

SEMIOTICS

Semiotics is the study of signs. It is both the theory & analysis of signs & signifying practices.

Ferdinand de Saussure
(1857-1913)

Saussure was a french linguist that was one of the first to produce a semiotic theory during work in the early 1900's. Saussure stated that a sign is made up of two parts, the SIGNIFIER and the SIGNIFIED.

Charles Sandes Peirce, was an American philosopher that also formulated a semiotic theory around the same time as Saussure, the early 1900's. Pierce stated semiotics to be the relationship between a SYMBOL, ICON and an INDEX.

Charles Sanders Peirce

given at the Third International Symposium on Iconicity in Language and Literature Jena 2001 The studies collected here present a number of new departures Special consideration is given to the way non linguistic visual and auditory signs such as gestures and bird sounds are represented in language and more specifically in signed language and how such signs influence semantic conceptualization Other studies examine more closely how visual signs and representations of time and space are incorporated or reflected in literary language in fiction as well as experimental poetry A further new approach concerns intermedial iconicity which emerges in art when its medium is changed or another medium is imitated A more abstract diagrammatic type of iconicity is again investigated with reference to both language and literature some essays focus on the device of reduplication isomorphic tendencies in word formation and on creative iconic patterns in syntax while others explore numerical design in Dante and geometrical patterning in Dylan Thomas A number of theoretically oriented papers pursue post Peircean approaches such as the application of reader response theory and of systems theory to iconicity
