Mab Terms Some Philosophical Problems:

Mass Terms: Some Philosophical Problems Francis Jeffrey Pelletier, 2007-11-08 I MASS TERMS COUNT TERMS AND SORTAL TERMS Central examples of mass terms are easy to come by Water smoke gold etc differ in their syntactic semantic and pragmatic properties from count terms such as man star wastebasket etc Syntactically it seems mass terms do but singular count terms do not admit the quantifier phrases much an amount of a little etc The typical indefinite article for them is some unstressed and this article cannot be used with singular count terms Count terms but not mass terms use the quantifiers each every some few many and they use a n as the indefinite article They can unlike the mass terms take numerals as prefixes Mass terms seem not to have a plural Semantically philo sophers have characterized count terms as denoting classes of indi vidual objects whereas what mass terms denote are cumulative and dissective That is a mass term is supposed to be true of any sum of things stuff it is true of and true of any part of anything of which it is true Pragmatically it seems that speakers use count terms when they wish to refer to individual objects or when they wish to reidentify a particular already introduced into discours Given a space appropriate to a count term C it makes sense to ask how many C s there are in that space Renaissance Man Ágnes Heller, 2015-07-03 Considering such witnesses of the time as Shakespeare Dante Petrarch Michelangelo Machiavelli Montaigne More and Bacon Agnes Heller looks at both the concept and the image of a Renaissance man The concept was generalised and accepted by all its characteristic features were man as a dynamic being creating and re creating himself throughout his life The images of man however were very different having been formed through the ideas and imagination of artists politicians philosophers scientists and theologians and viewed from the different aspects of work love fate death friendship devotion and the concepts of space and time Renaissance Man thus stood as both as a leading protagonist of his time one who led and formulated the substantial attitudes of his time and as one who stood as a witness on the sidelines of the discussion This book first published in English in 1978 is based on the diverse but equally important sources of autobiographies works of art and literature and the writings of philosophers Although she uses Florence as a starting point Agnes Heller points out that the Renaissance was a social and cultural phenomenon common to all of Western Europe her Renaissance Man is thus a figure to be found throughout Europe *Routledge Companion to Sixteenth Century Philosophy* Henrik Lagerlund, Benjamin Hill, 2017-01-06 Sixteenth century philosophy was a unique synthesis of several philosophical frameworks a blend of old and new including but not limited to Scholasticism Humanism Neo Thomism Aristotelianism and Stoicism Unlike most overviews of this period The Routledge Companion to Sixteenth Century Philosophy does not simplify this colorful era by applying some traditional dichotomies such as the misleading line once drawn between scholasticism and humanism Instead the Companion closely covers an astonishingly diverse set of topics philosophical methodologies of the time the importance of the discovery of the new world the rise of classical scholarship trends in logic and logical theory Nominalism Averroism the Jesuits the Reformation Neo stoicism the

soul's immortality skepticism the philosophies of language and science and politics cosmology the nature of the understanding causality ethics freedom of the will natural law the emergence of the individual in society the nature of wisdom and the love of god Throughout the Companion seeks not to compartmentalize these philosophical matters but instead to show that close attention paid to their continuity may help reveal both the diversity and the profound coherence of the philosophies that emerged in the sixteenth century The Companion's 27 chapters are published here for the first time and written by an international team of scholars and accessible for both students and researchers [Logic Colloquium 76, Proceedings of a conference](#) Lev D. Beklemishev, 2009-06-15 [Logic Colloquium 76, Proceedings of a conference](#) [Topics in Latin Philosophy from the 12th-14th Centuries](#) Sten Ebbesen, 2009 Sten Ebbesen has contributed many works in the field of ancient and medieval philosophy over decades of dedicated research Ashgate is proud to present this thematically arranged three volume set of his collected essays each thoroughly revised and updated Volume Two explores issues in medieval philosophy from the time nominalists and other schools competed in twelfth century Paris to the modist thinkers of the late thirteenth century and finally the new nominalism of John Buridan in the fourteenth century **Translations from Kommunist**, 1971 *The Ungraspable as a Philosophical Problem* Alžbeta Kuchtová, 2024-08-19 *The Ungraspable as a Philosophical Problem* provides an analysis of the ungraspable of that which cannot be grasped by the mind or the senses When referring to the ungraspable in sensible reality we often speak of the untouchable the invisible the inaudible and the untastable In the abstract realm we speak of the non conceptual the ineffable the unsayable These are the modalities of the ungraspable that are explored in this study They have been considered absolute by some thinkers a claim that I critically assess My central claim is that the absoluteness of these modalities is linked to a desire to grasp which is characterized by the desire for exactitude for the proper and for domination First I examine the role of the hand in phenomenology more precisely in Martin Heidegger's philosophy in order to further define the notion of the ungraspable I then analyze Emmanuel Levinas's early works which offer an account of the ungraspability of nature the there is I then turn to Jacques Derrida who has proved that otherness is not only human but also animal and theoretical but who devotes little space to the otherness of the more than human or inorganic objects Finally I examine the otherness of so called inorganic or more than living objects natural objects and artifacts demonstrating its importance to our current situation *The Christian Doctrine of Man* Henry Wheeler Robinson, 1913 Second edition Reprinted 1920 **The Universitas Project** Museum of Modern Art (New York, N.Y.), 2006 This volume publishes in their entirety the various components of a conference hosted by MoMA in 1972 The Universitas Project The distinguished participants drawn from a wide range of scholarly and artistic disciplines engaged in a multidisciplinary debate on the future of design and design institutions in the postindustrial era Addressing issues and ideas still relevant today this book makes a particularly fertile chapter in the intellectual history of the Museum available for the first time to scholars the architecture and design community and the general public **Speculum Mentis, Or, The Map of**

McDermott,2018-09-18 Now back in print and in paperback these two classic volumes illustrate the scope and quality of Royce s thought providing the most comprehensive selection of his writings currently available They offer a detailed presentation of the viable relationship Royce forged between the local experience of community and the demands of a philosophical and scientific vision of the human situation The selections reprinted here are basic to any understanding of Royce s thought and its pressing relevance to contemporary cultural moral and religious issues **Heidegger and the Essence of Man** Michel Haar,1993-09-14 Michel Haar argues that Heidegger went too far in transferring all traditional properties of man to being Haar examines what is left after this displacement not only of human identity but perhaps more importantly of nature life embodiment of the flesh of human existence This sensitive yet critical reading of Heidegger raises such issues in relation to questions of language technology human freedom and history In doing so it provides a compelling argument for the need to

Li Vecchi, Frank Scalabrino, David K.
