Realism In Green Politics Social Movements And Ecological Reform In Germany:

Realism in Green Politics Helmut Wiesensthal,1993 This study provides a critique of ecological fundamentalism based on the experience of West German Green politics It proposes structural reforms for achieving sustainable resources in modern societies and advocates political realism as the best way to reconcile social and ecological objects *Ideas and Actions in the Green Movement* Brian Doherty,2005-07-05 The Western green movement has grown rapidly in the last three decades green ministers are in government in several European countries Greenpeace has millions of paying supporters and green direct action against roads GM crops the WTO and neo liberalism have become ubiquitous The author argues that greens share a common ideological framework but are divided over strategy Using social movement theory and drawing on research from many countries he shows how the green movement became more differentiated over time as groups had to face the task of deciding what kind of action was appropriate In the breadth of its coverage and its novel focus on the relationship between green ideas and action this book makes an important contribution to the understanding of green politics The Left Libertarianism of the Greens Kire Sharlamanov,2023-08-03 This book offers a systematic and multifaceted analysis of the Greens on the levels of political philosophy political concepts social movement political parties and political ideology The originality of the book lies in the determination of the political philosophy of the Greens as left libertarianism Such a determination of the Greens can already be found in the writings of Herbert Kitschelt but while he only makes a cursory mention of it this book offers a detailed elaboration of the points of contact between left libertarianism and the Greens The book also attempts to explain the acceptance of left libertarianism by the Greens with social processes in Western Europe the emergence of a new middle class and post materialist values At the same time the book examines the relationship between the left libertarian political philosophy of the Greens and the organizational structure of the Green parties their relationship to the state and to democracy **Critical Political Studies** Abigail B. similarities than differences characterized the sociopolitical concerns of East and West Germans during the late Cold War Era and that it was these shared issues that were reflected in the revival of the Romantic painting genre Catherine Wilkins focuses on recovering the agency of the individual artist and in revising historiography with sensitivity to narration from below Interdisciplinary in nature art historians can benefit from the study's analysis of images and artists not widely known outside of Germany Additionally the consolidation of statistics and data regarding German postwar cultural policy are relevant for political and cultural historians The author contributes to the ongoing multidisciplinary debates regarding Histoire Crois in arguing that a clear dichotomy between East Germany and West Germany did not exist but rather that the residents of both nations shared a concern over some of the same issues of the period and memory studies by using images as primary historical sources able to be employed in the recovery of potentially subversive memory and identity Issues related to gender relations environmentalism and spiritual belief are addressed by Wilkins with appeal for scholars working with those particular themes Poststructuralist and literary theorists as well can find arguments supporting an alternative means of writing history through artworks and private memories

Imagining the Nation in Nature Thomas M. LEKAN, Thomas M Lekan, 2009-06-30 One of the most powerful nationalist ideas in modern Europe is the assertion that there is a link between people and their landscape Focusing on the heart of German romanticism the Rhineland Thomas Lekan examines nature protection activities from Wilhelmine Germany through the end of the Nazi era to illuminate the relationship between environmental reform and the cultural construction of national identity In the late nineteenth century anxieties about national character infused ecological concerns about industrialization spurring landscape preservationists to protect the natural environment In the Rhineland's scenic rivers forests and natural landmarks they saw Germany as a timeless and organic nation rather than a recently patchworked political construct Landscape preservation also served conservative social ends during a period of rapid modernization as outdoor pursuits were promoted to redirect class conscious factory workers and unruly youth from crass materialism to the German homeland Lekan's examination of Nazi environmental policy challenges recent work on the green Nazis by showing that the Third Reich systematically subordinated environmental concerns to war mobilization and racial hygiene This book is an original contribution not only to studies of

national identity in modern Germany but also to the growing field of European environmental history

Writing squarely within the idiom of the invented tradition and the imagined nation Thomas Lekan argues that in the wake of belated unification and at a time of rapid industrialization the German landscape came to be seen as a touchstone of national identity He questions the idea that those engaged in landscape preservation were simply antimodern and he challenges both scholars who have seen a straightforward continuity from pre 1933 preservationist sentiment to Nazism and those who have made exaggerated claims for the Third Reich as the progenitor of modern green politics This is a welcome contribution to the literature on local and national identity joining works by Celia Applegate and Alon Confino and on the environmental history of modern Germany Both scholarly and original *Imagining the Nation in Nature* is an impressive achievement David Blackbourn Harvard University This important and timely book contributes to our understanding of German identity as well as to modern concepts of environmentalism and nature Lekan's valuable contribution elucidates the modern technocratic and therapeutic vision of preservation that linked Weimar and the Third Reich His analysis of Nazi bio nature is significant and thought provoking Alon Confino University of Virginia

Deliberative Democracy and Beyond John S. Dryzek, 2002 The past few years have seen a remarkable ferment in the theory of democracy *Deliberative Democracy and Beyond* is a critical tour through recent democratic theory by one of the leading political theorists in the field It examines the deliberative turn in democratic theory which argued that the essence of democratic legitimacy is to be found in authentic deliberations on the part of those affected by a collective decision The deliberative turn began as a challenge to established institutions and models of democracy but it has now been largely assimilated by these same institutions and models Drawing a distinction between liberal constitutionalist deliberative democracy and discursive democracy the author criticizes the former and advocates the latter He argues that a defensible theory of democracy should be critical of established power pluralistic reflexive in its questioning orientation to established traditions transnational in its capacity to extend across state boundaries ecological and dynamic in its openness to ever changing constraints upon and opportunities for democratization Dryzek's reinvigorated approach enables deliberative democracy to respond more effectively to the criticisms that have been leveled against it Oxford Political Theory presents the best new work in contemporary political theory It is intended to be broad in scope including original contributions to political philosophy and also work in applied political theory The series will contain works of outstanding quality with no restrictions as to approach subject matter Series Editors Will Kymlicka David Miller and Alan Ryan

Social Movements in Global Politics David West, 2014-01-30 Social Movements in Global Politics is a timely new account of the unconventional extra institutional activities of social movements In the face of impending global crises and stubborn conflicts a conventional view of politics risks leaving us confused and fatalistic feeling powerless because we are unaware of all that can be achieved by political means By contrast a variety of recent social movements ranging from those of women gays and lesbians and anti racists to environmentalists the

Occupy movement and the Arab Spring demonstrate the enormous potential of political action beyond the institutional sphere of politics. At the same time religious fundamentalists, racial supremacists and ultra nationalists make clear that movements are not necessarily progressive and are often at odds with one another. West highlights the many ways in which national and global institutions depend on a broader context of extra institutional action or what is in effect the formative dimension of politics. He explores some of the major contributions of social movements from the genealogy of liberal democratic nation states, sixties radicalism and the new social movements to the politics of sexuality, gender and identity, the politicization of nature and climate and alter globalization. The book also considers current theoretical approaches and sets out the basis for a critical theory of social movements. This is a fresh and original account of social movements in politics and will be essential reading for any students and scholars interested in the challenges and the unpredictable potential of political action.
