Look At The Land Aerial Reflections On America:

Look at the Land Alex S. MacLean, Bill McKibben, 1993 Photographer and aviator MacLean has spent 20 years traveling the length and breadth of America by air With one hand navigating his plane and the other steadying his camera he has captured stunning views of the continent recording in spectacular images what can only be seen from above 125 color photos

Aereality William Fox, 2009-05-01 William Fox's writing for the last several years has been focused on how we construct aerial views either physically by flying or in our imaginations In *Aereality* he flies over earthworks in Nevada and Utah soars through the world's largest open pit mine and surveys Los Angeles circumnavigating large swaths of true American urban sprawl On the East Coast he examines the elevated art of the Hudson River Valley and New York City And finally in Australia Fox examines the history and current practice of both Euro Australian and Aboriginal aerial views and searches for the cognitive roots of our aerial imagination Accompanying Fox throughout his travels is a rolling cast of enlightened fliers geographers museum curators landscape photographers anthropologists and artists He traverses the sky in prop planes helicopters and hot air balloons all with the ultimate goal of knowing and experiencing the earth from the air *Taking*

Measures Across the American Landscape James Corner, James M. Corner, Alex S. MacLean, 1996-01-01 Photographs and essays express the way the American landscape has been forged by various cultures in the past and what the possibilities are for its future design Jacket **American Photo - ND**, 1993-09 **Photography and Flight** Denis Cosgrove, William L.

Fox, 2010-04-01 Used for everything from geographic evaluation to secret spy missions aerial photography has a rich and storied history ably recounted here in *Photography and Flight* Aerial photography is marked by its dependency on technological developments in both photography and aerospace and the authors chart the history of this photography as it tracked the evolution of these technologies Beginning with early images taken from hot air balloons fixed platforms and subsequent handheld camera technology Denis Cosgrove and William Fox then explain how military reconnaissance and governmental projects were instrumental in catalyzing these and other innovations in the field They examine pivotal historical moments in which aerial photography began to establish itself as essential tool such as in World War II military strategies high altitude photography taken from postwar rockets and aircraft and the use of aerial photography during the cold war and the Cuban Missile Crisis The book also explores the advancement of geographic scholarship through aerial photography ranging from military excursions into Antarctica to the images of the curvature of the earth taken during the Apollo space missions While digital technology and remote sensing have changed the landscape of photography *Photography and Flight* argues that they have not diminished the significance of aerial photography in providing images of the earth Rather new technologies and resulting innovations such as Google Earth have enabled the mass democratization of access to such information *Photography and Flight* ultimately reveals how the camera lens from far away continues to unearth telling details about the land and those who live upon it *Impact*, 2020-11-23 The rise in sea level is a visible and remorseless

indicator of global warming the consequences of which can be experienced worldwide in contrast to other effects of climate change that are not yet noticeable at a larger scale The book illustrates in an impressive way the ecological commercial and social impact associated with the rise in sea levels taking the examples of the American East Coast and the Gulf of Mexico the author has documented this region from his Cessna between 2005 and 2018 using large format aerial photography The pictures illustrate the different conditions of the areas documented at different times of the year before and after major weather events and thereby provide evidence of how dramatically the geography and landscape are altered due to climate change

E40° Jack Williams, 2006 The Appalachian mountain chain once contained the highest and most dramatic mountains on earth Worn down over time these mountains still hold some of the most diverse climactic zones and singular geological formations in existence In *East 40 Degrees An Interpretive Atlas* Jack Williams examines a succession of beautiful but little known towns along this cordillera a term descended from the Latin *chorda* meaning braided rope revealing in their layers of history and geography how both their diverse cultural and social circumstances and their geological history were instrumental in forming each town's distinctive character Referring to the spatial orientation of the Appalachian mountain chain the east 40 degrees of the title runs from Alabama through fifteen states to the coast of Maine Each town Williams examines sits within the folds of these mountains or beside a river nourished in their moist uplands Beginning his record with the continental collisions that shaped each town's history more than 300 million years ago Williams allows us to see the tenuous web of connections between ourselves and the natural processes that shape this earth Featuring a wealth of beautiful and significant illustrations and maps this unique work brings into focus the critical issues of environmental and cultural sustainability confronting us today Elegant poetic and erudite *East 40 Degrees* will appeal to architects and landscape architects planners environmental historians ecologists geographers and anyone interested in the history and origins of our modern landscapes and towns Publication of this volume was assisted by a grant from Furthermore a program of the J M Kaplan Fund **Air & Space Smithsonian**, 1998 *The New York Times Book Review*, 1993-10 Presents extended reviews of noteworthy books short reviews essays and articles on topics and trends in publishing literature culture and the arts Includes lists of best sellers hardcover and paperback *Architecture Minnesota*, 1994 *Landscape Architecture*, 2004 **Progressive Architecture**, 1994 **Library Journal**, 1993-07 **Harvard Magazine**, 1993
