examining these products potential to illuminate issues of gender and identity In the late Qing the expansion of production systems and market economies transformed the Chinese fashion system widening access to fashionable techniques materials and imagery Challenging the conventional production model in which women embroidered items at home Silberstein sets fashion within a process of commercialization that created networks of urban guilds commercial workshops and subcontracted female workers These networks gave rise to new trends influenced by performance and prints and they offered women opportunities to participate in fashion and contribute to local economies and cultures Rachel Silberstein draws on vernacular and commercial sources rather than on the official and imperial texts prevalent in Chinese dress history to demonstrate that in these fascinating objects regulated by market desires rather than imperial edict fashion formed at the intersection of commerce and culture A Fashionable Century is the winner of the Costume Society of America s Millia Davenport Publication Award and was long listed for the Textile Society of America s R L Shep Award The judges described the book as an extraordinary achievement in scholarship working with source materials that are little known outside of China and not otherwise available in English

cultural studies transcultural exchange and interdisciplinary studies The Great Divergence Kenneth Pomeranz, 2021-04-13 A landmark comparative history of Europe and China that examines why the Industrial Revolution emerged in the West The Great Divergence sheds light on one of the great questions of history Why did sustained industrial growth begin in Northwest Europe Historian Kenneth Pomeranz shows that as recently as 1750 life expectancy consumption and product and factor markets were comparable in Europe and East Asia Moreover key regions in China and Japan were no worse off ecologically than those in Western Europe with each region facing corresponding shortages of land intensive products Pomeranz's comparative lens reveals the two critical factors resulting in Europe's nineteenth century divergence the fortunate location of coal and access to trade with the New World As East Asia's economy stagnated Europe narrowly escaped the same fate largely due to favorable resource stocks from underground and overseas This Princeton Classics edition includes a preface from the author and makes a powerful historical work available to new readers **Sediments of Time** Mark Elvin, Cuirong Liu, 1998-01-13 This collection of essays is the first relatively comprehensive survey of the environmental history of China Rethinking the Decline of China's Qing Dynasty Daniel McMahon, 2014-08-21 The many instances of regional insurgency and unrest that erupted on China's borderlands at the turn of the nineteenth century are often regarded by scholars as evidence of government disability and the incipient decline of the imperial Qing dynasty This book based on extensive original research argues that on the contrary the response of the imperial government went well beyond pacification and reconstruction and demonstrates that the imperial political culture was dynamic innovative and capable of confronting contemporary challenges The author highlights in particular the Jiaqing Reforms of 1799 which enabled national reformist ideology activist oriented administrative education the development of specialised frontier officials comprehensive borderland rehabilitation and the sharing of borderland administration best practice between different regions Overall the book shows that the Qing regime had sustained vigour albeit in difficult and changing circumstances

Christopher Isett, Stephen Miller, 2016-11-09 This innovative text provides a compelling narrative world history through the lens of food and farmers Tracing the history of agriculture from earliest times to the present Christopher Isett and Stephen Miller argue that people rather than markets have been the primary agents of agricultural change Exploring the actions taken by individuals and groups over time and analyzing their activities in the wider contexts of markets states wars the environment population increase and similar factors the authors emphasize how larger social and political forces inform decisions and lead to different technological outcomes Both farmers and elites responded in ways that impeded economic development Farmers when able to trade with towns used the revenue to gain more land and security Elites used commercial opportunities to accumulate military power and slaves The book explores these tendencies through rich case studies of ancient China precolonial South America early modern France England and Japan New World slavery colonial Taiwan socialist Cuba and many other periods and places Readers will understand how the promises and problems of contemporary agriculture are not simply technologically derived but are the outcomes of decisions and choices people have made and continue to make

Mabiki Fabian Drixler, 2013-05-29 This book tells the story of a society reversing deeply held worldviews and revolutionizing its demography In parts of eighteenth century Japan couples raised only two or three children As villages shrank and domain headcounts dwindled posters of child murdering she devils began to appear and governments offered to pay their subjects to have more children In these pages the long conflict over the meaning of infanticide comes to life once again Those who killed babies saw themselves as responsible parents to their chosen children Those who opposed infanticide redrew the boundaries of humanity so as to encompass newborn infants and exclude those who would not raise them In Eastern Japan the focus of this book population growth resumed in the nineteenth century According to its village registers more and more parents reared all their children Others persisted in the old ways leaving traces of hundreds of thousands of infanticides in the statistics of the modern Japanese state Nonetheless by 1925 total fertility rates approached six children per woman in the very lands where raising four had once been considered profligate This reverse fertility transition suggests that the demographic history of the world is more interesting than paradigms of unidirectional change would have us believe and that the future of fertility and population growth may yet hold many surprises Millard's Review of the Far East, 1919
