Minor Ailments In Primary Care An Evidence Based Approach:

Minor Ailments in Primary Care Just A. H. Eekhof, Arie Knuistingh Neven, Th Verheij, Theo J. M. Verheij, 2005 The authors have described the most frequently encountered complaints and disorders that do not pose a serious health threat often have a good prognosis and have not been paid much attention during medical education or in scientific papers The basic principle is to provide relevant information on minor ailments based on scientific evidence *Supporting Self Care in Primary Care* Ruth Chambers, Gill Wakley, Alison Blenkinsopp, 2006 Self care is about people's attitudes and lifestyle as well as what they can do to take care of themselves when they have a health problem Supporting self care is about increasing people's confidence and self esteem enabling them to take decisions about the sensible care of their health and avoiding triggering health problems Although many people are already practising self care to some extent there is a great deal more that they can do Ruth Chambers Gill Wakley and Alison Blenkinsopp in the Preface Designed around the Department of Health's Working in Partnership Programme this book is full of easy to implement advice for everyday use promoting a positive approach to self care and demonstrating how smoothly it can be introduced and undertaken Supporting Self Care in Primary Care encourages interactive professional learning and development both individually and within a team and highlights the importance and benefits of self care in the workplace It is a self contained text with tools and illustrative examples to aid comprehension and includes a complementary web resource containing further tools and a training package All healthcare professionals involved in commissioning or providing primary care to patients will find this practical guide invaluable as will healthcare managers and health promotion specialists **Geriatric Medicine: an evidence-based**

approach Frank Lally, Christine Roffe, 2014-10-02 People are living longer and the population over the age of 60 is burgeoning with repercussions for health services and healthcare expenditure in developed countries Crucially disease aetiology diagnosis and treatment in older people differ from the general adult population Older people often have complicated co morbidities and respond to treatment in different ways compared to younger people Evidence of efficacy of different treatments is often lacking because older people are under represented in clinical trials and the specific needs of older people are rarely discussed specifically in more general texts Geriatric medicine an evidence based approach is a clinical reference for health care professionals who manage older patients and summarizes up to date research literature in a style that can be directly applied by busy healthcare professionals and provide a useful resource for reference **The**
