The liberal view at the global level is also examined and observations are included regarding the need to rethink secularism in the light of present circumstances and within the global context.

*The Virgin Mary and Catholic Identities in Chinese History* Jeremy Clarke, 2013-08-01. The Chinese Catholic Church traces its living roots back to the late sixteenth century and its historical roots back even further to the Yuan dynasty. This book explores paintings and sculptures of the Virgin Mary and the communities that produced them over several centuries. It argues for the emergence of distinctly Chinese Catholic identities as artistic representations of the Virgin Mary at different times and in different places absorbed and in turn influenced representations of Chinese figures from Guanyin to the Empress Dowager. At other times indigenous styles have been diluted by Western influences following the influx of European missionaries in the nineteenth century for example or with globalization in recent years. The book engages with history, theology and art and draws on imagery and archival photographs that have been largely neglected. As a study of the social and cultural histories of communities that have survived over many centuries, this book offers a new view of Catholicism in China, one that sees its history as more than simply a cycle of persecution and resistance.

**Understanding World Christianity** Kim-kwong Chan, 2019-09-03. Christianity is a global religion. It's an obvious fact but one often missed or ignored in too many books and conversations. In a world where Christianity is growing everywhere but the West, the Understanding World Christianity series offers a fresh, readable orientation to Christianity around the world. Understanding World Christianity is organized geographically by nation and region. Noted experts in most cases native to the area of focus present a balanced history of Christianity and a detailed discussion of the faith as it is lived today. Each volume addresses six key intersections of Christianity in a given context, including the historical, denominational, sociopolitical, geographical, biographical and theological settings. Accessible in tone and brief in length, the volume on China in the Understanding World Christianity series is an ideal introduction for students, mission leaders and any others who wish to know how Christianity is influenced and is influenced by the Chinese context.

*The Politics of Protestant Churches and the Party-State in China* Carsten Vala, 2017-09-06. Among China's restive religious and social groups, Protestants have arguably created the most sustained structural challenges to the Chinese Communist Party's ordering of society. By drawing on grassroots fieldwork conducted across the country, this book therefore

charts the ambition of the government to restrain Protestant population growth and direct it towards regime purposes. In particular, interviews with key church leaders who founded illegal Protestant congregations with hundreds of participants reveal how officials and illegal congregational leaders have developed ties of trust and information that have permitted church growth even as they preserve a public image of Party domination. Thus, by tracing the rise of large illegal Protestant congregations apart from Party state structures, this book highlights the importance of the public behaviour of religious actors and regime officials in understanding the dynamics of negotiation, domination and resistance in 21st century China. Ultimately, *The Politics of Protestant Churches and the Party State in China* paradoxically demonstrates that societal actors can alter the boundaries set by the Chinese Communist Party and the ways in which the Party is both more adaptive and resilient in its relations with society than first imagined. Offering the first book-length analysis of how ambitious Protestants have founded large unregistered churches despite regime pressure, this book will be useful for students and scholars of Chinese Politics, Chinese Religion and Sociology. — *Christianity and Religious Plurality* Wilbert R. Shenk, Richard J. Plantinga, 2016-10-11. Over the past two centuries, the Christian faith has spread to all continents. Although more global than ever, Christians are religious minorities in most societies. Religious freedom is hardly universal. In the past fifty years, millions of people have been uprooted from their traditional homelands in Asia, Africa and Latin America. Some have emigrated to Western Europe and North America. The West has become the scene of cultural, linguistic and religious variety on a scale unimagined in 1900. Today, the full range of faiths and religious practices from all continents are present in Europe and North America. Christians are challenged to come to terms with this changed situation. These developments have intensified religious plurality. Christians all over the world are being urged to understand and engage with this new situation. This volume highlights this new reality and specifies some sources for engagement, not least among them, the Judeo-Christian scriptures fundamental to all Christianities that emerged out of religious plural contexts. On the basis of their faith in the Triune God disclosed in this text, all followers of Jesus Christ must interact with these opportunities in today's radically context-sensitive world. — *Religion and Human Rights* John Witte, M. Christian Green, 2012. The relationship between religion and human rights is both complex and inextricable. While most of the world's religions have supported violence, repression and prejudice, each has also played a crucial role in the modern struggle for universal human rights. Most importantly, religions provide the essential sources and scales of dignity and responsibility, shame and respect, restraint and regret, restitution and reconciliation that a human rights regime needs to survive and flourish in any culture. This volume provides authoritative examinations of the contributions to human rights of Judaism, Christianity, Islam, Hinduism, Confucianism, Buddhism and indigenous religions. Each chapter grapples with the concept and origins of human rights and offers insight into the major human rights issues that confront religious individuals and communities. These include core issues of freedom of religious conscience, choice, exercise, expression, association, morality and self-determination. They also

include analysis of the roles of religious ideas and institutions in the cultivation and abridgement of rights of women children and minorities and rights to peace orderly development and protection of nature and the environment With contributions by a score of leading experts Religion and Human Rights provides authoritative and accessible assessments of the contributions of Judaism Christianity Islam Hinduism Confucianism Buddhism and Indigenous religions to the development of the ideas and institutions of human rights It also probes the major human rights issues that confront religious individuals and communities around the world today and the main challenges that the world s religions will pose to the human rights regime in the future

**Exploring Religious Diversity and Covenantal Pluralism in Asia** Dennis R. Hoover,2022-12-26 This book examines the growing diversity of religions and worldviews across East Southeast Asia and the factors affecting prospects for covenantal pluralism in these regions According to the Pew Religious Diversity Index half of the world s most religiously diverse countries are in Asia The presence of deep religious worldview difference is often seen as a potential threat to socio political cohesion or even as a source of violent conflict Yet in

Asia as elsewhere the degree of this diversity is not consistently associated with socio political problems Indeed while religious difference is implicated in some social challenges there are also many instances of respectful multi faith engagement practical collaboration and peaceful debate Whether or not religious worldview difference is part of a positive pluralism depends on a complex array of legal and cultural conditions This book explores these dynamics and contingencies in Asia structuring the inquiry according to the theory of covenantal pluralism Covenantal pluralist theory calls for a constitutional order characterized by freedom of religion conscience and equality of rights and responsibilities combined with a culture of practical religious literacy and virtues of mutual respect and protection Volume I offers a pioneering exploration of the prospects for this robust and non relativistic type of pluralism in East Southeast Asia Volume II examines South Central Asia The chapters in these volumes originally appeared as research articles in a series on covenantal pluralism published by The Review of Faith International Affairs Global Rebellion Mark Juergensmeyer, 2008-05-16 Why has the turn of the twenty first century been rocked by a new religious rebellion From al Qaeda to Christian militias to insurgents in Iraq a strident new religious activism has seized the imaginations of political rebels around the world Building on his groundbreaking book *The New Cold War Religious Nationalism Confronts the Secular State* Mark Juergensmeyer here provides an up to date road map through this complex new religious terrain Basing his discussion on interviews with militant activists and case studies of rebellious movements Juergensmeyer puts a human face on conflicts that have become increasingly abstract He revises our notions of religious revolution and offers positive proposals for responding to religious activism in ways that will diminish the violence and lead to an accommodation between radical religion and the secular world
