the outcomes of World Bank Group support to Afghanistan from 2002 11 Despite extremely difficult security conditions which deteriorated markedly after 2006 the World Bank Group has commendably established and sustained a large program of support to the country The key messages of the evaluation are While World Bank Group strategy has been highly relevant to Afghanistan s situation beginning in 2006 the strategies could have gone further in adapting ongoing programs to evolving

opportunities and needs and in programming activities sufficient to achieve the objectives of the pillars in those strategies Overall Bank Group assistance has achieved substantial progress toward most of its major objectives although risks to development outcomes remain high Impressive results have been achieved in public financial management public health telecommunications and community development substantial outputs have also been achieved in primary education rural roads irrigation and microfinance all started during the initial phase Bank assistance has been critical in developing the mining sector as a potential engine of growth However progress has been limited in civil service reform agriculture urban development and private sector development The Bank Group s direct financial assistance has been augmented effectively by analytic and advisory activities and donor coordination through the Afghanistan Reconstruction Trust Fund Knowledge services have been an important part of Bank Group support and have demonstrated the value of strategic analytical work even in areas where the Bank Group may opt out of direct project financing With the expected reduction of the international presence in 2014 sustainability of development gains remains a major risk because of capacity constraints and inadequate human resources planning on the civilian side To enhance program effectiveness the evaluation recommends that the Bank Group help the government develop a comprehensive long term human resources strategy for the civilian sectors focus on strategic analytical work in sectors that are high priorities for the government assist in the development of local government institutions and in the interim support the development of a viable system for service delivery at subnational levels assist in transforming the National Solidarity Program into a more sustainable financial and institutional model to consolidate its gains help strengthen the regulatory environment for private sector investment and scale up IFC and MIGA support to the private sector

living with HIV and the entire Rwandan population Recognizing HRH capabilities as a foundational challenge for the health system and the response to HIV the Government of Rwanda worked with PEPFAR and other partners to develop a program to strengthen institutional capacity in health professional education and thereby increase the production of high quality health workers The Program was fully managed by the Government of Rwanda and was designed to run from 2011 through 2019 PEPFAR initiated funding in 2012 In 2015 PEPFAR adopted a new strategy focused on high burden geographic areas and key populations resulting in a reconfiguration of its HIV portfolio in Rwanda and a decision to cease funding the Program which was determined no longer core to its programming strategy The last disbursement for the Program from PEPFAR was in 2017 Evaluation of PEPFAR s Contribution 2012 2017 to Rwanda s Human Resources for Health Program describes PEPFAR supported HRH activities in Rwanda in relation to programmatic priorities outputs and outcomes and examines to the extent feasible the impact on HRH and HIV related outcomes The HRH Program more than tripled the country s physician specialist workforce and produced major increases in the numbers and qualifications of nurses and midwives Partnerships between U S institutions and the University of Rwanda introduced new programs upgraded curricula and improved the quality of teaching and training for health professionals Growing the number skills and competencies of health workers contributed to direct and indirect improvements in the quality of HIV care Based on the successes and challenges of the HRH program the report recommends that future investments in health professional education be designed within a more comprehensive approach to human resources for health and institutional capacity building which would strengthen the health system to meet both HIV specific and more general health needs The recommendations offer an aspirational framework to reimagine how partnerships are formed how investments are made and how the effects of those investments are documented **Evaluating**

**Interreligious Peacebuilding and Dialogue** Mohammed Abu-Nimer, Renáta Katalin Nelson, 2021-09-20 In the emerging fields of religious and interreligious peacebuilding the question of monitoring and evaluation is a challenging yet necessary process The need to develop comprehensive yet fitting evaluation models for religious and interreligious peacebuilding is not only important for donor interests but also critical as a means of documenting and learning for peacebuilders themselves Theories and best practices in monitoring and evaluation have become prevalent in many fields yet the amount of literature on evaluating intercultural and especially religious and interreligious projects remains scant in comparison This volume offers a unique contribution that not only looks at several of the challenges and implications faced by religious and interreligious peacebuilders but also provides concrete examples of new models and tools for monitoring and evaluating religious and interreligious peacebuilding projects In doing so this volume serves as a tool and point of reference for individuals and organizations developing and implementing interreligious dialogue and peacebuilding projects

**Evaluating Capacity Development** Douglas Horton,2003 The perspective that informs this important book is that every

evaluation of a capacity development effort should itself contribute to the capacity development effort and ultimately to the organization's performance. This is a revolutionary idea in evaluation. With the idea have come the questions: Can it be done? And if it is done, what will be the consequences? This book elucidates and deepens the idea, shows it can be done, and examines the consequences, both intended and unintended, of engaging in capacity development evaluation.
