After Oriental Despotism Alessandro Stanziani,2014-07-31 The concepts of economic backwardness Asiatic despotism and orientalism have strongly influenced perceptions of modernization democracy and economic growth over the last three centuries This book provides an original view of Russian and Asian history that views both in a global perspective Via this analysis Alessandro Stanziani opens new dimensions in the study of state formation the global slave trade warfare and European and Asian growth After Oriental Despotism questions conventional oppositions between Europe and Asia By revisiting the history of Eurasia in this context the book offers a serious challenge to existing ideas about the aims and goals of economic growth *Iron-making Societies* Maria Ågren,1998-03-01 The title of this book has a double meaning on the one hand it deals with two very different societies both of which made iron in the early modern period On the other hand iron made these societies the needs of iron production and the resistance to these demands from local peasant communities gave the societies a special kind of cohesion and rationality This volume presents the findings of a joint team of Swedish and Russian scholars examining the social organization of work in early modern iron industry and their respective societies The comparison was carried out against the backdrop of the international discussion on proto industrialization its prerequisites

and consequences There has however been a certain bias in much of that debate the focus being mainly on Western Europe particularly on Britain and on textile trades This book offers an important contribution to the debate in that it widens the perspective by discussing Northern and Eastern Europe and by studying the iron industry More particularly it examines actual production processes the organization of work social conflict questions of ownership and its evolution as well as the diffusion and organization of technical knowledge The comparative approach is consistently applied throughout with each chapter closely integrating the results relating to the two selected geographical areas thus showing ways of solving some of the problems arising from comparative history

Bondage Alessandro Stanziani, 2015-11 For the first time this book provides the global history of labor in Central Eurasia Russia Europe and the Indian Ocean between the sixteenth and the twentieth centuries It contests common views on free and unfree labor and compares the latter to many Western countries where wage conditions resembled those of domestic servants This gave rise to extreme forms of dependency in the colonies not only under slavery but also afterwards in form of indentured labor in the Indian Ocean and obligatory labor in Africa Stanziani shows that unfree labor and forms of economic coercion were perfectly compatible with market development and capitalism proven by the consistent economic growth that took place all over Eurasia between the seventeenth and the nineteenth centuries This growth was labor intensive commercial expansion transformations in agriculture and the first industrial revolution required more labor not less Finally Stanziani demonstrates that this world did not collapse after the French Revolution or the British industrial revolution as is commonly assumed but instead between 1870 and 1914 with the second industrial revolution and the rise of the welfare state

Sztern,2022-02-18 This book explores the impact of railroads on 19th century Russian peasant collectivism The mutual insurance mechanism in a precarious agricultural environment provided by a structured communal village system predicated on the reputation and authority of community norms is exposed to rationalist exchange occasioning an institutional adaptation process the individualization of property rights in land Spatial mobility technology animated market integration specialization literacy and human capital acquisition among peasant wage workers who commuted from their villages Temporarily rising transaction costs forced the Tsar to concede household property rights in land in the so called Stolypin reform of 1906 This challenge to the imperial patrimony powered by the railroads steered late imperial Russia toward constitutional governance The spatial mobility technology gave peasants access to centers of agglomeration of knowledge changed cognitive perceptions of distance and reduced the uncertainty and opportunity costs of travel The empirical findings in this monograph corroborate the conclusion that the railroads occasioned a cultural revolution in late imperial Russia and made Stalin unnecessary for the modernization of the Euro asian giant This book highlights the profound effect that the development of the railroads had on Russian economic and political institutions and practices It will be of indispensable value to students and researchers interested in transitional economics and economic history The Cambridge World History: Volume 7,

Dennison,2011-04-28 Russian rural history has long been based on a Peasant Myth originating with nineteenth century Romantics and still accepted by many historians today In this book Tracy Dennison shows how Russian society looked from below and finds nothing like the collective redistributive and market averse behaviour often attributed to Russian peasants On the contrary the Russian rural population was as integrated into regional and even national markets as many of its west European counterparts Serfdom was a loose garment that enabled different landlords to shape economic institutions especially property rights in widely diverse ways Highly coercive and backward regimes on some landlords estates existed

side by side with surprisingly liberal approximations to a rule of law This book paints a vivid and colourful picture of the everyday reality of rural Russia before the 1861 abolition of serfdom *The Standard of Living and Revolutions in Imperial Russia, 1700-1917* Boris Mironov, 2012-05-31 This is the first full scale anthropometric history of Imperial Russia 1700 1917 It mobilizes an immense volume of archival material to chart the growth weight and other anthropometric indicators of the male and female populations in order to chart how the standard of living in Russia changed over slightly more than two centuries It draws on a wide range of data statistics on agricultural production taxation prices and wages nutrition and demography to draw conclusions on the dynamics in the standard of living over this long period of time The economic social and political interpretation of these findings make it possible to reconsider the prevailing views in the historiography and to offer a new perspective on Imperial Russia **Fertility and Resources** Society for the Study of Human Biology.
