Senri Ethnological Studies Africa:

Africa 1 Shōhei Wada, Paul Kazuhisa Eguchi, Kokuritsu Minzokugaku Hakubutsukan, 1979 **Rethinking African Agriculture** Goran Hyden, Kazuhiko Sugimura, Tadasu Tsuruta, 2020-07-20 Rethinking African Agriculture argues that rural communities in Africa are still shaped by non agrarian factors both in livelihood strategy and social formation This volume renews and deepens the research on the African peasantry by offering a fresh perspective drawn from the hitherto largely unknown Japanese research on the subject The ethnographic fieldwork focuses not only on the micro environment of the producers but also the broader historical context in which they live and work The contributors argue that in comparison with other regions of the world Africa has never passed through an agrarian revolution that would effectively change the mode of production from within Modernization efforts from the outside have fallen far short of the ambition to transform agriculture in Africa Rural Africa is still largely a natural society characterized by non agrarian features as evident in people's livelihood social organization and farming systems This book will be of interest to social scientists and anthropologists focusing on African development agriculture and agrarian societies **Exploring Agrodiversity** H. C. Brookfield, 2001 Small farmers are often viewed as engaging in wasteful practices that wreak ecological havoc Exploring Agrodiversity sets the record straight Small farmers are in fact ingenious and inventive and engage in a diverse range of land management strategies many of them resourcefully geared toward conserving resources especially soil Using case studies from Africa Asia Latin America and the Pacific this book provides in depth analysis of agricultural diversity and explores its history

Ethnographic Chiasmus Ivo Strecker, 2011-06-01 The essays assembled in this volume are shaped by conditions both enabling and constraining that can perhaps best be described as an ethnographic chiasmus This expression refers to the surprise and reversal of position that are characteristic of fieldwork and it attends to the fact that transcultural understanding comes about as a meeting touching or crossing Chiasmus also pertains to the relationship between culture and rhetoric in general Culture structures rhetoric rhetoric structures culture Both are coemergent In order to elucidate this process ethnography has to focus on the manifold modes of rhetoric through which culture specific patterns of thought and action are created Africa 2 Shōhei Wada, Paul Kazuhisa Eguchi, 1980 *Senri Ethnological Studies*, 2005

Hunter-Gatherers in History, Archaeology and Anthropology Alan Barnard, 2020-05-26 The study of hunter gatherers has had a profound impact on thinking about human nature and about the nature of society The subject has especially influenced ideas on social evolution and on the development of human culture Anthropologists and archaeologists continue to investigate living hunter gatherers and the remains of past hunter gatherer societies in the hope of unearthing the secrets of

Herders, Warriors, And Traders John G Galaty, 2019-03-04 African pastoralists have been devastated by drought famine and dislocation yet herding remains the most viable system of support for the inhabitants of the vast arid and semi arid zones Using case studies of the Tswana and the San the interlacustrine pastoralists the Masai and Mursi of East Africa and the multi ethnic regional systems of Lak

Constructing Frames of Reference Lewis R. Binford, 2019-05-07 Many consider Lewis Binford to be the single most influential figure in archaeology in the last half century His contributions to the New Archaeology changed the course of the field as he argued for the development of a scientifically rigorous framework to guide the excavation and interpretation of the archaeological record This book the culmination of Binford s intellectual legacy thus far presents a detailed description of his methodology and its significance for understanding hunter gatherer cultures on a global basis This landmark publication will be an important step in understanding the great process of cultural evolution and will change the way archaeology proceeds as a scientific enterprise This work provides a major synthesis of an enormous body of cultural and environmental information and offers many original insights into the past Binford helped pioneer what is now called ethnoarchaeology the study of living societies to help explain cultural patterns in the archaeological record and this book is grounded on a detailed analysis of ethnographic data from about 340 historically known hunter gatherer populations The methodological framework based on this data will reshape the paradigms through which we understand human culture for years to come
