*Bodies in the Bog and the Archaeological Imagination* Karin Sanders, 2009-12 Over the past few centuries northern Europe's bogs have yielded mummified men women and children who were deposited there as sacrifices in the early Iron Age and kept startlingly intact by the chemical properties of peat In this remarkable account of their modern afterlives Karin Sanders argues that the discovery of bog bodies began an extraordinary and ongoing cultural journey Throughout the nineteenth and twentieth centuries Sanders shows these eerily preserved remains came alive in art and science as material metaphors for such concepts as trauma nostalgia and identity Sigmund Freud Joseph Beuys Seamus Heaney and other major figures have used them to reconsider fundamental philosophical literary aesthetic and scientific concerns Exploring this intellectual spectrum Sanders contends that the power of bog bodies to provoke such a wide range of responses is rooted in their unique status as both archeological artifacts and human beings They emerge as corporeal time capsules that transcend archaeology to challenge our assumptions about what we can know about the past By restoring them to the roster of cultural phenomena that force us to confront our ethical and aesthetic boundaries Bodies in the Bog excavates anew the question of what it means to be human *The Elder Pliny on the Human Animal*, 2005-03-17 As a detailed study of the human animal described by its author as the *raison d'être* of nature Book Seven of the elder Pliny's Natural History is crucial to the

understanding of the work as a whole In addition however it provides a valuable insight into the extraordinary complex of ideas and beliefs current in Pliny s era many of which have resonances for other eras and cultures The present study includes a substantial introduction examining the background to Pliny s life thought and writing together with a modern English translation and a detailed commentary which emphasizes the importance of Book Seven as possibly the most fascinating cultural record surviving from early imperial Rome *A Companion to the Classical Greek World* Konrad H.

**King (Revised and Expanded)** Mike Pitts,2015-09-08 As gripping as any detective fiction Proof that one doesn t need to be fascinated with Richard III to be enthralled by the story of his body s discovery Publisher s Weekly In August 2012 a search began and on February 4 2013 a team from Leicester University delivered its verdict to a mesmerized press room and to the world they had found the remains of Richard III whose legacy was perhaps the most contested of all British monarchs Prior to this major discovery there had been little new information about Richard III for some time With no new evidence to fuel it the debate over what kind of man he might have been seemed to have stalled Thus the story of the discovery of Richard III is a story of the value of archaeology careful analysis of physical evidence backed up by the latest science and technology and how it can change our understanding of history Firsthand accounts from the team that found the king along with photographs from the author s own archives and an expanded epilogue incorporating new DNA evidence augment this compelling detective story as the evidence is uncovered Ned Kelly Craig Cormick,2014-10 Ned Kelly was hanged at the

Old Melbourne Gaol on 11 November 1880 and his body buried in the graveyard there Many stories emerged about his skull being separated and used as a paperweight or trophy and it was finally put on display at the museum of the Old Melbourne Gaol until it was stolen in 1978 It wasn t only Ned Kelly s skull that went missing After the closure of the Old Melbourne Gaol in 1929 the remains of deceased prisoners were exhumed and reinterred in mass graves at Pentridge Prison The exact location of these graves was unknown until 2002 when the bones of prisoners were uncovered at the Pentridge site during redevelopment This triggered a larger excavation that in 2009 uncovered many more coffins and led to the return of the skull and a long scientific process to try to identify and reunite Ned Kelly s remains But how do you go about analysing and accurately identifying a skeleton and skull that are more than 130 years old Ned Kelly Under the Microscope details what was involved in the 20 month scientific process of identifying the remains of Ned Kelly with chapters on anthropology odontology DNA studies metallurgical analysis of the gang s armour and archaeological digs at Pentridge Prison and

Glenrowan It also includes medical analysis of Ned's wounds and a chapter on handwriting analysis that all lead to the final challenging conclusions Illustrated throughout with photographs taken during the forensic investigation as well as historical images the book is supplemented with breakout boxes of detailed but little known facts about Ned Kelly and the gang to make this riveting story a widely appealing read The Early Modern Human from Tianyuan Cave, China Hong Shang, Erik Trinkaus, 2010-06-18 For more than a century scientists have returned time and again to the issue of modern human emergence the when and where of the evolutionary process and the human behavioral and biological dynamics involved The 2003 discovery of a human partial skeleton at Tianyuandong Tianyuan Cave excited worldwide interest The first human skeleton from the region to be directly radiocarbon dated to 40 000 years before present its geological age places it close to the time period during which modern humans became permanently established across the Old World between 50 000 and 35 000 years ago Through detailed description and interpretation of the most complete early modern human skeleton from eastern Asia The Early Modern Human from Tianyan Cave China addresses long term questions about the ancestry of modern humans in eastern Asia and the nature of the changes in human behavior with the emergence of modern human biology This book is a detailed paleontological and paleobiological presentation of this skeleton its context and its implications By providing basic information for this important human fossil offering inferences concerning the population processes involved in modern human emergence in eastern Eurasia and by raising questions concerning the adaptations of these early modern human hunter gatherers The Early Modern Human from Tianyuan Cave China will take its place as a core contribution to the study of modern human emergence From the Pleistocene to the Holocene C. Britt Bousman, Bradley J. Vierra, 2012-10-22 The end of the Pleistocene era brought dramatic environmental changes to small bands of humans living in North America changes that affected subsistence mobility demography technology and social relations The transition they made from Paleoindian Pleistocene to Archaic Early Holocene societies represents the first major cultural shift that took place solely in the Americas This event which manifested in ways and at times much more varied than often supposed set the stage for the unique developments of behavioral complexity that distinguish later Native American prehistoric societies Using localized studies and broad regional syntheses the contributors to this volume demonstrate the diversity of adaptations to the dynamic and changing environmental and cultural landscapes that occurred between the Pleistocene and early portion of the Holocene The authors research areas range from Northern Mexico to Alaska and across the continent to the American Northeast synthesizing the copious available evidence from well known and recent excavations With its methodologically and geographically diverse approach From the Pleistocene to the Holocene Human Organization and Cultural Transformations in Prehistoric North America provides an overview of the present state of knowledge regarding this crucial transformative period in Native North America It offers a large scale synthesis of human adaptation reflects the range of ideas and concepts in current archaeological theoretical approaches and acts as a springboard for future explanations and models of prehistoric

change     **The Toyah Phase of Central Texas** Nancy Adele Kenmotsu, Douglas K. Boyd, 2012-10-02 In the fourteenth century a culture arose in and around the Edwards Plateau of Central Texas that represents the last prehistoric peoples before the cultural upheaval introduced by European explorers This culture has been labeled the Toyah phase characterized by a distinctive tool kit and a bone tempered pottery tradition Spanish documents some translated decades ago offer glimpses of these mobile people Archaeological excavations some quite recent offer other views of this culture whose homeland covered much of Central and South Texas For the first time in a single volume this book brings together a number of perspectives and interpretations of these hunter gatherers and how they interacted with each other the pueblos in southeastern New Mexico the mobile groups in northern Mexico and newcomers from the northern plains such as the Apache and Comanche Assembling eight studies and interpretive essays to look at social boundaries from the perspective of migration hunter farmer interactions subsistence and other issues significant to anthropologists and archaeologists The Toyah Phase of Central Texas Late Prehistoric Economic and Social Processes demonstrates that these prehistoric societies were never isolated from the world around them Rather these societies were keenly aware of changes happening on the plains to their north among the Caddoan groups east of them in the Puebloan groups in what is now New Mexico and among their neighbors to the south in Mexico     **Identifying and Interpreting Animal Bones** April M. **Unwrapping Ancient Egypt** Christina Riggs, 2014-04-10 First runner up for the British Kuwait Friendship Society Book Prize in Middle Eastern Studies 2015 In ancient Egypt wrapping sacred objects including mummified bodies in layers of cloth was a ritual that lay at the core of Egyptian society Yet in the modern world attention has focused instead on unwrapping all the careful arrangements of linen textiles the Egyptians had put in place This book breaks new ground by looking at the significance of textile wrappings in ancient Egypt and at how their unwrapping has shaped the way we think about the Egyptian past Wrapping mummified bodies and divine statues in linen reflected the cultural values attached to this textile with implications for understanding gender materiality and hierarchy in Egyptian society Unwrapping mummies and statues similarly reflects the values attached to Egyptian antiquities in the West where the colonial legacies of archaeology Egyptology and racial science still influence how Egypt appears in museums and the press From the tomb of Tutankhamun to

the Arab Spring Unwrapping Ancient Egypt raises critical questions about the deep seated fascination with this culture and what that fascination says about our own **Forensic Facial Identification** Tim Valentine, Josh P Davis, 2015-06-22
