

ADVANCE ACCLAIM FOR MY SECOND TWENTY YEARS

"A tough and moving pilgrimage from the gates of death to the full beauty of a brilliant life... a vivid death's ride of destiny measured, a splendid, witty, lucid portrait of the artist as his reader's partner and witness: in short, a story about choosing one's life—a story that triumphs and defies and risks and inspires and moves, and is likely to win prominence in that wonderful literature (published by Henry Adams and Samuel Butler, and John Stuart Mill) of self-education."

Cynthia Clark
Author of *Trust, The Paper Ball,*
and *Blindfold*

"This is a strange which leaves you dumfounded up against a wall facing yourself. This is beauty which goes through the heart to the marrow and evaluates the parameters of pain and grief we thought had been defined. Brickner dreams and theory back at us all our presuppositions call the myths and allegories we have accepted about accident and survival. He catches the glances we are his impostor stories about the transcendence of the human spirit."

"Richard Brickner has written the best book I have read about how a sensitive intelligent man thinks about sex, and about women and the problems of loving us now. The feelings, the exquisite physical detailing in this book will seem a revelation. And yet, Brickner's imagination is such that the revelation and beauty do not detract from the appeal of the male mystery, the seductiveness that gives this book its strong erotic pull. Where certain men see sex as a defense, Brickner sees sex as pull down his defenses—and more. No one has written so well about sex and how it is with the bright men. Where Mailer, Miller and Roth stop short at telling men what they wanted to hear, saving all the rough words and describing the action, Brickner goes all the way through to the feelings that are tougher to tell. . . . You could trust such a man who uses such implication of his women's expressions as clearly as he uses and reveals his own. . . . It is an eminently adult approach of sexuality which leaves us smiling and crying and reaching out to him as one would to a lover—if one only had a lover who could explain himself as well."

My Second Twenty Years An Unexpected Life:

The Woman Patient Carol Nadelson, 2013-11-11 In Volumes 2 and 3 we have chosen a focus that places in context aspects of mental health and the complex psychosocial factors that affect our perceptions of how health and illness are defined and experienced. We are aware that some may take exceptions to the topics chosen or to the way in which some authors have developed their ideas and presented their information. While we cannot expect to agree with each other all of the time, we can provide a framework and a perspective from which ideas can take form and evolve. The first section of Volume 2 provides an overview of some of the theoretical issues involved in understanding the psychology of women. These issues include changes in psychoanalytic views particularly in relation to femininity and feminine development. The particular developmental experiences of black women are also clearly delineated. The second section deals with specific points in the life cycle that raise unique issues for women, especially as they pertain to the many roles of women in contemporary society and the impact that these roles have on their careers and on their families. The impact of having a working mother on the early interaction with children, the concerns of midlife, especially marital interactions, and the ambiguities of aging are discussed. We intend to provide information and to raise questions that we hope will be part of an ongoing dialogue as well as a stimulus to more intensive study and understanding. Catalog of Copyright Entries. Third Series Library of Congress.

Copyright Office, 1978 ***The Practice of Autonomy*** Carl Schneider, 1998 Exploring what patients do want gives direction to the author's inquiry into what they should want. What patients want, he believes, is properly more complex and ambiguous than being empowered. In this book he charts that ambiguity to take the autonomy principle past current pieties into the uncertain realities of the sick room and the hospital ward. *The Practice of Autonomy* is a sympathetic but trenchant study of the animating principle of modern bioethics. It speaks with freshness, insight, and even passion to bioethicists and moral philosophers about their theories, to lawyers about their methods, to medical sociologists about their subject, to policy makers about their ambitions, to doctors about their work, and to patients about their lives. **BOOK JACKET** **Mother Jones**

Each profile also includes critical evaluation, a list of the author's principal works with date first published, a list of major critical works, and a portrait or photograph where available. **Coping with Physical Illness** Rudolf Moos, 2012-12-06 This book provides new ideas about how patients and their families cope with serious health crises. Biomedical knowledge has expanded abruptly in the past decade during which time diagnostic and treatment procedures have become unusually specific and effective. Similarly, important advances have taken place in our understanding of the central role of psychosocial factors in health and illness.

Recent trends have sparked the formulation of useful concepts of coping skills and social resources and have emphasized the value of an active assertive role for patients in the process of obtaining health care. The emergence of subspecialties such as behavioral medicine and health psychology has stimulated renewed interest in these areas. Moreover, the growth of holistic medicine and a biopsychosocial orientation highlights the contribution of a psychosocial perspective in an integrated framework for providing health care. To cover these diverse trends, I offer a unified conceptual approach for understanding the process of coping with the crisis of physical illness and identifying the underlying adaptive tasks and domains of coping skills involved in this process. The first half of the book covers coping with selected health crises such as birth defects and perinatal death, childhood and adult cancer, and chronic physical disabilities.
