Lawmaking under Pressure Giovanni Mantilla, 2020-12-15 In *Lawmaking under Pressure* Giovanni Mantilla analyzes the origins and development of the international humanitarian treaty rules that now exist to regulate internal armed conflict Until well into the twentieth century states allowed atrocious violence as an acceptable product of internal conflict Why have states created international laws to control internal armed conflict Why did states compromise their national security by accepting these international humanitarian constraints Why did they create these rules at improbable moments as European empires cracked freedom fighters emerged and fears of communist rebellion spread Mantilla explores the global politics and diplomatic dynamics that led to the creation of such laws in 1949 and in the 1970s By the 1949 Diplomatic Conference that revised the Geneva Conventions most countries supported legislation committing states and rebels to humane principles of wartime behavior and to the avoidance of abhorrent atrocities including torture and the murder of non combatants However for decades states had long refused to codify similar regulations concerning violence within their own borders Diplomatic conferences in Geneva twice channeled humanitarian attitudes alongside Cold War and decolonization politics even compelling reluctant European empires Britain and France to accept them *Lawmaking under Pressure* documents the tense politics behind the making of humanitarian laws that have become touchstones of the contemporary

international normative order Mantilla not only explains the pressures that resulted in constraints on national sovereignty but also uncovers the fascinating international politics of shame status and hypocrisy that helped to produce the humanitarian rules now governing internal conflict

If Money Talks, What Does it Say? Iain McMenamin, 2013-01-31 Why do businesses contribute to political parties Is money a universal language Do business contributions to political parties convey different messages in different countries This book answers these questions based on intensive case studies of Australia Canada and Germany as well as data from other countries Business money does talk politics In liberal Australia and Canada the competitive short term focus of firms generated substantial demand for private goods that could help firms develop an advantage over their rivals Thus business financing of parties conveyed a pragmatic message in exchange for small but certain financial benefits contributing businesses expect as a reciprocation to receive special consideration of their lobbying efforts Australia's left right party system created an awareness of policy risk which motivated ideological payments but there was no ideological bias in business financing of politics in centrist Canada In Germany's co-ordinated economy the most important policies for firms tend to be the public goods defined championed and delivered by their business associations In this context the pragmatic motivation for contributions to political parties is weak The combination of consensual political institutions and constrained parties means there is a very low risk of major policy change from election to election So there is also little interest in ideological financing of political parties If money talks what does it say places business financing of political parties in the context of debates about political corruption and offers advice on political reform Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The Comparative Politics series is edited by Professor David M Farrell School of Politics and International Relations University College Dublin Kenneth Carty Professor of Political Science University of British Columbia and Professor Dirk Berg Schloesser Institute of Political Science Philipps University Marburg

proportionality principle has become ever more important in European law and elsewhere The career of the principle has attracted considerable attention from legal practitioners legal theorists and political scientists alike but the debate so far has been quite fragmented In this new book the author offers a broad and systematic analysis of the proportionality principle Discussing and comparing proportionality analysis as applied by European courts in part one of the book the author proceeds to contrast proportionality analysis with alternative assessment schemes In the third part of the book the author reaches beyond doctrinal reconstructions as he deciphers the functions of proportionality jurisprudence In view of the various facets of proportionality analysis the author departs from the asserted infringement of a legally protected position by some regulatory act proceeds to discuss the legitimacy of this intervention and undertakes an analysis of its suitability appropriateness and necessity According to the author the safe grounds of proportionality means ends rationality do not suffice where the legitimacy of an infringement has to be assessed where conflicting values have to be balanced or where courts engage in a proportionality analysis *stricto sensu* In the concluding remarks the author proposes how proportionality analysis may be structured in order to better secure the legitimacy of the analysis
