

responsibility for harm they cause to others.¹⁵ Other rationales for reparation have focused on the role of the State, including that it is the State's absolute duty to protect its citizens from crime, that the State should ensure a more equitable distribution of income through transfers to those that suffer significant harm, and that crime is the fault or responsibility of society in general and therefore the State should facilitate the reparation of those who suffer from harmful acts.¹⁶ The reparation of victims can also be justified using Rawls' theory of justice; that applying a veil of ignorance (when individuals are uncertain if they will be victims of actions beyond their control) can lead to some reparation of victims on fairness grounds.¹⁷ Bentham's utilitarian theory can also be applied; that if marginal utility from the receipt of income or any other form of reparation differs across victims and non-victims, or if non-victims gain utility from providing assistance to victims, then some form of victim reparation is likely to be required to maximize happiness.¹⁸

In practice, whatever one's rationale for reparation, economic, political and social considerations will usually require that normative judgments be made as to which victim populations are to be repaired relative to other social needs, as well as how such reparation is to occur.

In the event that reparation is to occur, at least some form of material reparation is desirable. This is because different victims have different needs, with some victims preferring restitution, compensation or some other type of material reparation, and other victims preferring symbolic reparation.¹⁹ In addition, material reparation is thought to have symbolic value of itself, representing that the perpetrator is not above the law and indirectly expressing a commitment to making amends and taking responsibility for harm caused.²⁰ Not providing any material reparation can therefore diminish the reparative effect of other efforts. Finally, purely symbolic gestures following gross and systematic abuses of human rights are unlikely to be perceived as fair or appropriate, and risk not being recognized as sufficient reparation.

What form can a reparation program take?

The design and implementation of a reparation program can involve many different and difficult decisions. This can be the case if a judicial approach to reparation is adopted, and is particularly so when reparation is undertaken as a broad political project.

Pablo De Greiff of the International Center for Transitional Justice has identified different elements of reparation programs which are discussed below.²¹ Each of these elements involves different decisions to be made which influence the exact form of a reparation program.
