Hunt, 2010-01-20 The history of American education is replete with educational reform and to a lesser extent educational dissent Consider the present you have various forms of privatization school choice the No Child Left Behind act home schooling value added accountability alternative teacher preparation programs on line instruction etc This range of activity is not exceptional For instance consider the past progressive education open education the junior high school the middle school Life Adjustment education career education vocational education the comprehensive high school school to work year round schooling behavioral objectives proficiency exams high stakes testing whole language learning packages and self paced instruction modular scheduling site based management all presented as the way to reform American schools at least in part Then you have the reformers themselves such as John Dewey George Counts Herbert Kohl John Holt Charles Silberman Admiral Hyman Rickover James Bryant Conant all the way back to Horace Mann himself Dissenters and dissenting movements while not as numerous and certainly not as well known in educational circles count the various faith based

schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key themes and topics include biographies of reformers and dissenters theoretical and ideological perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily

Transforming Pedagogies Through Engagement with Learners, Teachers and Communities Dat Bao, Thanh Pham, 2021-06-12 This book identifies three types of influential forces that pose challenges to innovations socio cultural dynamics teacher individuality and local circumstances It uses languages cultural traits and intellectual heritages in the Asia Pacific region as an example to show the resistance to Western based pedagogies due to disparities between the innovations and these local heritages It reveals personal and professional values that teachers hold and how these values while seemingly supporting creative ideologies happen to prevent them from incorporating innovations in their practices The book discusses

how informal educational activities and services that a society possesses could impede pedagogical innovations There is therefore a need for institutions and educators to develop a positive relationship between these phenomena and teaching innovations School to Work, College and Career ,1997 The National Education Priorities of the President and the U.S. Department of Education, Striving for Excellence, Volume IV: 2000 ,2000 ERS Bulletin Educational Research Service (Arlington, Va.),1988
