Sense And Nonsense In Psychology Pelican S:

The Experimental Psychology of Beauty C.W. Valentine, 2015-06-05 Originally published in 1962 the experimental study of aesthetics was a field particularly associated with the name of C W Valentine who in this book provided a critical review of research carried out since the end of the nineteenth century principally by British and American psychologists The investigations described many of them conducted by the author are concerned with individual responses to what is commonly regarded as beautiful in painting music and poetry an important distinction being made between the perception of objects as beautiful as opposed to pleasing The reactions of children and adults and of people having different ethnic and social backgrounds are explored in a variety of experiments dealing with specific elements including colour form and balance in painting musical intervals discord harmony melody and tempo and rhythm metre imagery and associations in classical and romantic poetry Other experiments seek to disclose the temperamental and attitudinal factors underlying individual differences in the judgement and appreciation of specific works of art Of particular interest are the studies of responses to modern paintings poems and musical compositions The findings throw light on the development of discrimination and taste and suggest the possibility of some common factor in the appreciation of these three arts It was felt that critics as well as psychologists and aestheticians would find much to encourage reflection and to stimulate further research

Disciplines of Education Ivor Morrish, 2019-08-13 First published in 1967 this book suggests that educational problems should not and indeed cannot be solved in isolation but that we need to bring all our disciplines and resources to bear upon them It explores in turn philosophical psychological and sociological approaches to educational theory and examines great thinkers such as Plato R

Selfless: A Psychologist's Journey through Identity and Social Class

Geoffrey Beattie, 2020-12-29 Selfless is a memoir reflecting on identity social class mobility education and on psychology itself how psychology as a discipline is conducted how it prioritises objects of study how it uncovers psychological truths about the world Geoffrey Beattie takes the reader on a journey through his early life in working class Belfast his Ph D at Trinity College Cambridge and subsequent academic and professional career to explore fundamental issues within psychology about social class and social identity Beattie discusses the difficulties inherent in this process of education and change and how social background affects how you view academic work and the subject matter of one's discipline This book movingly details a life and how it is changed by the processes of education the psychological pressures when abandoning those close to you the dissonance within and how it feels and operates The book takes a critical look at psychology from the other side and examines the process of becoming selfless meaning having little sense of self rather than being overly concerned with the wishes and needs of others Showing how our early experiences and their influence continues throughout life Beattie's emotionally engaging entertaining and witty text offers general readers students and academics fresh insights into psychology adaptation and personal change

DREAMS AND YOU Frank Machovec, 2012-06 Dreams have fascinated

people throughout history They connect us to deeper recesses of our minds By interpreting them we can better understand ourselves This handy pocket guide will help you do that Science and ESP J R Smythies,2013-04-15 Originally published in 1967 Representing the viewpoints of philosophers psychologists anthropologists physicists psychoanalysts parapsychologists psychiatrists and biologists this volume discusses many aspects of ESP The general theme is that the phenomena is very valid and can no longer be ignored **Assessment and Testing** Harry Schofield,2020-03-12 Originally published in 1972 there were many classics dealing with assessment and testing on the market at the time but most of these left the inexperienced reader bewildered in the early stages because of their size and insufficient explanation of the many technical terms used There were a distinct lack of books which gave students in Colleges of Education dealing with psychology for the first time a simple explanation of basic terms in assessment and testing and which introduced them briefly to the different types of tests available Assessment and Testing aimed to fill this large gap It looks at such key psychological terms as sample objectivity subjectivity and such basic statistical terms such as mean standard deviation and normal curve of distribution Because it assumes that the reader has no knowledge of such terms it gives careful and simply illustrated explanations of each In the same way in simple language with any technical terms explained and illustrated it explains intelligence and personality tests questionnaires sociometric measures projection techniques and other areas of assessment and testing which every practising teacher will meet The book aims to be essentially practical It is appreciated all the time that the readers are those who will teach children It is designed to provide a solid foundation upon which the reader can build later to augment his own experience of identifying children s particular needs *The Dynamics of Anxiety and Hysteria* Hans Eysenck,2018-04-27 Here Hans Eysenck applies the principles of modern learning theory to account for the observed phenomena of hysteria and anxiety Such principles were initially developed through the experiments and theories of Pavlov Hull and Tolman When *The Dynamics of Anxiety and Hysteria* initially appeared these were considered the most advanced relevant and applicable to the subject matter They have not been superseded by later work *The Dynamics of Anxiety and Hysteria* has never been published in the United States It was the fifth book Eysenck authored as part of a series of experimental studies and theoretical work carried out under the auspices of the Institute of Psychiatry at the University of London Two of the first four books *Dimensions of Personality* and *The Psychology of Politics* have been reissued with new introductions These focus on dimensional analysis of personality based on experimental and empirical studies The present work on the other hand goes beyond classification to a study of dynamics from nosology to aetiology from description to causation Eysenck scientifically explores such topics as learning theory and human behavior personality and learning theory personality and perceptual processes socialization and personality drugs and personality and psychological theory and psychiatric practice This volume which complements Transaction s other new editions of Eysenck s groundbreaking work will be of lasting significance to psychologists psychiatrists behaviorists and students of personality disorders He provided for modern psychology the

empirical foundations of themes that previously were the monopoly of psychoanalysis Hans J Eysenck 1916-1997 a professor of psychology at the University of London and the director of its psychological department at the Institute of Psychiatry was best known for his experimental researches in the field of personality He was a prolific author and wrote among others *Rebel with a Cause* *Dimensions of Personality and Intelligence* all available from Transaction *A Biological and Psychological Background to Education* C. Paperbacks in Print ,1975 **Spreading the**

Light Archie Crawford, 2004 This book is about life and is written in plain everyday language The author boldly faces up to those fundamental questions rankling at the back of one's mind such as Is there really a God Where is He What is the nature of the soul What is truth Is reincarnation true Is there any purpose in the universe Does God cause suffering Do angels exist Who am I Can effect become cause Does space and time really exist etc He probes deep into the structure of your mind and with great clarity shows you how your mind works and how you can use it to find success in everything you do He shows how we attract our present circumstances and how emotionally intense events are not only registered in our psychic memory but also in the memories of the cells of our body and what this means for us He devotes a chapter in which he advocates going within through meditation to find solutions to our problems Religion is examined with candor He explains the many positive benefits of religion examines its dark side and points out that like individuals some religions must resolve and get rid of the baggage of past evil deeds before they and their followers can step into the light The author shows how in spite of itself science through its quantum theories is currently making discoveries which lead to a new view of the universe more in line with that of the essence of the religions and the experiences of the mystics of this world He shows how science and religion are at last beginning to merge For example there is now scientific proof of the value of prayer proof that the mind is non local that is it is not located in the brain and also can cause actions over distance that there is no solid matter in the universe it is all energy in one form or another He further states that a field of energy outside the material universe has been discovered where speeds exceed that of light It has also been found that our human consciousness is directly connected with matter and influences at least its microscopic particles The nature of the universe as being holographic is explored These scientific findings have profound spiritual significance He quotes experts on the future of mankind including Arthur C Clark Nobel physicist Brian Josephson Stephen Hawking etc and many more Reading this book will prepare you for the new age that is fast enveloping the earth The author's message is that in spite of the terrorism and devastation of the earth currently going on there is powerful hope There are powerful spiritual forces at work which will overcome the present chaos and lead us into a life of enlightenment and eventually of love Culture and Islamic Adaptation Psychology Malik

Badri, Humanology, 2018-03-15 The indiscriminate exportation of Western psychology to Muslim and third world countries can pose serious cultural and ideological dilemmas When the exported commodity from North to South is physical in nature the harm done can easily be identified for example the quick detection of the life threatening birth defects caused by the drug thalidomide when taken during pregnancy or the flaws in the braking system of a Japanese car However when the exported product is ideas and beliefs and ways of life the indirect and sneaky damage is often much more malevolent and long lasting because it attacks the worldview of the recipients and it shakes their cherished beliefs Because of its technological supremacy Islamic and developing countries got used to wholeheartedly accepting any information coming from the West if it is under the tag of science By presenting itself under this prestigious mantra of science students in Muslim

countries swallow the kernel of psychology with its nutshell the baby with its filthy water The danger of this approach is greatly augmented by the shortcomings of our educational systems that discourages critical thinking and encourages the submissive acceptance of the words of the teacher and that of printed material **The Journal of the American Society for Psychical Research** ,1958 **Journal of the American Society for Psychical Research** American Society for Psychical Research,1957 *Proceedings of the ...
