Recent Advances in Epilepsy Timothy A. Pedley, Brian S. Meldrum, 1986 *Recent advances in the treatment of epilepsy* Khojasteh Malekmohammad, Mahmoud Rafieian-Kopaei, Antonella Riva, 2024-07-22 Epilepsy is one of the most common neurological chronic disorders characterized by unpredictable recurrent seizures which leads to brain dysfunction cognitive psychological and social disorders Various treatment options for epilepsy are antiepileptic drugs surgery neuromodulation gene therapy and ketogenic diet However definitions diagnosis and treatment of epilepsy are still challenging issues for clinicians and researchers Antiepileptic drugs play a central and crucial role in the treatment of epilepsy patients Brivaracetam Cannabidiol CBD Cenobamate Everolimus and Fenfluramine are the five novel anticonvulsant drugs during the

last 5 years Brivaracetam anticonvulsant effects are due to its highly selective affinity for synaptic vesicle protein 2A SV2A in the brain It is act as an SV2A ligand Among these drugs Cannabidiol is one of the prominent phytocannabinoids derived from the cannabis sativa The anticonvulsant mechanisms of action of CBD including antagonism of G protein coupled receptor 55 GPR55 desensitization of transient receptor potential vanilloid type 1 TRPV1 channels and potentiation of adenosine mediated signaling through inhibition of the equilibrative nucleoside transporter 1 ENT 1 and enhancement of GABAergic transmission The mechanisms of the antiseizure effect of Cenobamate are increasing the inactivated state of voltage gated sodium channels and acting as a positive allosteric modulator of the GABA A receptors by binding at a non benzodiazepine site Everolimus is a mammalian target of rapamycin mTOR inhibitor Fenfluramine is able to enhance extracellular serotonin levels modulate serotonergic and other neurologic receptors Nevertheless the exact mechanism of action of most of these drugs is unknown At least 30% of people with epilepsy have drug resistant epilepsy DRE therefore non pharmacological treatments have been considered the Vagus Nerve Stimulation VNS Trigeminal Nerve Stimulation TNS Transcranial Direct Current Stimulation tDCS Transcranial Magnetic Stimulation TMS are the most common neuromodulation based approaches Also in recent years a new field of GABA adenosine galanin and neuropeptide Y based cell and gene therapies for refractory epilepsy has emerged In spite of these advances significant gaps in knowledge still remain In particular the mechanisms underlying epilepsy including status epilepticus drug and surgical treatments are still not well elucidated Novel insights on pathophysiological mechanisms of epilepsy and new treatment options prompted us to collect the most recent publications on pharmacological and non pharmacological treatments of epilepsy So in this Research Topic we will focus on the advances in the field of treatment in epilepsy the pathophysiology and molecular aspects of seizure attacks and novel antiseizure medications

Recent Advances in Immunology to Target Cancer, Inflammation and Infections Jagat Kanwar, 2012-05-09 Immunology is the branch of biomedical sciences to study of the immune system physiology both in healthy and diseased states Some aspects of autoimmunity draws our attention to the fact that it is not always associated with pathology For instance autoimmune reactions are highly useful in clearing off the excess unwanted or aged tissues from the body Also generation of autoimmunity occurs after the exposure to the non self antigen that is structurally similar to the self aided by the stimulatory

molecules like the cytokines Thus a narrow margin differentiates immunity from auto immunity as already discussed Hence finding answers for how the physiologic immunity turns to pathologic autoimmunity always remains a question of intense interest However this margin could be cut down only if the physiology of the immune system is better understood The individual chapters included in this book will cover all the possible aspects of immunology and pathologies associated with it The authors have taken strenuous effort in elaborating the concepts that are lucid and will be of reader s interest
