Reading Saussure A Critical Commentary On The Cours De Linguistique Generale:

Reading Saussure Roy Harris,1987 Re-reading Saussure Paul J. Thibault,2013-01-11 Through a detailed re reading of Saussure's work in the light of contemporary developments in the human life and physical sciences Paul Thibault provides us with the means to redefine and refocus our theories of social meaning making Saussure's theory of language is generally considered to be a formal theory of abstract sign types and sign systems separate from our individual and social practices of making meaning In this challenging book Thibault presents a different view of Saussure Paying close attention to the original texts including the Cours de Linguistique Generale he demonstrates that Saussure was centrally concerned with trying to formulate a theory of how meanings are made Re reading Saussure does more than simply engage with Saussure's theory in a new and up to date way however In addition to demonstrating the continuing viability of Saussure's thinking through a range of examples it makes an important intervention in contemporary linguistic and semiotic debate The Literary-Linguistic Analysis of the Bible ,2024-09-16 This collection of essays explores the rich intellectual heritage of Russian Formalism and the Prague School of Linguistics to illuminate their influence on the field of biblical studies and apply their constructive and creative potential for advancing linguistic theory discourse analysis and literary interpretation of the texts of the Old and New Testaments in their original languages The Phenomenology of Modern Legal Discourse William E. Conklin,2024-05-01 Originally published in 1998 The Phenomenology of Modern Legal Discourse recovers the suffering which is concealed as lawyers judges and other legal officials resignify a harm through the special vocabulary and grammar which constitutes legal language At the moment of re signification an untranslatable gap erupts between the knowers special language and the embodied meanings of the non knower The Phenomenology claims that the gap can be unconcealed if the knowers of the special language reconsider their assumptions about legal meaning the body and desire With a broad grasp of diverse problematics from the legal procedures legal discourses and legal theory of three jurisdictions to exemplify his claims the author interweaves arguments which draw from Edmund Husserl's and Maurice Merleau Ponty's insights about meaning The author's effort demonstrates how one may unconceal lived laws through a re reading of the role of the experiential body in legal signification The author's effort to retrieve the embodiment of legal meaning destabilizes deep assumptions of contemporary lawyers and legal theorists *Ideologies of Language* John E. Joseph,Talbot J. Taylor,2014-02-03 Is the study of language ideologically neutral If so is this study objective and autonomous One of the most cherished assumptions of modern academic linguistics is that the study of language is or should be ideologically neutral This professed ideological neutrality goes hand in hand with claims of scientific objectivity and explanatory autonomy Ideologies of Language counters these claims and assumptions by demonstrating not only their descriptive inaccuracy but also their conceptual incoherence

Saussure's Philosophy of Language as Phenomenology Beata Stawarska,2015-02-12 This book draws on recent developments in research on Ferdinand de Saussure's general linguistics to challenge the structuralist doctrine associated

with the Course in General Linguistics 1916 and to propose a phenomenological interpretation of Saussure's study of language

The Linguistics of Speech William A. Kretzschmar, 2009-03-19 This insightful study proposes a unified theory of speech through which conflicting ideas about language might be understood. It is founded on a number of key points such as the continuum of linguistic behaviour, extensive variation in language features, the importance of regional and social proximity to shared linguistic production and differential frequency as a key factor in linguistic production both in regional and social groups and in text corpora. The study shows how this new linguistics of speech does not reject rules in favour of language use or reject language use in favour of rules; rather, it shows how rules can come from language as people use it. Written in a clear, engaging style and containing invaluable accessible introductions to complex theoretical concepts, this work will be of great interest to students and scholars of sociolinguistics, dialectology and corpus linguistics.

Reader's Guide to the History of Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals, Einstein, institutions and disciplines. Mathematics, general themes, Romantic Science and central concepts, Paradigm and Fact. The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn.

Performative Linguistics Douglas Robinson, 2003-09-02 In this book Douglas Robinson introduces a new distinction between constative and performative linguistics, arguing that Austin's distinction can be used to understand linguistic methodologies. Constative linguistics, Robinson suggests, includes methodologies aimed at freezing language as an abstract sign system, while performative linguistics explores how language is used or performed in those speech situations. Robinson then tests his hypothesis on the act of translation. Drawing on a range of language scholars and theorists, Performative Linguistics consolidates the many disparate action approaches to language into a new paradigm for the study of language.

Inscribing Science Timothy Lenoir, 1998 Metaphors of inscription and writing figure prominently in all levels of discourse in and about science. The description of nature as a book written in the language of mathematics has been a common trope since at least the time of Galileo, a metaphor supplemented in our own day by the characterization of DNA sequences as the code for the book of life, decipherable in terms of protein semantic units. An important recent direction in the fields of science and literature studies is to consider such descriptions as more than metaphoric, as revelatory of the processes of signification in science more generally. Nearly everywhere we look, the semiotic turn is upon us. Recent science and technology studies have been characterized by a rich diversity of research directions manifesting several trends, apparently counter to one another. On the one hand stands the rich tradition of detailed microstudies of experiments, instruments and scientific practice; on the other hand are grouped studies grander in scope aimed at examining science within the framework of cultural production. This volume of sixteen essays seeks common ground among these different approaches by juxtaposing work from historically focused science and literature studies with work inspired by

poststructuralist philosophy and semiotics The contributors are Gillian Beer Lisa Bloom Robert Brain Lorraine Daston
Richard M Doyle David Gugerli Hans Ulrich Gumbrecht Friedrich Kittler Timothy Lenoir Alex Pang Philip Prodger Hans Jörg
Rheinberger Robin Rider Brian Rotman Simon Schaffer and Bernhard Siegert
