Marriage, Sex, and Civic Culture in Late Medieval London Shannon McSheffrey, 2013-04-23 Awarded honorable mention for the 2007 Wallace K Ferguson Prize sponsored by the Canadian Historical Association How were marital and sexual relationships woven into the fabric of late medieval society and what form did these relationships take Using extensive documentary evidence from both the ecclesiastical court system and the records of city and royal government as well as advice manuals chronicles moral tales and liturgical texts Shannon McSheffrey focuses her study on England's largest city in the second half of the fifteenth century Marriage was a religious union one of the seven sacraments of the Catholic Church and imbued with deep spiritual significance but the marital unit of husband and wife was also the fundamental domestic social political and economic unit of medieval society As such marriage created political alliances at all levels from the arena of international politics to local neighborhoods Sexual relationships outside marriage were even more complicated McSheffrey notes that medieval Londoners saw them as variously attributable to female seduction or to male lustfulness as irrelevant or deeply damaging to society and to the body politic as economically productive or wasteful of resources Yet like marriage sexual relationships were also subject to control and influence from parents relatives neighbors civic officials parish priests and ecclesiastical judges Although by medieval canon law a marriage was irrevocable from the moment a man and a woman exchanged vows of consent before two witnesses in practice marriage was usually a socially complicated process involving many people McSheffrey looks more broadly at sex governance and civic morality to show how medieval patriarchy extended a far wider reach than a father's governance over his biological offspring By focusing on a particular time and place she not only elucidates the culture of England's metropolitan center but also contributes generally to our understanding of the social mechanisms through which premodern European people negotiated their lives

Everyday Islamic Law and the Making of Modern South Asia Elizabeth Lhost, 2025-02-20 Beginning in the late eighteenth century British rule transformed the relationship between law society and the state in South Asia But qazis and muftis alongside ordinary people without formal training in law fought back as the colonial system in India sidelined Islamic legal experts They petitioned the East India Company for employment lobbied imperial legislators for recognition and built robust institutions to serve their communities By bringing legal debates into the public sphere they resisted the colonial state's authority over personal law and rejected legal codification by embracing flexibility and possibility With postcards letters and telegrams they made everyday Islamic law vibrant and resilient and challenged the hegemony of the Anglo Indian legal system Following these developments from the beginning of the Raj through independence Elizabeth Lhost rejects narratives of stagnation and decline to show how an unexpected coterie of scholars practitioners and ordinary individuals negotiated the contests and challenges of colonial legal change The rich archive of unpublished fatwa files qazi notebooks and legal documents they left behind chronicles their efforts to make Islamic law relevant for everyday life even beyond colonial courtrooms and the confines of family law Lhost shows how ordinary Muslims shaped colonial legal life and how their diversity and difference have contributed to contemporary debates about religion law pluralism and democracy in South Asia and beyond

The Power of the Fathers Margareth Lanzinger, 2016-02-05 The book examines the topic of paternal authority as it developed over a long period of time The focus is on the power of fathers as manifested within a complex fabric of legal social economic political and moral aspects In early modern times a father's power was based upon his personal and legal position as the one responsible for the family and the household in the sense of an economic unit as well as on his moral authority over all those who belonged to said household At the same time the father was subject to public control and his legal status was characterized not only by power but also by obligations This status was modelled after the figure of the pater familias as conceived of in Roman law a concept that remained relevant up into the nineteenth century though not without changes Ultimately the figure of the pater familias came to overlap with the modern era perception of fathers disempowerment The chapters of this book analyse the public responsibility of fathers in the case of an adulterous daughter legal acts of emancipation by which a son could gain independence from his father and various opinions with regard to indulgent fathering paternal authority over married sons
