Reality Fundamental Topics In Metaphysics:

Reality Peter Loftson, 2010-10-27 In *Reality Fundamental Topics in Metaphysics* Peter Loftson argues for a conception of metaphysics as the most general or comprehensive method of inquiry Working from a broadly analytic and naturalist perspective he confronts positions that claim metaphysics to be impossible as advanced in ancient Kantian post Kantian and contemporary philosophy showing them to be unsuccessful He draws the topics of his selective investigation of metaphysics partly from the work of Kant whom he conceives as a primary guide to what metaphysical enquiry seeks to know Loftson provides accounts of basic categories of what is real and outlines major historical metaphysical systems He then goes on to explore aspects of existence essence substance universals space time causality mind freedom and other topics This important contribution to metaphysics offers both sustained arguments on all aspects of the subject and important insights into the major metaphysical systems from the history of philosophy

Reality Peter Loftson, 2001 In this compelling work Peter Loftson provides an accessible exploration of the major topics in metaphysics He considers problems such as essence existence substance purpose space time mind causality God freedom and the possibilities of immortality In addition he looks at the major historical metaphysical systems and defends the metaphysical project as a whole The book offers both historical and contemporary perspectives and includes Loftson's lucid arguments in which he propounds a naturalist and common sense view of the world Loftson defends the ineliminability and the logical or categorical mutual irreducibility of individual substances he advocates an empiricist view of space but a rationalist view of time and he presents a treatment of possible worlds that limits them to cases with only actual members In a special contribution he explores the idea of metaphysical luck which leads to puzzling and significant results Replete with historical references explanations of terminology and directional signposts the book provides an excellent companion to metaphysical studies filling a gap for scholars and specialists in this field

Reality Making Mark Jago, 2016-02-12 What makes up reality and how What kinds of entity are fundamental to reality and how do dependent entities depend on the fundamental ones How does one entity metaphysically ground another These questions are central to contemporary metaphysics The papers in this collection written by a new generation of metaphysicians address these and related questions They investigate the metaphysical concepts of grounding and fundamentality and the relationship between the fundamental and all the other parts of reality Together these papers represent the cutting edge of a central topic in contemporary metaphysics

First Philosophy III: God, Mind, and Freedom Andrew Bailey, 2004-08-06 *First Philosophy God Mind and Freedom* brings together classic and ground breaking readings on metaphysics the philosophy of mind and the philosophy of religion Mindful of the intrinsic difficulty of much of the material the editor has provided comprehensive introductions both to the central topics and to each individual selection By providing a detailed discussion of the historical and intellectual background to each piece he aims to enable readers to approach the material without unnecessary barriers to understanding In an introductory chapter the editor provides a brief introduction to

the nature of philosophical enquiry to the nature of argument and to the process of reading and writing within the academic discipline of philosophy *Chasing Reality* Mario Bunge, Professor Mario Bunge, 2006-01-01 Dealing with the controversies over the reality of the external world this work offers a defense of realism a critique of various forms of contemporary anti realism and a sketch of the author's version of realism namely hylorealism It examines the main varieties of antirealism and argues that all of these in fact hinder scientific research **The New Yearbook for Phenomenology and**

Meinong** Nicholas Griffin, Dale Jacquette, 2008-11-19 A century after On Denoting was published the debate it initiated continues This erudite volume provides an overview of the latest scholarship on Russell and Meinong as well as detailed accounts of some of the problems facing the current incarnations of their theories An Essay on Ontology Joseph Kaipayil, 2008 Freedom, Nature, and World Peter Loftson, 2008-01-31 Freedom Nature and World is a collection of essays by Peter Loftson which examine issues posed by a broadly naturalistic view of the world which Loftson defends while also exploring some of the challenges it confronts Papers on freedom Kant Christianity Homer the history of analytic philosophy the place of humanity in nature and other topics are brought together within a synoptically naturalistic purview All the essays rest on and in some cases extend that synoptic perspective which seeks to encompass both a scientific understanding of humankind in the natural world and the complexities of free rational agency within our cultural and historical settings Published in English

Metaphysics Hector Davidson, Metaphysics is a branch of philosophy that explores the fundamental nature of reality

addressing the most profound questions about existence the nature of objects time space causality and the universe itself As one of the oldest areas of philosophical inquiry metaphysics seeks to answer questions that lie at the core of our understanding of the world and our place within it The term metaphysics derives from the Greek words meta beyond and physika the physical reflecting the idea of examining that which transcends the physical world and investigates the very structure of reality At its core metaphysics asks What is there What is it like How do things exist and what is the nature of their existence These questions are timeless and their answers have evolved over centuries often influencing or being influenced by developments in other branches of philosophy science and theology In examining the nature of reality metaphysicians delve into topics like the nature of objects and their properties the concept of identity and change the structure of time and space and the possibility of alternate realities The scope of metaphysical inquiry is vast One of the primary areas it addresses is ontology which concerns the study of being and existence Ontological questions include inquiries into the types of entities that exist whether abstract entities like numbers or concepts exist independently of human thought and whether the universe is fundamentally composed of matter or something more fundamental like energy or consciousness

Mystery 101 Richard H. Jones, 2018-02-15 Offering readers much to ponder Richard H Jones approaches the big questions of philosophy such as the nature of reality consciousness free will the existence of God and the meaning of life not by weighing the merits of leading arguments in these debates but instead by questioning the extent to which we are even in a position to answer such questions in the first place Regardless of continuous technical and even groundbreaking advances in knowledge there will always be gaps in what we can fully understand Distinguishing true mysteries from problems yet to be solved but within the scope of our intellectual grasp Jones provides a penetrating and high level overview of the scope and limits of scientific and philosophical inquiry

Fundamentals of Philosophy John Shand, 2004-03-01 Fundamentals of Philosophy is a comprehensive and accessible introduction to philosophy Based on the well known series of the same name this textbook brings together specially commissioned articles by leading philosophers of philosophy s key topics Each chapter provides an authoritative overview of topics commonly taught at undergraduate level focusing on the major issues that typically arise when studying the subject Discussions are up to date and written in an engaging manner so as to provide students with the core building blocks of their degree course Fundamentals of Philosophy is an ideal starting point for those coming to philosophy for the first time and will be a useful complement to the primary texts studied at undergraduate level Ideally suited to novice philosophy students it will also be of interest to those in related subjects across the humanities and social sciences

Making Things Up Karen Bennett, 2017-05-19 A certain kind of talk is ubiquitous among both philosophers and so called ordinary people talk of one phenomenon generating or giving rise to another or talk of one phenomenon being based in or constructed from another For example your computer screen is built of atoms in a complex configuration and the picture on the screen is based in the local illumination of various individual pixels Karen

Bennett calls the family of relations invoked by such talk building relations Grounding is one currently popular such relation so too are composition property realization and controversially causation In chapters 2 and 3 Bennett argues that despite their differences building relations form an interestingly unified family and characterizes what all building relations have in common In chapter 4 she argues that it s a mistake to think there is a strict divide between causal and noncausal determination Chapters 5 and 6 turn to the connections between building and fundamentality Bennett argues at length that both absolute and relative fundamentality are best understood in terms of building and that to say that one thing is more fundamental than another is to say no more than that certain patterns of building obtain In chapter 7 Bennett argues that facts about what builds what must be themselves built if a builds b there is something in virtue of which that is the case She also argues that the answer is a itself Finally in chapter 8 she defends an assumption that runs throughout the rest of the book namely that there indeed are nonfundamental built entities Doing so involves substantive discussion about the scope of Ockham s Razor Bennett argues that some nonfundamentalia are among the proper subject matter of metaphysics and thus that metaphysics is not best understood as the study of the fundamental nature of reality

Ontology and Metaontology
 Francesco Berto, Matteo Plebani, 2015-01-29 Ontology and Metaontology A Contemporary Guide is a clear and accessible survey of ontology focusing on the most recent trends in the discipline Divided into parts the first half characterizes metaontology the discourse on the methodology of ontological inquiry covering the main concepts tools and methods of the discipline exploring the notions of being and existence ontological commitment paraphrase strategies fictionalist strategies and other metaontological questions The second half considers a series of case studies introducing and familiarizing the reader with concrete examples of the latest research in the field The basic sub fields of ontology are covered here via an accessible and captivating exposition events properties universals abstract objects possible worlds material beings mereology fictional objects The guide s modular structure allows for a flexible approach to the subject making it suitable for both undergraduates and postgraduates looking to better understand and apply the exciting developments and debates taking place in ontology today

In the Agora John Ralston Saul, 2006-01-01 A spirited and engaging read In the Agora effectively illustrates how Canadian philosophers have contributed to public discourse and enriched our world It is a collection that is sure to prompt both interest and debate
