Making Parks Work Strategies For Preserving Tropical Nature:

Making Parks Work John Terborgh, 2002-03 Most scientists and researchers working in tropical areas are convinced that parks and protected areas are the only real hope for saving land and biodiversity in those regions Rather than giving up on parks that are foundering ways must be found to strengthen them and Making Parks Work offers a vital contribution to that effort Focusing on the good news success stories from the front lines and what lessons can be taken from those stories the book gathers experiences and information from thirty leading conservationists into a guidebook of principles for effective management of protected areas The book offers a general overview of the status of protected areas worldwide presents case studies from Africa Latin America and Asia written by field researchers with long experience working in those areas analyzes a variety of problems that parks face and suggests policies and practices for coping with those problems explores the broad philosophical questions of conservation and how protected areas can and must resist the mounting pressures of an overcrowded world Contributors include Mario Boza Katrina Brandon K Ullas Karanth Randall Kramer Jeff Langholz John F Oates Carlos A Peres Herman Rijksen Nick Salafsky Thomas T Struhsaker Patricia C Wright and others **Jurassic**

Wilderness: Ecotourism as a Conservation Strategy in Komodo National Park, Indonesia Henning

Borchers, 2004-10-04 This study proceeds on Campbell's 2002 argument that in today's biodiversity conservation discourse the traditional exclusionary conservation narrative co exists with a counter narrative on sustainable use through ecotourism Based on the perception of a global biodiversity crisis the conservation landscape has seen the resurgence of the traditional conservation discourse which reinforces the argument against social objectives of conservation and for an exclusionary conservation approach drawing on the notion of wilderness Local resource use practices are restricted or prohibited while ecotourism is considered the most sustainable option However as a proposed alternative livelihood strategy for local residents ecotourism often fails to deliver on claims that it significantly benefits local development while it may be more conducive to furthering ecological imperatives Based on an analysis of the management of Komodo National Park Indonesia and the development of communities within the Park this study argues that ecotourism may only be a politically attractive slogan that provides conservation agencies with the political and economic justification for an exclusionary protected area management approach Instead of taking into account economic social and cultural concerns of local residents a conservation regime that adopts ecotourism as a conservation strategy may ultimately leave local people struggling to meet their present needs *Transforming Parks and Protected Areas* Kevin S. Hanna, Douglas A. Clark, D. Scott Slocumbe, 2007-10-18 A rare collection of articles that fuses academic theory critique of practice and practical knowledge Transforming Parks and Protected Areas analyzes and critiques the emerging issues in the design and operation of parks and protected areas

Saving Forests, Protecting People? John Schelhas, Max J. Pfeffer, 2009-03-16 Tropical forest conservation is attracting widespread public interest and helping to shape the ways in which environmental scientists and other groups approach

global environmental issues Schelhas and Pfeffer show that globally driven forest conservation efforts have had different results in different places ranging from violent protest to the discovery of common ground among conservation programs and the various interests of local peoples The authors examine the connections between local values material needs and environmental management regimes *Saving Forests Protecting People* explores that difficult terrain where culture the environment and social policies meet

Conservation Monique Borgerhoff Mulder, Peter Coppolillo, 2018-06-05 Nearly 90 percent of the earth's land surface is directly affected by human infrastructure and activities yet less than 5 percent is legally protected for biodiversity conservation and even most large protected areas have people living inside their boundaries In all but a small fraction of the earth's land area then conservation and people must coexist Conservation is a resource for all those who aim to reconcile biodiversity with human livelihoods It traces the historical roots of modern conservation thought and practice and explores current perspectives from evolutionary and community ecology conservation biology anthropology political ecology economics and policy The authors examine a suite of conservation strategies and perspectives from around the world highlighting the most innovative and promising avenues for future efforts Exploring highlighting and bridging gaps between the social and natural sciences as applied in the practice of conservation this book provides a broad practically oriented view It is essential reading for anyone involved in the conservation process from academic conservation biology to the management of protected areas rural livelihood development to poverty alleviation and from community based natural resource management to national and global policymaking

Conservation and Recreation in Protected Areas Yun Ma, 2016-05-12 This book provides a comprehensive and up to date comparative study of the management and resolution of conflicts between conservation and recreation in protected areas in the US and China Competing claims on the use of nature increasing regulation of land use and recreational activities and the conflicting goals between conservation and development have led to a rise in conflicts in the designation and management of protected areas How to effectively manage and resolve these conflicts has become a challenge for both legislators and managers By adopting an institutional dimension in legal interpretation this book critically examines how such conflicts are dealt with in the legal regimes of the US and China while exploring interactions between legislatures agencies and courts The book searches for a plausible solution to improve the legal framework of protected areas in China by emulating pertinent mechanisms developed in the US whilst also presenting legal and policy recommendations to the US This informative book will be useful for legal scholars in Chinese law nature conservation law administrative law and comparative law

Snow Leopards, 2016-06-06 *Snow Leopards Biodiversity of the World Conservation from Genes to Landscapes* is the only comprehensive work on the biology behavior and conservation

status of the snow leopard a species that has long been one of the least studied and hence poorly understood of the large cats Breakthroughs in technologies and methodologies to study this elusive cat have come rapidly including non invasive genetics camera traps and GPS satellite collaring The book begins with chapters on the genetic standing and taxonomy of the snow leopard followed by chapters on their behavior and ecology Additional contributions follow on the current and emerging threats to the species which include longstanding concerns such as poaching and conflicts with livestock and new and emerging threats such as mining and climate change A section on conservation solutions backed by valuable case studies starts with an overview of the important role mountain communities play in assuring the snow leopard s long term persistence In addition chapters on the role of captive snow leopards for the conservation of the species state of the art techniques and technologies for studying and monitoring snow leopards status reports from around the region and future perspectives such as transboundary conservation initiatives international conventions CITES CMS etc the role of the IUCN Cat Specialist Group and the Snow Leopard Network and undertakings such as the Global Snow Leopard Forum facilitated by the World Bank are also included Serves as the first and only comprehensive book on the biology behavior and conservation status of the snow leopard Brings together the most current scientific knowledge documents the most pressing conservation issues and shares success stories in alleviating the broad threats that now jeopardize the long term survival of this species Brings current knowledge of the species not only to researchers and conservationists but also to decision makers academics and students Edited by recognized snow leopard experts with more than 50 years of collective experience in research and conservation of the species **Biodiversity** Kevin J. Gaston, John I. Spicer, 2013-04-22 This concise

introductory text provides a complete overview of biodiversity what it is how it arose its distribution why it is important human impact upon it and what should be done to maintain it Timely overview of the serious attempts made to quantify and describe biodiversity in a scientific way Acts as an easy entry point into the primary literature Provides real world examples of key issues including illustrations of major temporal and spatial patterns in biodiversity Designed primarily with undergraduate students and course lecturers in mind it will also be of interest to anyone who requires an overview of and entry to the vast literature on these topics The figures from in the book may be freely downloaded from the book website on wiley com *Primates in Anthropogenic Landscapes* Tracie McKinney, Siân Waters, Michelle A. Rodrigues, 2023-01-01 The

field of primatology has expanded substantially in the last twenty years particularly with regard to studies of primates in human altered landscapes This text aims to review the recent literature on anthropogenic of human origin influences on non human primates bringing an overview of this important area of primatology together for students Chapters are grouped into three sections representing the many ways anthropogenic activities affect primate populations The first section Human Influences on Primate Habitat covers ways in which wild primates are affected by human actions including forest fragmentation climate change and the presence of dogs Section two Primates in Human Dominated Landscapes looks at

situations where non human primates and humans share space this includes primates in urban environments primate tourism and primates in agroecosystems The final section Primates in Captivity looks at primate behaviour and welfare in captive situations including zoos the primate pet trade and in entertainment *Elwyn Simons: A Search for Origins* John G Fleagle, Christopher C. Gilbert, 2007-12-03 For nearly a half century Dr Simons has dominated the study of primate evolution This volume summarizes the current state of knowledge in many aspects of primate and human evolution that have been studied by Simons and his colleagues and place it in a broader paleontological and historical perspective The book contains the results of new research as well as reviews of many of the critical issues in primate and human evolution during the last half of the twentieth century Primate Tourism Anne E. Russon, Janette Wallis, 2014-09-11 This book considers primate tourism as a primate conservation tool weighing its effects and developing informed guidelines for ongoing and future tourism ventures

Climate Change-Resilient Agriculture and Agroforestry Paula Castro, Anabela Marisa Azul, Walter Leal Filho, Ulisses M. Azeiteiro, 2019-01-24 This book collects wide ranging contributions such as case studies reviews reports on technological developments outputs of research studies and examples of successful projects presenting current knowledge and raising awareness to help the agriculture and forestry sectors find solutions for mitigating climate variability and adapting to change It brings the topic of ecosystem services closer to education and learning as targeted by the Framework Convention on Climate Change and the Paris Agreement the 2030 Agenda for Sustainable Development and the EU Biodiversity Strategy to 2020 Climate change and its impacts on agriculture and agroforestry have been observed across the world during the last 50 years Increasing temperatures droughts biotic stresses and the impacts of extreme events have continuously decreased agroforestry systems resilience to the effects of climate change As such there is a need to adapt farming and agroforestry systems so as to make them better able to handle ever changing climate conditions and to preserve habitats and ecosystem services

Conservation and Development Andrew Newsham, Shonil Bhagwat, 2015-12-22 Conservation and development share an intertwined history dating back to at least the 1700s But what are the prospects for reconciling the two and how far have we come with this project This book explores these questions through a detailed consideration of the past present and future of the relationship between conservation and development Bringing to bear conceptual resources from political ecology social ecological systems thinking and science and technology studies Conservation and Development sets this relationship against the background of the political and economic processes implicated in environmental degradation and poverty alike Whilst recognising that the need for reconciling conservation and development processes remains as compelling as ever it demonstrates why trade offs are more frequently encountered in practice than synergies It also flags alternative visions for conservation and development obscured or ignored by current framings and priorities Bringing together policy and theory Conservation and Development is an essential resource for undergraduate and postgraduate students and a useful reference for researchers in related fields Each chapter contains a

reading guide with discussion questions The text is enlivened by a number of new case studies from around the world A must read for anyone interested in understanding the history current state and projections for future shifts in the relationship between conservation and development **Situational Prevention of Poaching** Andrew Lemieux,2014-03-05 For centuries criminologists have looked for scientific ways to study understand and ultimately prevent crime In this volume a unique offense poaching is explored in various contexts to determine what opportunity structures favor this crime and how situational crime prevention may reduce its prevalence The data sources used range from publically available secondary data about animal populations to interviews with hunters to actual law enforcement data collected inside protected areas Various methods are utilized to look for patterns in poaching behaviour regarding where poachers strike which species they target and their modus operandi Collectively the volume shows that principles of criminal opportunity theory and situational crime prevention are useful for studying and preventing poaching in a variety of contexts The methods employed by each chapter are easily replicated and meant to stimulate empirical poaching research where data is available While the theoretical grounding of this volume is drawn from criminology it is written for a broad audience of academics practitioners and those interested in wildlife conservation **Thank You, Madagascar** Alison Jolly,2015-03-12 An enchanting book poignant and passionate Geographical A captivating and absorbing account Sir David Attenborough Madagascar is one of the world s natural jewels with over ninety per cent of its wildlife found nowhere else on Earth Few people knew it better than the pioneering primatologist and conservationist Alison Jolly Thank You Madagascar is her eyewitness account of the extraordinary biodiversity of the island and the environment of its people At the book s heart is a conflict between three different views of nature Is the extraordinary forest treasure house of Madagascar a heritage for the entire world Is it a legacy of the forest dwellers ancestors bequeathed to serve the needs of their living descendants Or is it an economic resource to be pillaged for short term gain and to be preserved only to deliver benefits for those with political power Exploring and questioning these different views this is a beautifully written diary and a tribute to Madagascar The Dwarf and Mouse Lemurs of Madagascar Shawn M. Lehman,2016-04-07 The first ever reference book on the behaviour physiology conservation and biogeography of the dwarf and mouse lemurs of Madagascar Governance of Marine Fisheries and Biodiversity Conservation Serge M. Garcia,Jake Rice,Anthony Charles,2014-07-15 Governance of Marine Fisheries and Biodiversity Conservation explores governance of the world s oceans with a focus on the impacts of two inter connected but historically separate streams of governance one for fisheries the other for biodiversity conservation Chapters most co authored by leading experts from both streams investigate the interaction of these governance streams from ecological economic social and legal perspectives with emphasis on policies institutions processes and outcomes on scales from the global to the local community and with coverage of a range of themes and regions of the world The book opens with chapters setting the historical context for the two marine governance streams and framing the book s exploration of whether as the

streams increasingly interact there will be merger or collision convergence or co evolution The concluding chapter synthesizes the insights from throughout the book relative to the questions posed in the opening chapters It also draws conclusions about future needs and directions in the governance of marine fisheries and biodiversity vital to the future of the world s oceans With cutting edge chapters written by many leading international experts in fisheries management and biodiversity conservation and edited by three leading figures in this crucially important subject Governance of Marine Fisheries and Biodiversity Conservation is an essential purchase for fisheries scientists economists resource managers and policymakers and all those working in fields of biodiversity conservation marine ecology and coastal livelihoods Libraries in all universities and research establishments where environmental and or marine studies conservation ocean policy and law biological and life sciences and fisheries management are studied and taught should have copies of this most important book

The Environmental Advantages of Cities William B. Meyer,2013-03-15 An analysis that offers evidence to challenge the widely held assumption that urbanization and environmental quality are necessarily at odds Conventional wisdom about the environmental impact of cities holds that urbanization and environmental quality are necessarily at odds Cities are seen to be sites of ecological disruption consuming a disproportionate share of natural resources producing high levels of pollution and concentrating harmful emissions precisely where the population is most concentrated Cities appear to be particularly vulnerable to natural disasters to be inherently at risk from outbreaks of infectious diseases and even to offer dysfunctional and unnatural settings for human life

In this book William Meyer tests these widely held beliefs against the evidence. Borrowing some useful terminology from the public health literature, Meyer weighs instances of urban penalty against those of urban advantage. He finds that many supposed urban environmental penalties are illusory, based on commonsense preconceptions and not on solid evidence. In fact, greater degrees of urbanness often offer advantages rather than penalties. The characteristic compactness of cities, for example, lessens the pressure on ecological systems and enables resource consumption to be more efficient. On the whole, Meyer reports, cities offer greater safety from environmental hazards—geophysical, technological, and biological—than more dispersed settlement does. In fact, the city-defining characteristics widely supposed to result in environmental penalties do much to account for cities' environmental advantages. As of 2008, according to U.N. statistics, more people live in cities than in rural areas. Meyer's analysis clarifies the effects of such a profound shift, covering a full range of environmental issues in urban settings.
