Making Of The Cold War Enemy Culture And Politics In The Military Intellectual Complex:

The Making of the Cold War Enemy Ron Theodore Robin, 2003-01-26 He reveals how the academics intolerance for complexity ultimately reduced the nation s adversaries to borderline psychotics ignored revolutionary social shifts in post World War II Asia and promoted the notion of a maniacal threat facing the United States **Global and Transnational History** A. Iriye, 2012-10-29 It is no exaggeration to say that the study of history has been transformed significantly during the last twenty odd years Akira Iriye the world authority on transnational history examines the emergence and growth of global and transnational history away from more traditional nation centred perspectives **International Development** Corinna R. Unger, 2018-09-06 International Development A Postwar History offers the first concise historical overview of international development policies and practices in the 20th century Embracing a longue dur e perspective the book describes the emergence of the development field at the intersection of late colonialism the Second World War the onset of decolonization and the Cold War It discusses the role of international organizations colonial administrations national governments and transnational actors in the making of the field and it analyzes how the political intellectual and economic changes over the course of the postwar period affected the understanding of and expectations toward development By drawing on examples of development projects in different parts of the world and in different fields Corinna R Unger shows how the plurality of development experiences shaped the notion of development as we know it today This book is ideal for scholars seeking to understand the history of development assistance and to gain new insight into the international history of the 20th century **Korean Memories and Psycho-Historical Fragmentation** Mikiyoung Kim, 2019-09-09 This pioneering book is the first English volume on Korean memories In it Mikiyoung Kim introduces psycho historical fragmentation a concept that explains South Korea s mnemonic rupture as a result of living under intense temporal psychological and physical pressure As Korean society has undergone transformation at unusual speed and intensity so has its historical memory Divided into three sections on lingering colonial legacies the residuals of the Cold War and Korean War and Korea s democracy movement in the 1980s Korean Memories and Psycho Historical Fragmentation aims to tell multi layered subtle and lesser known stories of Korea s historical past With contributions from interdisciplinary perspectives it reveals the fragmentation of Korean memory and the impact of silencing Globalization and War Tarak Barkawi, 2006 Examining the interconnections between globalization and war Barkawi Centre of International Studies U of Cambridge UK first analyzes how war interconnects and reshapes places and how developments in the nature and utility of military force shape transregional and worldwide contexts utilizing the relations among India the British empire and the Indian Army as illustrative material He then examines cultural dimensions of war and globalization such as geographic imaginaries of a modern and advance West and a barbarous Orient The themes developed in these chapters are then applied to the War on Terror **Cult of the Irrelevant** Michael C. Desch, 2019 How professionalization and scholarly rigor made social scientists

increasingly irrelevant to US national security policy To mobilize America's intellectual resources to meet the security challenges of the post 9/11 world US Secretary of Defense Robert M. Gates observed that we must again embrace eggheads and ideas But the gap between national security policymakers and international relations scholars has become a chasm In *Cult of the Irrelevant* Michael Desch traces the history of the relationship between the Beltway and the Ivory Tower from World War I to the present day Recounting key Golden Age academic strategists such as Thomas Schelling and Walt Rostow Desch's narrative shows that social science research became most oriented toward practical problem solving during times of war and that scholars returned to less relevant work during peacetime Social science disciplines like political science rewarded work that was methodologically sophisticated over scholarship that engaged with the messy realities of national security policy and academic culture increasingly turned away from the job of solving real world problems In the name of scientific objectivity academics today frequently engage only in basic research that they hope will somehow trickle down to policymakers Drawing on the lessons of this history as well as a unique survey of current and former national security policymakers Desch offers concrete recommendations for scholars who want to shape government work The result is a rich intellectual history and an essential wake up call to a field that has lost its way

Russian/Soviet Studies in the United States, Amerikanistika in Russia Ivan Kurilla, Victoria I. Zhuravleva, 2015-12-09 The contributors in this interdisciplinary collection address the problem of interconnection between the study of the Other either Russian or American and the shaping of national identities in the two countries at different stages of US Russian relations The focus of research interests were typically determined by the political and social debates in scholars' native countries In this book leading Russian and American scholars analyze the problems arising from these intersections of academic political and sociocultural contexts and the implicit biases they entail The book is divided into two parts the first being a historical overview of past configurations of the interrelationship between fields and agendas and the second covering the role of institutionalized area studies in the twentieth and early twenty first centuries In both parts the role of the human factor in the study of mutual representations is elucidating

The World the Game Theorists Made Paul Erickson, 2015-11-04 In recent decades game theory the mathematics of rational decision making by interacting individuals has assumed a central place in our understanding of capitalist markets the evolution of social behavior in animals and even the ethics of altruism and fairness in human beings With game theory's ubiquity however has come a great deal of misunderstanding Critics of the contemporary social sciences view it as part of an unwelcome trend toward the marginalization of historicist and interpretive styles of inquiry and many accuse its proponents of presenting a thin and empirically dubious view of human choice *The World the Game Theorists Made* seeks to explain the ascendancy of game theory focusing on the poorly understood period between the publication of John von Neumann and Oscar Morgenstern's seminal *Theory of Games and Economic Behavior* in 1944 and the theory's revival in economics in the 1980s Drawing on a diverse collection of institutional archives personal correspondence and

papers and interviews Paul Erickson shows how game theory offered social scientists biologists military strategists and others a common flexible language that could facilitate wide ranging thought and debate on some of the most critical issues of the day

Non-Aligned Psychiatry in the Cold War Ana Antić,2022-01-18 This book explores the relationship between socialist psychiatry and political ideology during the Cold War tracing Yugoslav psy sciences as they experienced multiple internationalisations and globalisations in the post WWII period These unique transnational connections with West East and South remain at the centre of this book The author argues that the psy disciplines provide a window onto the complications of Cold War internationalism offering an opportunity to re think postwar Europe s internal dynamics She tells an alternative pan European narrative of the post 1945 period demonstrating that in the Cold War there existed sites of collaboration and vigorous exchange between the two ideologically opposed camps and places like Yugoslavia provided a meeting point where ideas frameworks and professional and cultural networks from both sides of the Iron Curtain could overlap and transform each other Moreover the book offers the first analysis of East European psychiatrists contacts with and contributions to the decolonizing world exploring their participation in broader political discussions about decolonization anti imperialism and non alignment The Yugoslav brand of East West psychoanalysis and psychotherapy bred a truly unique intellectual framework which enabled psychiatrists to think through a set of political and ideological dilemmas regarding the relationship between individuals and social structures This book offers a thorough reinterpretation of the notion of communist psychiatry as a tool used solely for political oppression and instead emphasises the political interventions of East European psychiatry and psychoanalysis This monograph has partly been funded by the European Research Council ERC under the European Union s Horizon 2020 research and innovation programme ERC Starting Grant DECOLMAD 851871
