Sense Of Injustice:

A Passion for Justice Robert C. Solomon, 1995 This text argues that justice is a virtue which everyone shares a function of personal character and not just of government or economic planning It uses examples from Plato to Ivan Boesky to document how we live and how we feel

The Sense of Injustice Robert G. Folger, 2012-12-06 The importance of justice cannot be overstated As one author has put it A better understanding of how justice concerns develop and function in people's lives should enable us to plan more effectively for institutional and other social change to deal with the problems that confront humankind S C Lerner 1981 p 466 The volume in which that statement appeared an earlier one in this same series was devoted to exploring the impact that dwindling resources and an increasing rate of change have had upon people's concern for justice In contrast the present volume places greater emphasis on the word understanding as it was used in the context of the preceding quotation than upon effective planning social change and ways of dealing with human problems Nothing in that statement of purpose is meant to belittle the urgency of translating understanding into action because the social significance of justice concerns is a major factor that has prompted the authors of the chapters in this book to do research in the area Rather this volume receives its emphasis from Kurt Lewin's famous dictum there is nothing so practical as a good theory The need for good theory is ongoing and these pages are dedicated to a search for new pathways toward better theory

McElhaney's Trial Notebook James W. McElhaney, 2005 Trial Notebook offers hundreds of techniques and tactics for every stage of a trial's progress in spare lively memorable prose Users get strategies grounded in actual courtroom experience that will improve the effectiveness of their advocacy

The Psychology of Jealousy and Envy Peter Salovey, 1991-02-15 After decades of banishment to popular magazines and advice columns jealousy and envy have emerged as legitimate topics of scientific inquiry This volume includes chapters from nearly every major contributor to the psychological literature in this area From emotional and cognitive processes that underlie jealousy and envy to the ways these emotions are experienced and expressed within close relationships to family societal and cultural contexts the volume offers a definitive statement of current theory and research

ABA Journal, 1950-05 The ABA Journal serves the legal profession Qualified recipients are lawyers and judges law students law librarians and associate members of the American Bar Association

Justice in the Workplace Russell Cropanzano, 2012-10-12 Justice in the Workplace acts as a central reference point for application of organizational justice and helps human resource managers relate the importance of justice to their work environments Forming much of this book's content outcomes processes and interpersonal treatment are three powerful tools for building and maintaining workplace justice In Part I these books are discussed at a theoretical level Part II applies these theories to several issues important to both human resource management and society And Part III looks at organizational justice in the years ahead Compared to the first volume this book will appeal to practitioners and researchers in such applied areas as human resource management industrial organizational psychology and management

Delinquency and Drift David Matza, 2018-02-06 The first C Wright Mills Award winning book *Delinquency and Drift* has become a recognized classic in the fields of criminology and social problems. In it, Matza argues persuasively that delinquent thought and delinquent action are distorted reflections of the ideas and practices that pervade contemporary juvenile law and its administration. His ideas are as persuasive today as when they were first published twenty-five years ago. By example and illustration, Matza argues that the delinquent subculture is based on many of the same standards as the conventional social order and that the delinquent's negation of the law is the result of his relations with an inconsistent and vulnerable legal code. Once the juvenile breaks his or her ties to the legal order, the drift to delinquency becomes relatively easy to justify. The author also maintains that being liberated from legal constraint does not necessarily lead to delinquency; that event depends on the will to commit crime. Because delinquency remains one of our most serious social problems, it is important to consider Matza's thesis that the drift toward delinquency is frequently aided by the unwitting support of society and the guardians of social order.

International Handbook of Anger Michael Potegal, Gerhard Stemmler, Charles Spielberger, 2010-02-04 From the individual rage-driven violence of domestic abuse to the destructive causes and lasting consequences of large-scale ethnic and political conflict, anger and its effects are ubiquitous in human life and are the focus of intense study across many scientific disciplines. Fields as varied as affective neuroscience, health science, psychology, psychophysiology, and sociology have all contributed to recent advances in the understanding of anger. Lifetime M.S. Frings, 2013-06-29 In comparison to Husserl and Heidegger, Max Scheler's philosophy of time as first presented here is considerably wider in scope. Using posthumous manuscripts, Frings shows that Scheler conceived the origin of time in the self.

activating center of individual and universal life as threefold absolute time of a four dimensional expanse This serves as a basis for establishing the phenomenon of objective time in multiple steps of constitutionality including the physical field theory and theory of relativity For Scheler objective time even though anchored in absolute time deserves maximum attention in a technological society Frings focuses here with Scheler on time experience of values and among social groups time experiences in the mind set of capitalism in politics and morals in population dynamics and time experiences in the process of aging all of which were signposts in Scheler s thought before his early demise *The Theory of Practice and Ethical Enquiry by Shadworth H. Hodgson* Shadworth Hollway Hodgson,1870 *The Nicomachean Ethics of Aristotle* Aristotle,1904 Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons,1916 Contains the 4th session of the 28th Parliament through the session of the Parliament *Girls' Literacy Experiences in and Out of School* Elaine O'Quinn,Elaine J. O'Quinn,2013 Through thoughtful analysis of girls historical literacy experiences their contemporary reading and writing lives and trends in young adult literature this book sheds new light on how teachers can better understand and create classroom experiences that make girls visible both to themselves and to others Historically the status of girls has evoked much less research than that of boys Recently emerging scholastic and strategic study concerning the vulnerability of girls is adding a vital missing component to this continually emerging discourse Looking at many aspects of girls gendered lives this text considers the specific perspectives of the social and cultural constructions that script gender particularly as they apply to girls in our classrooms Prominent scholars in their respective fields examine the myriad forces that shape the lives of American girls from the earliest didactic records of manuals and books of conduct to current artifacts of contemporary culture By investigating both the scholarly literature on girls as well as the primary sources of a material culture the authors seek to unravel how adolescent girls learn and seek to compose identities By closely examining girls practices in which are embedded issues of class race ethnicity immigrant status and sexuality the text considers some of the values structures and trajectories that have come to define teenage girlhood Its distinctive contribution is to unpack some of the assumptions of girls in English classrooms and to critically examine their experiences as they try to fit preconceived norms while forming their own personhood Provided by publisher **The Two Faces of Justice** Jiwei Ci,2006-05-15 Justice is a human virtue that is at once unconditional and conditional Under favorable circumstances we can be motivated to act justly by the belief that we must live up to what justice requires irrespective of whether we benefit from doing so But our will to act justly is subject to conditions We find it difficult to exercise the virtue of justice when others regularly fail to Even if we appear to have overcome the difficulty our reluctance often betrays itself in certain moral emotions In this book Jiwei Ci explores the dual nature of justice in an attempt to make unitary sense of key features of justice reflected in its close relation to resentment punishment and forgiveness Rather than pursue a search for normative principles he probes the human psychology of justice to understand what motivates moral agents who seek to behave justly

and why their desire to be just is as precarious as it is uplifting A wide ranging treatment of enduring questions The Two Faces of Justice can also be read as a remarkably discerning contribution to the Western discourse on justice re launched in our time by John Rawls Reason and Emotion John M. Cooper,2021-01-12 This book brings together twenty three distinctive and influential essays on ancient moral philosophy including several published here for the first time by the distinguished philosopher and classical scholar John Cooper The volume gives a systematic account of many of the most important issues and texts in ancient moral psychology and ethical theory providing a unified and illuminating way of reflecting on the fields as they developed from Socrates and Plato through Aristotle to Epicurus and the Stoic philosophers Chrysippus and Posidonius and beyond For the ancient philosophers Cooper shows here morality was good character and what that entailed good judgment sensitivity openness reflectiveness and a secure and correct sense of who one was and how one stood in relation to others and the surrounding world Ethical theory was about the best way to be rather than any principles for what to do in particular circumstances or in relation to recurrent temptations Moral psychology was the study of the psychological conditions required for good character the sorts of desires the attitudes to self and others the states of mind and feeling the kinds of knowledge and insight Together these papers illustrate brilliantly how by studying the arguments of the Greek philosophers in their diverse theories about the best human life and its psychological underpinnings we can expand our own moral understanding and imagination and enrich our own moral thought The collection will be crucial reading for anyone interested in classical philosophy and what it can contribute to reflection on contemporary questions about ethics and human life **Accountant Student and Accountants' Journal** ,1906 **The Spectator** ,1877
