Macarthurs Japanese Constitution A Linguistic And Cultural Study Of Its Making:

MacArthur's Japanese Constitution Kyoko Inoue,1991-02 The Japanese constitution as revised by General MacArthur in 1946 while generally regarded to be an outstanding basis for a liberal democracy is at the same time widely considered to be in its Japanese form an document which is alien and incompatible with Japanese culture Using both linguistics and historical data Kyoto Inoue argues that despite the inclusion of alien concepts and ideas this constitution is nonetheless fundamentally a Japanese document that can stand on its own This is an important book This is the most significant work on postwar Japanese constitutional history to appear in the West It is highly instructive about the century long process of cultural conflict in the evolution of government and society in modern Japan Thomas W Burkman Monumenta Nipponica

The Making of Monolingual Japan Patrick Heinrich,2012-02-10 Japan is widely regarded as a model case of successful language modernization and it is often erroneously believed to be linguistically homogenous There is a connection between these two views As the first ever non Western language to be modernized Japanese language modernizers needed to convince the West that Japanese was just as good a language as the national languages of the West The result was a fervent desire for linguistic uniformity Today the legacy of modernist language ideology poses many problems to an internationalizing Japan All indigenous minority languages are heading towards extinction and this purposefully created homogeneity also affects the integration of immigrants and their languages This book examines these issues from the perspective of language ideology and in doing so the mechanisms by which language ideology undermines linguistic diversity are revealed *The Architecture of Constitutional Amendments* Richard Albert,2023-05-18 This innovative book blends constitutional theory with real life political practice to explore the impact of codifying constitutional amendments on the operation of the constitution in relation to democracy the rule of law and the separation of powers It draws from comparative historical political and theoretical perspectives to answer questions all constitutional designers should ask themselves Should the constitution append amendments sequentially to the end of the text Should it embed amendments directly into the existing text with notations about what has been modified and how Should it instead insert amendments into the text without indicating at all that any alteration has occurred The book examines the 3 major models of amendment codification the appendative the integrative and the invisible models and also shows how some jurisdictions have innovated alternative forms of amendment codification that combine elements of more than 1 model in a unique hybridisation driven by history law and politics Constitutional designers rarely consider where in the constitution to codify amendments once they are ratified Yet this choice is pivotal to the operation of any constitution This groundbreaking book shows why the placement of constitutional amendments goes well beyond mere aesthetics It influences how and whether a people remembers its past how the constitutional text will be interpreted and by whom and whether the constitution will be easily accessible to the governed A global tour of the high stakes of constitution making this book features 18 diverse and outstanding scholars from around the

world across Africa America Asia and Oceania and Europe raising new questions opening our eyes to new streams of research and uncovering new possibilities for constitutional design

Screening Enlightenment Hiroshi Kitamura, 2017-03-31 During the six and a half year occupation of Japan 1945-1952 U S film studios in close coordination with Douglas MacArthur's Supreme Command for the Allied Powers launched an ambitious campaign to extend their power and influence in a historically rich but challenging film market In this far reaching enlightenment campaign Hollywood studios disseminated more than six hundred films to theaters earned significant profits and showcased the American way of life as a political social and cultural model for the war shattered Japanese population In *Screening Enlightenment* Hiroshi Kitamura shows how this expansive attempt at cultural globalization helped transform Japan into one of Hollywood's key markets He also demonstrates the prominent role American cinema played in the reeducation and reorientation of the Japanese on behalf of the U S government According to Kitamura Hollywood achieved widespread results by turning to the support of U S government and military authorities which offered privileged deals to American movies while rigorously controlling Japanese and other cinematic products The presentation of American ideas and values as an emblem of culture democracy and sophistication also allowed the U S film industry to expand However the studios efforts would not have been nearly as extensive without the Japanese intermediaries and consumers who interestingly served as the program's best publicists Drawing on a wide range of sources from studio memos and official documents of the occupation to publicity materials and Japanese fan magazines Kitamura shows how many Japanese supported Hollywood and became active agents of Americanization A truly interdisciplinary book that combines U S diplomatic and cultural history film and media studies and modern Japanese history *Screening Enlightenment* offers new insights into the origins of this unique political and cultural transpacific relationship
