The Last Days of the Dinosaurs Riley Black, 2022-04-26 In The Last Days of the Dinosaurs Riley Black walks readers through what happened in the days the years the centuries and the million years after the impact tracking the sweeping disruptions that overtook this one spot and imagining what might have been happening elsewhere on the globe Life's losses were sharp and deeply felt but

the hope carried by the beings that survived sets the stage for the world as we know it now Picture yourself in the Cretaceous period It s a sunny afternoon in the Hell Creek of ancient Montana 66 million years ago A Triceratops horridus ambles along the edge of the forest In a matter of hours everything here will be wiped away Lush verdure will be replaced with fire Tyrannosaurus rex will be toppled from their throne along with every other species of non avian dinosaur no matter their size diet or disposition They just don t know it yet The cause of this disaster was identified decades ago An asteroid some seven miles across slammed into the Earth leaving a geologic wound over 50 miles in diameter In the terrible mass extinction that followed more than half of known species vanished seemingly overnight But this worst single day in the history of life on Earth was as critical for us as it was for the dinosaurs as it allowed for evolutionary opportunities that were closed for the previous 100 million years
