groups in Irish society and by the Irish state Mother and child is of critical importance to understanding the political and social history of modern Ireland as it examines the responses of the State the church voluntary groups and women to the emergence of the welfare State in Ireland As such it makes a welcome contribution to Irish political social medical and gender history
