**An Integrated Approach to Curricular Contents** Muşata Bocoş,Vasile Chiş,2013-07-16 An Integrated Approach to Curricular Contents Particular Features for

Primary Schools is closely related to the elements constituting the educational and curricular reform in Romania. The content integrated approach enables the student to undergo a complete development both on a personal and social level.

Competences are acquired and developed in a progressive manner through interactive and cumulative processes leading to both specific competences pertaining to a certain discipline and transdisciplinary competences that cross several disciplinary boundaries. Currently, the curricular integrated approach paradigm within the Romanian educational system is reflected in an explicit manner at the level of educational policies. A new evaluation system has been laid down and promoted through the National Education Law no. 1/2011, which will lead to the optimization of the whole Romanian educational system. This law conceives and promotes a new evaluation system that will lead to the reconstruction and consolidation of an integrated vision pertaining to both the process of teaching/learning, evaluation and the optimization of the whole Romanian educational system. As such, the present work provides answers to some educational policy challenges and reflects on curriculum policy and educational enforcement. It will be of great use and interest to curriculum scholars, to primary school teachers and to teacher trainees. The work has a pragmatic feature emphasizing both the authors' thoughts and the knowledge gained throughout vast experience of teaching. Moreover, certain concrete and validated practical teaching methods are provided in order to design the integrated activity sequences at primary school level, among which an emphasis on certain curricular aspects that are useful within an integrated approach represents the original feature of the present work and a practical feature of integrated knowledge.

### **Essentials for Successful English Language Teaching**

Thomas S. C. Farrell, George M. Jacobs, 2020-11-26. This book is about how to teach English as a second language and how second language students learn. With Communicative Language Teaching (CLT) at its centre, it takes a practical approach to second language teaching backed up by clearly explained theory. Presenting eight essential principles across twelve chapters, the book covers Learner Autonomy, Social Learning, Integrated Curriculum, Meaning, Diversity, Thinking Skills, Alternative Assessment and Teacher Co-learning, and shows how technology and reflective teaching can be used to support and enhance these essentials in the classroom. Combining theory and practice, *Essentials for Successful English Language Teaching* explains how these principles interweave and support each other within the CLT paradigm, demonstrating why they are best implemented as a whole rather than one at a time. Now revised and brought fully up to date, this new edition includes a brand new chapter covering technology and cooperation in teaching practice and how they support CLT-based activities. Vignettes for each essential principle consolidate theory and demonstrate best practice. Updated real-world examples drawing on teaching experiences from North America, Africa and Asia. Taking a big picture view that assumes no prior knowledge of linguistics or language education, *Essentials for Successful English Language Teaching* is an energising and fun guide for language practitioners.
