Real Time Database Systems Architecture And Techniques:

Real-Time Database Systems Kam-Yiu Lam, Tei-Wei Kuo, 2000-11-30 In recent years tremendous research has been devoted to the design of database systems for real time applications called real time database systems RTDBS where transactions are associated with deadlines on their completion times and some of the data objects in the database are associated with temporal constraints on their validity Examples of important applications of RTDBS include stock trading systems navigation systems and computer integrated manufacturing Different transaction scheduling algorithms and concurrency control protocols have been proposed to satisfy transaction timing data temporal constraints Other design issues important to the performance of a RTDBS are buffer management index accesses and I O scheduling **Real Time Database Systems Architecture and Techniques** summarizes important research results in this area and serves as an excellent reference for practitioners researchers and educators of real time systems and database systems

XML-Based Data Management and Multimedia Engineering - EDBT 2002 Workshops Akmal B. Chaudhri, Chabane Djeraba, Rainer Unland, Wolfgang Lindner, 2003-08-02 This volume comprises papers from the following three workshops that were part of the complete program for the International Conference on Extending Database Technology EDBT held in Prague Czech Republic in March 2002 XML Based Data Management XMLDM Second International Workshop on Multimedia Data and Document Engineering MDDE Young Researchers Workshop YRWS

Together the three workshops featured 48 high quality papers selected from approximately 130 submissions. It was therefore difficult to decide on the papers that were to be accepted for presentation. We believe that the accepted papers substantially contribute to their particular fields of research. The workshops were an excellent basis for intense and highly fruitful discussions. The quality and quantity of papers show that the areas of interest for the workshops are highly active. A large number of excellent researchers are working in relevant fields producing research output that is not only of interest to other researchers but also for industry. The organizers and participants of the workshops were highly satisfied with the output. The high quality of the presenters and workshop participants contributed to the success of each workshop. The amazing environment of Prague and the location of the EDBT conference also contributed to the overall success. Last but not least our sincere thanks to the conference organizers: the organizing team was always willing to help and if there were things that did not work assistance was quickly available.

Database and Expert Systems Applications Trevor Bench-Capon, Giovanni Soda, A Min Tjoa, 2003-07-31. The Database and Expert Systems Applications DEXA conferences bring together researchers and practitioners from all over the world to exchange ideas, experiences and opinions in a friendly and stimulating environment. The papers are at once a record of what has been achieved and the first steps towards shaping the future of information systems. DEXA covers a broad field and all aspects of database knowledge base and related technologies and their applications are represented. Once again there were a good number of submissions: 241 papers were submitted and of these the programme committee selected 103 to be presented. DEXA 99 took place in Florence and was the tenth conference in the series following events in Vienna, Berlin, Valencia, Prague, Athens, London, Zurich, Toulouse and Vienna. The decade has seen many developments in the areas covered by DEXA: developments in which DEXA has played its part. I would like to express thanks to all the institutions which have actively supported and made possible this conference: namely University of Florence, Italy; IDG, CNR, Italy; FAW, University of Linz, Austria; Austrian Computer Society; DEXA Association. In addition we must thank all the people who have contributed their time and effort to make the conference possible. Special thanks go to Maria Schweikert, Technical University of Vienna; M Neubauer and G Wagner, FAW, University of Linz. We must also thank all the members of the programme committee whose careful reviews are important to the quality of the conference.

Real-Time Database Systems Azer Bestavros, Kwei-Jay Lin, Sang Hyuk Son, 2012-12-06. Despite the growing interest in Real Time Database Systems, there is no single book that acts as a reference to academics, professionals and practitioners who wish to understand the issues involved in the design and development of RTDBS. Real Time Database Systems: Issues and Applications fulfills this need. This book presents the spectrum of issues that may arise in various real time database applications, the available solutions and technologies that may be used to address these issues and the open problems that need to be tackled in the future. With rapid advances in this area, several concepts have been proposed without a widely accepted consensus on their definitions and implications. To address this need, the first chapter is an introduction to the key

RTDBS concepts and definitions which is followed by a survey of the state of the art in RTDBS research and practice The remainder of the book consists of four sections models and paradigms applications and benchmarks scheduling and concurrency control and experimental systems The chapters in each section are contributed by experts in the respective areas Real Time Database Systems Issues and Applications is primarily intended for practicing engineers and researchers working in the growing area of real time database systems For practitioners the book will provide a much needed bridge for technology transfer and continued education For researchers this book will provide a comprehensive reference for well established results This book can also be used in a senior or graduate level course on real time systems real time database systems and database systems or closely related courses
