Reading Terminal and Market Carol M. Highsmith, James L. Holton, 1994 **Public Markets and Civic Culture in Nineteenth-Century America** Helen Tangires, 2020-03-24 Originally published in 2003 In Public Markets and Civic Culture in Nineteenth Century America Helen Tangires examines the role of the public marketplace social and architectural as a key site in the development of civic culture in America More than simply places for buying and selling food Tangires explains municipally owned and operated markets were the common ground where citizens and government struggled to define the shared values of the community Public markets were vital to civic policy and reflected the profound belief in the moral economy the effort on the part of the municipality to maintain the social and political health of its community by regulating the ethics of trade in the urban marketplace for food Tangires begins with the social architectural and regulatory components of the public market in the early republic when cities embraced this ancient system of urban food distribution By midcentury the legalization of butcher shops in New York City and the incorporation of market house companies in Pennsylvania challenged the system and hastened the deregulation of this public service Some cities demolished their marketing facilities or loosened restrictions on the food trades in an effort to deal with the privatization movement However several decades of experience with dispersed retailers suburban slaughterhouses and food transported by railroad proved disastrous to the public welfare prompting cities and federal agencies to reclaim this urban civic space **Railroad History**, 1995 **The Middle-Class City** John Henry Hepp, IV, 2018-06-29 The classic historical interpretation of the late nineteenth and early twentieth centuries in America sees this period as a political search for order by the middle class culminating in Progressive Era reforms In The Middle Class City John Hepp examines transformations in everyday middle class life in Philadelphia between 1876 and 1926 to discover the cultural roots of this search for order By looking at complex relationships among members of that city s middle class and three largely bourgeois commercial institutions newspapers department stores and railroads Hepp finds that the men and women of the middle class consistently reordered their world along rational lines According to Hepp this period was rife with evidence of creative reorganization that served to mold middle class life The department store was more than just an expanded dry goods emporium it was a middle class haven of order in the heart of a frenetic city an entirely new way of organizing merchandise for sale Redesigned newspapers brought well ordered news and entertainment to middle class homes and also carried retail advertisements to entice consumers downtown via train and streetcar The complex interiors of urban railroad stations reflected a rationalization of space and rail schedules embodied the modernized specialization of standard time In his fascinating investigation of similar patterns of behavior among commercial institutions Hepp exposes an important intersection between the histories of the city and the middle class In his careful reconstruction of this now vanished culture Hepp examines a wide variety of sources including diaries and memoirs left by middle class women and men of the region Following Philadelphians as they rode trains and

trolleys read newspapers and shopped at department stores he uses their accounts as individualized guidebooks to middle class life in the metropolis And through a creative use of photographs floor plans maps and material culture The Middle Class City helps to reconstruct the physical settings of these enterprises and recreate everyday middle class life shedding new light on an underanalyzed historical group and the cultural history of twentieth century America [Public Markets](#) Helen

Jaquette **Food Justice** Robert Gottlieb,Anupama Joshi,2013-01-25 The story of how the emerging food justice movement is seeking to transform the American food system from seed to table In today s food system farm workers face difficult and hazardous conditions low income neighborhoods lack supermarkets but abound in fast food restaurants and liquor stores food products emphasize convenience rather than wholesomeness and the international reach of American fast food franchises has been a major contributor to an epidemic of globesity To combat these inequities and excesses a movement for food justice has emerged in recent years seeking to transform the food system from seed to table In Food Justice Robert Gottlieb and Anupama Joshi tell the story of this emerging movement A food justice framework ensures that the benefits and risks of how food is grown and processed transported distributed and consumed are shared equitably Gottlieb and Joshi recount the history of food injustices and describe current efforts to change the system including community gardens and farmer training in Holyoke Massachusetts youth empowerment through the Rethinkers in New Orleans farm to school programs across the country and the Los Angeles school system s elimination of sugary soft drinks from its cafeterias And they tell how food activism has succeeded at the highest level advocates waged a grassroots campaign that convinced the Obama White House to plant a vegetable garden The first comprehensive inquiry into this emerging movement Food Justice addresses the increasing disconnect between food and culture that has resulted from our highly industrialized food system

The Problem with Feeding Cities Andrew Deener,2020-10-10 For most people grocery shopping is a mundane activity Few stop to think about the massive global infrastructure that makes it possible to buy Chilean grapes in a Philadelphia supermarket in the middle of winter Yet every piece of food represents an interlocking system of agriculture manufacturing shipping logistics retailing and nonprofits that controls what we eat or don t The Problem with Feeding Cities is a sociological and historical examination of how this remarkable network of abundance and convenience came into being over the last century It looks at how the US food system transformed from feeding communities to feeding the entire nation and it reveals how a process that was once about fulfilling basic needs became focused on satisfying profit margins It is also a story of how this system fails to feed people especially in the creation of food deserts Andrew Deener shows that problems with food access are the result of infrastructural failings stemming from how markets and cities were developed how distribution systems were built and how organizations coordinate the quality and movement of food He profiles hundreds of people connected through the food chain from farmers wholesalers and supermarket executives to global shippers logistics experts

and cold storage operators to food bank employees and public health advocates It is a book that will change the way we see our grocery store trips and will encourage us all to rethink the way we eat in this country **Farmer Direct Marketing Bibliography 2001** Jennifer-Claire V. Klotz,2001 **Historic Landmarks of Philadelphia** Roger W. Moss,2008-11-18 Architectural historian Moss and photographer Crane set out to celebrate the surviving historic architecture of Philadelphia This lavishly illustrated book celebrates Philadelphia s evolution from a modest mercantile outpost of a colonial power to a world renowned cosmopolitan city Bibliographies and Literature of Agriculture ,1978
