Maurer,1971 *Handbook for Professional Development in Human Services* William L. Mermis,Joann Chenault,1979 **Open Standards and the Digital Age** Andrew L. Russell,2014-04-28 How did openness become a foundational value for the networks of the twenty first century Open Standards and the Digital Age answers this question through an interdisciplinary history of information networks that pays close attention to the politics of standardization For much of the twentieth century information networks such as the monopoly Bell System and the American military s Arpanet were closed systems subject to centralized control In the 1970s and 1980s however engineers in the United States and Europe experimented with design strategies to create new digital networks In the process they embraced discourses of openness to describe their ideological commitments to entrepreneurship technological innovation and participatory democracy The rhetoric of openness has flourished for example in movements for open government open source software and open access publishing but such rhetoric also obscures the ways the Internet and other open systems still depend heavily on hierarchical forms of control Experiences of Emerging Economy Firms Marin Marinov,2015-05-05 Experiences of Emerging Economy Firms investigates the different elements of the experiences of emerging economy firms and sheds essential light on a large variety of aspects associated with their functioning in both home and host contexts Regulation and Criminal Justice Hannah Quirk,Toby Seddon,Graham Smith,2010-12-23 While regulatory institutions and strategies have been the subject of increasing academic attention there has been limited application of regulatory theories to criminal justice scholarship This collection of essays from a range of outstanding international scholars adopts a critical interdisciplinary approach providing an innovative application of regulatory theory to the practice of criminal justice and offering suggestions for further research Part I explores the aims and values of criminal justice and other regulatory networks and the synergies and tensions between these fields Part II examines criminal justice as a regulatory force to control deviant and anti social behaviour and Part III examines the regulation and oversight of criminal justice through the operation of prison inspectorates and explores notions of responsive justice **Professionals and Urban Form** Judith R. Blau,Mark E. La Gory,John S. Pipkin,1984-06-30 **Professionals and Urban Form** departs from the usual way of studying the city to examine the chief professions responsible for designing urban places planning and architecture Not often treated together they are here combined to highlight common problems and lines of convergence between the two The architects planners and social scientists who contributed to this book concern themselves with the interconnection between knowledge and practice in planning and architecture paying particular attention to the issues of whether design knowledge and theory can or should be distinct from social science knowledge and the effects of professionalization and institutionalization on the structuring of inquiry and theory The main sections of the book deal with the history of the design professions epistemological foundations

professions and practice and controversies in practice Many issues of contemporary interest to planners are dealt with including the debates over normative advocacy and communicative planning Marxist perspectives supply and demand in the job market for architects and the overarching epistemological question of the relationship between social science research and design practice **International Encyclopedia of Organization Studies** Stewart Clegg, James R.
