successfully positioned itself as the premier European object technology conference. One reason is without doubt the composition of the conference week and the nature of its events. Running in parallel on the first two days a comprehensive tutorial program and a very selective workshop program are offered to attendees. This is followed by a three day technical program organized in a single track providing a highly communicative atmosphere of scientific exchange and learning. Overlapping with these events are a two day industrial exhibition and a two day opportunity for non industrial system developers to demonstrate their software. Thus ECOOP is not just a conference on programming but an event touching on the full spectrum of object technology. This volume constitutes the proceedings of the Ninth European Conference on Object Oriented Programming ECOOP held in Aarhus Denmark August 7-11 1995. Previous ECOOP conferences were held in Paris France Oslo Norway Nottingham England Ottawa Canada jointly with OOPSLA Geneva Switzerland Utrecht the Netherlands Kaiserslautern Germany and Bologna Italy. Object technology continues to increase its impact on the corporate world.

Crafted by a masterful musician of language, that charming masterpiece conducts viewers on a psychological trip, skillfully unraveling the hidden melodies and profound impact resonating within each carefully constructed phrase.
