**With Paul at Sea** Linford Stutzman, 2012-04-18. What Jesus began on and around the Sea of Galilee, Paul continued on and around the Mediterranean Sea. With Acts as the stage, the biblical narrative shifts from land to sea. Paul is the central actor in this part of the drama. Luke, the playwright traveling with Paul on portions of his journeys, was deeply impressed by Paul's challenges and his creative engagement with both the pagans and the Jews living in the Roman Empire. In *With Paul at Sea*, Linford Stutzman himself, an accomplished sailor, relates key highlights of his personal experience of sailing Paul's voyages two thousand years later. Including examples of discoveries in the cities and harbors of Acts combined with historical, archeological, and biblical evidence, Stutzman demonstrates the contribution and relevance of Paul for Christians in the twenty-first century. Portraying the modern world as a sea, the church as a ship, and a life of faith as sailing, *With Paul at Sea* is an invitation for today's Christians to travel with Paul.

**The Senses** Fiona Macpherson, 2011-05-09. The senses or sensory modalities constitute the different ways we have of perceiving the world, such as seeing, hearing, touching, tasting, and

smelling But how many senses are there How many could there be What makes the senses different What interaction takes place between the senses This book is a guide to thinking about these questions Together with an extensive introduction to the topic the book contains the key classic papers on this subject together with nine newly commissioned essays One reason that these questions are important is that we are receiving a huge influx of new information from the sciences that challenges some traditional philosophical views about the senses This information needs to be incorporated into our view of the senses and perception Can we do this whilst retaining our pre existing concepts of the senses and of perception or do we need to revise our concepts If they need to be revised then in what way should that be done Research in diverse areas such as the nature of human perception varieties of non human animal perception the interaction between different sensory modalities perceptual disorders and possible treatments for them calls into question the platitude that there are five senses as well as the pre supposition that we know what we are counting when we count them as five or more This book will serve as an inspiring introduction to the topic and as a basis from which further new research will grow
