Shades of Loneliness Richard Stivers, 2004-02-09 In this incisive and controversial book Richard Stivers rejects genetic explanations of psychological problems arguing instead that the very organization of technological societies is behind the pervasive experience of loneliness In its extreme form loneliness assumes pathological dimensions in neurosis and schizophrenia which reflect the contradiction between power and meaninglessness that characterizes modern life Loneliness in its many manifestations seems to be the price we must pay for living in a technological world Yet nurturing family friend and community ties can mitigate its culturally and psychologically disorganizing power This book is a clarion call for a renewal of moral awareness and custom to combat the fragmentation and depersonalization of our technological civilization Visit our website for sample chapters

A Biography of Loneliness Fay Bound Alberti, 2019-09-12 A compassionate wide ranging study Terry Eagleton The Guardian Despite 21st century fears of a modern epidemic of loneliness its history has been sorely neglected A Biography of Loneliness is the first history of its kind to be published in English offering a radically new interpretation of loneliness as an emotional language and experience Using letters and diaries philosophical tracts political discussions and medical literature from the eighteenth century to the present historian of the emotions Fay Bound Alberti argues that loneliness is not an ahistorical universal phenomenon It is in fact a modern emotion before 1800 its language did not exist As Alberti shows the birth of loneliness is linked to the development of modernity the all encompassing ideology of the individual that has emerged in the mind and physical sciences in economic structures in philosophy and politics While it has a biography of its own loneliness impacts on people differently according to their gender ethnicity religion outlook and socio economic position It is Alberti argues not a single state but an emotion cluster composed of a wide variety of responses that include fear anger resentment and sorrow In spite of this loneliness is not always negative And it is physical as well as psychological loneliness is a product of the body as much as the mind Looking at informative case studies such as Sylvia Plath Queen Victoria and Virginia Woolf A Biography of Loneliness charts the emergence of loneliness as a modern emotional state From social media addiction to widowhood from homelessness to the oldest old from mall hauls to massages loneliness appears in all aspects of 21st century life Yet we cannot address its meanings let alone formulate a cure without attention to its complex protean history

D. M. Snell, 2016-06-16 Concern about the decline of community and the theme of community spirit are internationally widespread in the modern world The English past has featured many representations of declining community expressed by those who lamented its loss in quite different periods and in diverse genres This book analyses how community spirit and the passing of community have been described in the past whether for good or ill with an eye to modern issues such as the so called loneliness epidemic or the social consequences of alternative structures of community It does this through examination of authors such as Thomas Hardy James Wentworth Day Adrian Bell and H E Bates by appraising detective fiction writers analysing parish magazines considering the letter writing of the parish poor in

the 18th and 19th centuries and through the depictions of realist landscape painters such as George Morland K D M Snell addresses modern social concerns showing how many current preoccupations had earlier precedents In presenting past representations of declining communities and the way these affected individuals of very different political persuasions the book draws out lessons and examples from the past about what community has meant hitherto setting into context modern predicaments and judgements about spirits of community today
