Rationality Tommaso Bertolotti, 2015-04-29 This book proposes an applied epistemological framework for investigating science social cognition and religious thinking based on inferential patterns that recur in the different domains It presents human rationality as a tool that allows us to make sense of our physical or social surroundings It shows that the resulting cognitive activity produces a broad spectrum of outputs such as scientific models and experimentation gossip and social

networks but also ancient and contemporary deities The book consists of three parts the first of which addresses scientific modeling and experimentation and their application to the analysis of scientific rationality Thus this part continues the tradition of eco cognitive epistemology and abduction studies The second part deals with the relationship between social cognition and cognitive niche construction i e the evolutionarily relevant externalization of knowledge onto the environment while the third part focuses on what is commonly defined as irrational thus being in a way dialectically opposed to the first part Here the author demonstrates that the irrational can be analyzed by applying the same epistemological approach used to study scientific rationality and social cognition also in this case we see the emergence of patterns of rationality that regulate the relationships between agents and their environment All in all the book offers a coherent and unitary account of human rationality providing a basis for new conceptual connections and theoretical speculations

DeHart, 2012 Aquinas and Radical Orthodoxy investigates the encounter of the most vibrant and controversial trend in recent theology with the greatest Christian thinker of the Middle Ages The book describes Radical Orthodoxy e t m s orientation and highlights those anti secular strategies and intellectual influences that have shaped its appeal to Aquinas It surveys the emergence of the particular picture of Aquinas especially associated with the leaders of Radical Orthodoxy John Milbank and his student Catherine Pickstock along with the scholarly disputes which prompted and followed that development The book then undertakes a detailed investigation of the pivotal publications on Aquinas of those two authors laying out their difficult theories in clear language carefully examining the texts of Aquinas to which they appeal and challenging their interpretations on a number of fundamental points Topics covered include analogical language and knowledge of God the role of metaphysics within theology the relation of cognition to the divine archetypes of things the possibility of human apprehension of God e t m s essence the nature of substance and speculation on the Trinity The conclusion reflects on those elements suppressed by the Radical Orthodox reading of Aquinas their constructive philosophical and theological possibilities and the challenges they present to the Radical Orthodox project

Understanding Violence Lorenzo Magnani, 2024-06-22 This book offers a philosophical account of violence engaged with both empirical and theoretical debates in disciplines such as cognitive science sociology psychiatry anthropology political theory evolutionary biology and theology The primary thesis is that violence is intertwined with morality and typically enacted for moral reasons To show this the book compellingly demonstrates how morality operates to trigger and justify violence and how people in their violent behaviors can engage and disengage with discrete moralities The author s fundamental account of language and in particular its normative aspects is particularly insightful as regards extending the range of what is to be understood as violence beyond the domain of physical harm By employing concepts such as coalition enforcement moral bubbles cognitive niches overmoralization and military intelligence the book aims to spell out how perpetrators and victims of violence systematically disagree about the very nature of violence The author s original claim is that disagreement can be understood

naturalistically described by an account of morality informed by evolutionary perspectives as well This book helps us come to terms with the fact that we are intrinsically violent beings To acknowledge this condition and our stupefying capacity to inflict harm is a responsibility we must face up to such understanding could ultimately be of help in order to achieve a safer ownership of our destinies by individuating and reinforcing those cognitive firewalls that would prevent violence from always escalating and overflowing This second edition is thoroughly revised and integrated with two new chapters to cover new aspects of violence and its understanding such as the role of looting finance in facilitating violent outcomes and the attack to scientific cognition and human creativity

KONSULT Gregory L. Ulmer, 2019-02-02 A motto guiding Gregory L Ulmer s career is from the poet Basho not to follow in the footsteps of the masters but to seek what they sought The responsibility of humanities disciplines today is to do for the digital apparatus social machine what the classical Greeks did for alphabetic writing Ulmer frames online learning as a mode of invention heuristics beginning with the invention of konsult itself Konsult Theopraxis describes the invention of a genre of learning that is to digital media what Plato s dialogue was to alphabetic writing The Greeks invented the practices of writing rhetoric and logic native to the new institution of school the Academy fostering a new behavior of selfhood Socrates Ulmer adopts this historical precedent as a relay an inventory for what must be invented again today a genre of learning an educational institution identity behavior The insight of electracy is that each apparatus augments and institutionalizes one of the primary faculties of human intelligence *theoria* in literacy *praxis* in orality *poiesis* in electracy Needed today are not practices of

writing but theopraxis of media The analytical information economy of literacy required separation and isolation siloing of institutionalized intelligence The multimodality of electracy enables syncretism of faculties into holistic performance thinking doing making knowledge purpose affect The interface metaphor of Plato's dialogue was an oral conversation during which the illiterate interlocutor is introduced to dialectical reason as Idea The interface metaphor of konsult is scientific consulting during which anelectrate students encounter plasmatic desire as simulacrum This new learning is organized around an updating of Justice native to electracy
