Seminar Game To Analyze Regional Governance Options For Portugal:

A Seminar Game to Analyze Regional Governance Options for Portugal James P. Kahan, 1999 Regionalization in Portugal was a major issue in 1998 as the nation held a referendum on whether to establish administrative regions to assume many tasks presently performed by the central government The debate was both hot and confused as both pro and anti forces claimed their solution would lead to more efficient government and no major political party spoke with one voice To help illuminate the debate RAND Europe conducted in June 1998 a series of seminar games simulating the alternative decentralization schemes being contemplated The results of the game showed that 1 the specific form of decentralization may be less important than the details of implementation not present in the debate 2 the critical issue of financial autonomy for local governing bodies had not been adequately addressed 3 there was no consensus regarding which governmental competencies are the best for devolution to regions and 4 whatever form of decentralization is chosen close monitoring of different competencies and the flexibility to shift policies are essential *Peace Research Abstracts Journal*, 2001

Rynne,Clifford J. Mallett,2024-05-24

The Routledge Handbook of Coach Development in Sport is a comprehensive text that underscores the importance of learning and context for those who sculpt the environment in which people of all ages develop in and through sport Coaches and those responsible for the development of coaches are best positioned as both learners and facilitators of learning As sport becomes more globalised the concomitant professionalisation of coaches necessitates ongoing learning and development to embrace new knowledge and understanding Moreover contemporary coach development presents as a wicked problem in that it continues to evolve it is contextually bound and there is no single or obvious way to approach it Problematically there is often limited assistance available to support coaches and coach developers in their ongoing development As such this book provides a truly international reference point that brings together leading scholars and practitioners from across the globe to provide an overview of the theories and practices of coaches and coach developers that are impacting the quality of sporting environments Therefore this book is an important reference for researchers scholars and practitioners alike in the fields of Sport Coaching Coach Development Sport Development Sport for Development Physical Education and related disciplines Regional Policies and EU Enlargement Michele Boldrin,Fabio Canova,2003
