Religion and the Scientific Future Langdon Gilkey, 1981 **Religion and the scientific future : Reflections on myth, science, and theology** Langdon Gilkey, 1981 **God-creature-revelation** Jerry D. Korsmeyer, 1995 Educated Western Christians seek to understand the scientific basis of evolution as well as to justify why a God worth worshipping can be responsible yet not indictable for evil The author creates an innovative theological framework that addresses these concerns and provides part of a structure for fundamental theology which is based on the neoclassical metaphysics of Charles Hartshorne and the speculative cosmology of Alfred North Whitehead His model of the divine has three basic principles God is love God is the creator and this creativity is an integral part of divine essence From this model he develops a fundamental theology which focuses on the nature of divinity the interaction between human and the divine and divine revelation He attributes much of his own concept of revelation to Whitehead's model in which revelation is indicative of a successful communion between human and divine This revelation is achieved through symbolic mediation and it is as much interpersonal reconciliation as it is a universal resonance of the creative essence between heaven and earth This framework shows initial agreement with Christian traditions it is highly coherent universal in scope and most importantly it has rich potential for future Christian understanding **Library of Congress Catalogs** Library of Congress, 1983 **Monographic Series** Library of Congress, *Subject Catalog*, 1982 Library of Congress, 1982 **Philosophy in Context**, 1978 **The Cumulative Book Index**, 1982 A world list of books in the English language **Philosophy and Myth**, 1978 **National Union Catalog, 1982**, 1983 **Nature in Grace** Claude Y.
