Since 1998 RAID has established its reputation as the main event in research on intrusion detection both in Europe and the United States. Every year RAID gathers researchers, security vendors, and security practitioners to listen to the most recent research results in the area as well as experiments and deployment issues. This year RAID has grown one step further to establish itself as a well-known event in the security community with the publication of hardcopy proceedings. RAID 2000 received 26 paper submissions from 10 countries and 3 continents. The program committee selected 14 papers for publication and examined 6 of them for presentation. In addition, RAID 2000 received 30 extended abstracts proposals; 15 of these extended abstracts were accepted for presentation. Extended abstracts are available on the website of the RAID symposium series: <http://www.raid-symposium.org>. We would like to thank the technical program committee for the help we received in reviewing the papers as well as all the authors for their participation and submissions, even for those rejected. As in previous RAID symposiums, the program alternates between fundamental research issues such as new technologies for intrusion detection and more practical issues linked to the deployment and operation of intrusion detection systems in a real environment. Five sessions have been devoted to intrusion detection technology, including modeling, data mining, and advanced techniques. On behalf of the program committee, it is our pleasure to present to you the proceedings of the fourth Recent Advances in Intrusion Detection Symposium. The RAID 2001 program committee received 55 paper submissions from 13 countries. All submissions were carefully reviewed by several members of the program committee on the criteria of scientific novelty, importance to the field, and technical quality. Final selection took place at a meeting held on May 16-17 in Oakland, California. Twelve papers were selected for presentation and publication in the conference proceedings. In addition, nine papers presenting work in progress were selected for presentation. The program included both fundamental research and practical issues: logging and IDS integration, attack modeling, anomaly detection, specification-based IDS, IDS assessment, IDS cooperation, intrusion tolerance, and legal aspects. RAID 2001 also hosted two panels: one on "The Present and Future of IDS Testing Methodologies," a subject of major concern for all IDS users and designers, and one on "Intrusion Tolerance," an emerging research area of increasing importance. Dr. Bill Hancock, Senior Vice President and Chief Security Officer of Exodus Communications Inc., delivered a keynote speech: "Real world intrusion detection or how not to become a deer in the headlights of an attacker's car on the information superhighway." The slides presented by the authors of the 9 papers which are not in the proceedings and the slides presented by the panelists are available on the website of the RAID symposium series.

Recent Advances in Intrusion Detection Engin Kirda, Somesh Jha, Davide Balzarotti, 2009-09-11 On behalf of the Program Committee it is our pleasure to present the proceedings of the 12th International Symposium on Recent Advances in Intrusion Detection systems RAID 2009 which took place in Saint Malo France during September 23-25 As in the past the symposium brought together leading researchers and practitioners from academia government and industry to discuss intrusion detection research and practice There were six main sessions presenting full research papers on anomaly and specification based approaches malware detection and prevention network and host intrusion detection and prevention intrusion detection for mobile devices and high performance intrusion detection Furthermore there was a poster session on emerging research areas and case studies The RAID 2009 Program Committee received 59 full paper submissions from all over the world All submissions were carefully reviewed by independent reviewers on the basis of space topic technical assessment and overall balance The final selection took place at the Program Committee meeting on May 21 in Oakland California In all 17 papers were selected for presentation and publication in the conference proceedings As a continued feature the symposium accepted submissions for poster presentations which have been published as extended abstracts reporting early stage research demonstration of applications or case studies Thirty posters were submitted for a numerical review by an independent three person sub committee of the Program Committee based on novelty description and evaluation The sub committee recommended the acceptance of 16 of these posters for presentation and publication The success of RAID 2009 depended on the joint effort of many people

Recent Advances in Intrusion Detection Richard Lippmann, Engin Kirda, Ari Trachtenberg, 2008-09-18 On behalf of the Program Committee it is our pleasure to present the proceedings of the 11th International Symposium on Recent Advances in Intrusion Detection RAID 2008 which took place in Cambridge Massachusetts USA on September 15-17 The symposium brought together leading researchers and practitioners from academia government and industry to discuss intrusion detection research and practice There were six main sessions presenting full edged research papers rootkit prevention malware detection and prevention high performance intrusion and evasion web application testing and evasion alert correlation and worm detection and anomaly detection and network traffic analysis a session of poster on emerging research areas and case studies and two panel discussions Government Investments Successes Failures and the Future and Life after Antivirus What Does the Future Hold The RAID 2008 Program Committee received 80 paper submissions from all over the world All submissions were carefully reviewed by at least three independent reviewers on the basis of space topic technical assessment and overall balance

Final selection took place at the Program Committee meeting on May 23rd in Cambridge MA. Twenty papers were selected for presentation and publication in the conference proceedings and four papers were recommended for resubmission as poster presentations. As a new feature this year the symposium accepted submissions for poster presentations which have been published as extended abstracts reporting gear stage research demonstration of applications or case studies. Thirty nine posters were submitted for a numerical review by an independent three person subcommittee of the Program Committee based on novelty, description and evaluation. The subcommittee chose to recommend the acceptance of 16 of these posters for presentation and publication.

Recent Advances in Intrusion Detection Somesh Jha, Robin Sommer, Christian Kreibich, 2010-09-02. This book constitutes the refereed proceedings of the 13th International Symposium on Recent Advances in Intrusion Detection RAID 2010 held in Ottawa, Canada, in September 2010. The 24 revised full papers presented together with 15 revised poster papers were carefully reviewed and selected from 102 submissions. The papers are organized in topical sections on network protection, high performance malware detection and defence evaluation, forensics, anomaly detection as well as web security.
