Indopathy for Neuroprotection: Recent Advances Surya Pratap Singh, Hagera Dilnashin, Hareram Birla, Chetan Keswani, 2022-12-07 Degenerative nerve diseases are age-related, progressive and cause irreversible neurological loss that may lead to death. Chronic diseases like amyotrophic lateral sclerosis, Huntington's disease, Alzheimer's disease and Parkinson's disease are associated with insoluble protein depositions and pose serious health challenges that may intensify in the coming decades. Current therapies only help to alleviate some of the physical or mental symptoms associated with neurodegenerative diseases, although there is currently no remedy for slow disease progression. In recent years, attempts have been made to discover a mechanism for neurodegenerative diseases and prospective treatment that may help mitigate aging effects and prevent these diseases. Natural products have been a constant source of new approaches for the treatment of neurodegenerative diseases, in particular plant alkaloids and polyphenolic compounds. *Indopathy for Neuroprotection: Recent Advances* highlights herbal treatments that are preferred over conventional treatments in some regions. Book chapters focus on the effects of various medicinal plants that have shown promise in reversing pathological symptoms of neurodegenerative disease and highlight the neuroprotective role of medicinal herbal phytochemicals and their mechanism of action. The book serves as a reference for pharmacology and herbal medicine scholars as well as healthcare workers interested in information about alternative and complementary therapies for neurological disorders. **Pharmacotherapy of Alzheimer's Disease** Serge Gauthier, 1998-01-01 This thorough guide details clinical trials, the drugs currently available and the expectations of the doctor, family and carer. **Alzheimer Disease** Robert Becker, Ezio Giacobini, 1996-12-01 This

volume reviews the new potential treatments and research in the area of Alzheimer's disease. Special attention is given to international developments in all fields relevant to new drug development. Topics discussed include progress in the international harmonization of drug development guidelines for dementia drugs, bioethics and law, development of rating instruments, behavioural treatments and the activities of the Reagan Foundation. The text integrates basic and clinical research findings and provides evaluation of new approaches to therapy by world leaders in the field. The potential benefit for Alzheimer patients and families resulting from these research programmes from molecular biology to clinical pharmacology is reviewed and evaluated. *Recent Advances in Computational Intelligence and Cyber Security* Ashok Kumar
